INSTRUCTIONS

These instructions are intended chiefly for the guidance of persons making reports to this office.

The Distance Figures given in the column headed "Dist. From" must not be used by Agents in billing freight.

PASSENGER AND FREIGHT CONDUCTORS, YARD-MASTERS AND OTHERS

1 Every train must be reported to this office by Conductor. If train consists of an engine without cars, or an engine and cabin, the word "Light" should be written across the face of the report. Helping engines returning light and foreign trains detoured and foreign engines running under their own steam in charge of pilot must be reported by Conductor or Pilot in charge on C. T. 1033B report.

2 Date your Car Report according to actual time of starting without reference to the time your train is scheduled to leave. When train leaves starting-point exactly at midnight, give the time of leaving as 12.01 A. M., and date your report accordingly.

Conductors should use Eastern Time at Pittsburgh and points east thereof and Central Time at points west of Pittsburgh.

3 Give actual date and actual time leaving starting-point and arriving at destination, and actual date and actual arriving and leaving time at all stations and sidings where cars are picked up or cut off, where engines are changed and helpers taken on or dropped, noting A. M. or P. M., as the case may be. Enter on your report the route your train takes in case it is diverted from its usual route, or if there is more than one route by which the trip can be made.

4 Use C. T. 1033B for all freight trains, C. T. 1023A for through passenger trains, C. T. 1024A for local passenger trains and mixed trains scheduled to carry both freight and passengers.

5 In case of accident to your train, note the fact on the back of report. Mark all cars which are badly damaged by putting a circle in pencil around the small number printed in the initials column on C. T. 1023A, 1031 and 1033B, and by putting a circle around the number of the car on C. T. 1024A and C. T. 1024B.

6 Give the full name of the Division or Railroad over which the train moves, and the direction in which it is bound, as shown on time-table.

7 Give the section number, train number, and name or kind of train. Give the numbers or letters of the

stations or sidings shown in C. T. 1000 only, from which the train and cars start and to which they move, and not the abbreviations used for telegraph calls, telegraph towers, or numbers in use by any other department of the railroad. When no number or other abbreviation is shown for a station at which cars are picked up or dropped, full name should be written in. If the schedule is changed during the trip, note it on report so as to show what schedules and sections were represented, and from and to what points the changes, if any, were in effect.

8 Unless otherwise instructed by the Superintendent, Yard Conductors will mark their reports "shifter" in the space provided for train at the upper left-hand corner of the car report.

9 Give the initials and number of each engine used during the trip. The engine hauling the train should be given first, pullers next, and pushers in order afterwards. The number of the station or siding at which each engine was coupled to the train and was detached should be given.

10 When reporting the initials of cars the abbreviations given on pages 19 to 47, inclusive, should be used. When the initials of a car are not given in the list of abbreviations, report the full name marked on the car.

When several stations or sidings are included in this book, in a brace, and have but one abbreviation, that abbreviation should be used for all the points included in that brace. Movements made between points covered by the same brace should not be reported. If a station or siding is not given in this book, report the full name.

The letters placed at the right of the names of sidings covered by a brace are not to be used by conductors on their car reports to the Car Record Office.

11 Beginning at the engine, take the initials, kind, and number of each car as it stands in the train, showing the cabin, or car in use as a cabin, as it stands in the train at the beginning of the trip. On C. T. 1024A and C. T. 1024B the order of cars in train need not be observed. Initials or numbers of cars must not be copied from way-bills or the memoranda of other persons. Sleeping, parlor or dining cars having names as well as numbers should be reported by the names. When wrecked cars are moved loaded on other cars, a note should be made to that effect, giving initials and numbers of the wrecked cars. When there are two or more cars of the same initials next to each other in the train, ditto marks should be used for the initials after the first.

Show plainly the number of the station or siding to or from which each car is moved. When two or more cars next to each other in the train are moved to or from the same point, ditto marks should be used for the station-number of all but the first car.

Make out your report during the trip, and do not copy it after the trip is made from memoranda or from the Duplicate Report Book, C. T. 1026. The original

report as made up from the train must be forwarded to the Car Record Office.

12 Freight Conductors on their Car Reports C. T. 1033B, in the column after the car number, must use the following abbreviations to designate loaded cars:

ABBREVIATION	COMMODITY
A.....	Anthracite Coal
B.....	Bituminous Coal
K.....	Coke
X.....	All other kinds of lading.

and use this mark "—" to designate each empty car. Do not use the ditto mark in this column, but place the proper loaded or empty mark after each car number.

Should a car in a freight train be loaded or unloaded during the trip, its initials and number should be entered once for each loaded and once for each empty movement separately, as if each movement was made by a different car.

At the bottom of the report give the number of loaded and the number of empty cars moved during the trip, counting the cabin as an empty car, and counting each separate movement as a car when the same car makes both loaded and empty movements. New cars on their way to the home road from the shops where built, moving on card waybills for loaded cars, should be counted as empty, unless the cars contain lading.

13 Report each dead engine and each tender, not in service and if on their own wheels, give the initials and number of each as a loaded car, using a separate line for each, and report them in the order in which they stand in the train marking them "Engine" or "Tender."

If loaded on a car they should be considered as any other lading, and their initials and number should not be given.

14 The kind of car must be designated as follows:

Passenger Equipment	Freight Equipment	M. of Way Equipment
PL. Parlor	R. Refrigerator	M. C. Cabin
DN. Dining	B. Box	T. B. Tool and Block
SL. Sleeper	S. Stock and Rack	S. P. Snow Plow
OB. Observation	G. Gondola	DK. Derrick
P. Passenger	H. Hopper Gondola	S. W. Stone and Wood
2 P. 2d Class Pass.	F. Flat	Truck
V. Private	K. Coke	G. D. Gravel Dump
P. B. Pass.-Bagg.	D. Coal Dump	
PL. B. Parlor-Bagg.	L. Lime	
BG. Baggage	T. Tank	
B. M. Bagg.-Mail	C. Cabin	
PO. Postal		
P. S. Postal Storage		
Exp. Express		
R. E. Refrigerator Exp.		
B. E. Box Express		
H. C. Horse-Carriage		

15 Numbers of cars or of stations and sidings with a letter or cipher prefixed or affixed, thus,—“D35842,” “354A” or “014” must be so reported, considering the prefix or affix as part of the number.

16 Make the letters and figures plain, so that there can be no doubt as to what they are intended for. Observe the dotted lines in the columns headed “No. of Car” and keep the right-hand column full, entering no more than one figure in a square.

17 When one blank will not hold the numbers of all the cars in train, use two full blanks (not part of a blank), and fasten them together so that they will reach the Car Record Office as one report. Head and sign the second blank the same as the first, and mark it “Continued,” and show the total number of cars in the train, as per Rule 12.

18 Report on C. T. 1033B, making one report for each trip, the initials and number of each car as it stands in the train, beginning at the engine, as per Rule 11. On the back of the report, give the date as well as the time at each station and siding, as instructed by Rule 2.

19 Keep an exact copy of your car reports in the Duplicate Report Book, C. T. 1026. When a book is filled up, send it to your Superintendent.

20 A special form of card provided for the purpose and reading

“To.....Scales.

Memorandum to agent for billing,”

will be used by shippers, when authorized by the Auditor to forward carload freight to the first scale when the destination of the property is beyond the scale point.

Unless a destination is given beyond the scale point, a car must not be moved from the shipper's siding. The movement of unconsigned coal and coke from mine sidings and coke works is prohibited, and under no circumstances should such movements be made.

With this exception, do not move freight in carloads without a card waybill for each car, nor in less than carloads without a road waybill covering each article.

In the space for signature the revenue and card waybills must be stamped with the office stamp of the billing agent, or signed by the agent or his authorized representative.

When two or more cars are required to carry lading on account of its length, the initials and numbers of all the cars, including the idlers, should be shown on one card waybill.

21 Cars marked “Pennsylvania” and “P. R. R.,” or “Pennsylvania Lines” and “P. L.” in addition to other markings such as N. C. R., P. B. & W., P. C. C. & St. L., etc., should be reported and card waybilled in accordance

with the initials directly above the car number, but cars should not be held up in transit if card waybills show "Pennsylvania" and "P. R. R." or "Pennsylvania Lines," and "P. L.," and not N. C. R., P. B. & W., P. C. C. & St. L., etc., or *vice versa*, for correction of card waybills, but allowed to go through to destination as billed.

22 Report on C. T. 1023A through passenger trains, making one report for each trip, showing the initials and numbers of each car as it stands in the train, beginning at the engine, as per Rule 11.

23 Report on C. T. 1024A local passenger trains, showing each and every trip in the order in which it is made, so that at the close of the day's work the report will give a complete record of all movements made. Include the whole day's work, even if it is not finished until after midnight, and date the report with the day on which the first trip begins. This report should also be used in reporting pay trains, official trains, inspection trains, etc., and care should be taken to mark train in such a manner that it may be identified as Company business.

24 Report on C. T. 1024B mixed trains, showing each trip in the order in which the trip is made, so that at the end of the day's work the report will give a complete record of all movements made. Include the whole day's work, even if it is not finished until after midnight, and date the report with the day on which the first trip begins.

A mixed train is one scheduled to carry both freight train cars moved in connection with freight traffic, and passenger train cars moved in connection with passenger traffic. The incidental omission of either the freight or passenger cars from the regular scheduled mixed train does not change its class as a mixed train.

25 Passenger Conductors making reports on C. T. 1023A, C. T. 1024A and C. T. 1024B will use in columns headed "Commodity" the following abbreviations:

M.....Mail	MK.....Milk
M. S.....Mail Storage	(when moved under milk tariffs)
EX.....Express	EX.....Milk
BG.....Baggage	(when moved under express tariffs)
PK.....Baggage	FT.....Freight
(under package stamp)	CO, MTL.....Company material
NP.....Baggage	X.....Cars with Passengers
(newspapers in bulk)	—.....Empty Cars

26 Report on C. T. 1031 work trains and construction trains, giving the movement of each and every train, including M. W., construction and transportation cars, whether assigned to and in regular use by the M. W. Department or otherwise, showing the point from and to which the cars are moved on each trip. This report should be used in reporting movements of material and

supply trains, gravel and ballast trains, wrecking trains, repair trains, snow plows and flangers.

27 Sign your report, keep it clean, and at end of trip deposit without delay at the place designated by your Superintendent, to be forwarded to the Car Record Office by first passenger train. Before depositing, carefully examine it to see that it is correct in every particular.

C. T. 220 REPORTS

28 Report baggage, express and postal storage, as baggage, express or postal storage cars, according to the service in which they are used. Cars used for both baggage and express matter should be reported as baggage.

TO AGENTS, YARD-MASTERS AND OTHERS MAKING REPORTS TO THIS OFFICE

C. T. 1019 A and C. T. 1019 B REPORTS

29 Every car interchanged with a foreign railroad must be reported to this office by the Agent or Yard-Master in charge of the interchange. The Interchange Reports shall close at midnight and shall include all cars delivered upon the date named unless otherwise noted thereon. Three carbon copies shall be made in addition to the original. The sheets shall be numbered consecutively, beginning with the first of each month.

In cases where there are different standards of time at a junction the time of the more easterly reckoning shall be used.

The reports must be signed by the proper representative of the delivering road and certified to by the proper representative of the receiving road after checking. The original with one copy shall be returned to the delivering road.

Car Service Rule 5 governs the delivery of cars. The date and time of delivery of cars upon interchange tracks of connecting lines shall, *prima facie*, be the date and time given by the delivering road.

CAR SERVICE RULE 5

Cars shall be considered as having been delivered to a connecting railroad when placed upon the track agreed upon and designated as the interchange track for such deliveries, accompanied or preceded by proper data for forwarding and to insure delivery, and accepted by the car inspector of the receiving road.

Unless otherwise arranged between the roads concerned, the receiving road shall be responsible for the cars, contents and *Per Diem*, after

receipt of the proper data* for forwarding and to insure delivery, and until they have been accepted by its inspector or returned to the delivering road.

Observe Rules 10, 11, 12, 13, 14, 15 and 16, as far as they apply to your reports. C. T. 1019A and 1019B should show the final destination of all loaded cars delivered to and received from foreign roads. If the final destination is a point the name of which is duplicated in this book, add the name of division or railroad on which it is located; if on a connecting line give the name of the State. The final destination should be given even if the car is not billed through. When empty cars are carded to a given point, it should be shown under head of final destination.

30 Agents or Yard-Masters at junction points with foreign roads who do not use the Interchange Slip, C. T. 1018, should submit a copy of their C. T. 1019A, or 1019B reports to the Agent or representative of the connecting line for checking and to certify to their correctness, and should receive the interchange reports of the connecting line and perform a like service. The original report must not be delayed, but the Agent or Yard-Master should submit a copy for checking and notify this office of any errors or corrections on Form C. T. 1095.

When there are no cars to report, send a blank, dated and signed, and write across the face "No cars to report."

C. T. 1018, INTERCHANGE SLIP

31 Agents who use C. T. 1018, Interchange Slip, should make one report and its carbon copy for each cut of cars delivered to a connecting road.

Cars delivered to different lines must not be included on same slip.

The report and its copy to be made before cars leave the yards of this Company, and signed by its proper representative, leaving vacant the time of delivery, which will be filled in when cars reach the delivery tracks of the connecting road, and the signature of the representative authorized to sign for that road obtained to the duplicate slips, one of which will be left with the connecting road, and the other returned to the Agent of the Pennsylvania R. R. Co.

These slips must be preserved for production as evidence if accuracy should be subsequently disputed.

Agents or other duly authorized representatives holding certified C. T. 1018 reports need only sign their own names to the daily C. T. 1019A, and C. T. 1019B reports to the Car Record Office.

*NOTE.—The character of the necessary data will be determined by each receiving road in accordance with the conditions of its service.

C. T. 1138 REPORT

32 When cars upon which no embargo has been placed are not accepted by a connecting line, such cars are subject to per diem reclaim, or when a road, which has placed an embargo, refuses to accept cars already loaded or loaded within 24 hours after date of the embargo, as evidenced by the billing accompanying the car, such cars are also subject to per diem reclaim. The delinquent line must be notified daily of the total number of cars held for it at midnight, and the Car Record Office advised by wire. The following morning the delinquent line must be furnished with form C. T. 1138 showing the initials and numbers of the cars held, and the Car Record Office furnished with two copies of the same report.

33 Make out the report at the close of each day's business, and send the original by first train to your Superintendent and copies to such other persons as the Superintendent directs.

TO AGENTS AND OTHERS WHO REPORT ON C. T. 32

34 Under the heading "Received" report all the cars standing on all the sidings under your control, with date received, commencing with the oldest car. Enter also all cars which have arrived since date of last report, even if they have left your sidings. When cars are on a siding which is included under a brace in this book, give under the heading "Siding" the letter which is placed to the right of the name to designate on what particular siding under your control the car is located. If a car received loaded has been unloaded and has not been taken away when the report is made up, show the date received and the date unloaded in their proper columns. Continue to enter all cars on your report daily until they leave your sidings; on the date a car leaves, fill out the columns under heading "Forwarded," giving the date forwarded, etc. Show cause of delay in detail in proper column.

35 If a car is forwarded with freight for more than one station, give under the heading "Final Destination" both the nearest and farthest points for which the car contains freight. Under the heading "Lading," give the name of the lading in full. If made up of many different kinds, mark "Miscellaneous."

36 If the final destination is a point the name of which is duplicated in this book, add the name of the division or railroad on which it is located.

37 Use enough sheets to include all the cars, number them, pin them together, and sign the last one. When there are no cars to report, either on sidings at your station or on sidings under your control but having different num-

bers from your station, send a blank, dated and signed, and write across the face "No cars to report."

38 Do not hold an empty car, for which there is no order, more than twenty-four hours without permission from your Superintendent.

TO SHOP FOREMEN, MASTER MECHANICS, SUPERVISORS, ASSISTANT ENGINEERS, ENGINE-HOUSE FOREMAN AND ALL OTHERS WHO REPORT ON C. T. 195A OR C. T. 195B.

39 Make out the report at the close of each day's business, and send the original by first train to your Superintendent and copies to such other persons as he may direct.

40 C. T. 195A Report should show all cars except Maintenance of Way cars in Maintenance of Way service on hand loaded or on hand empty to be loaded with Company Material, except Company Coal, with date received, and the cars released, placed for reloading or forwarded on the day on which the report is made.

C. T. 195B Report should show all cars on hand loaded Company Coal, Anthracite or Bituminous, with date received and cars released, placed for reloading or forwarded on the day on which the report is made.

If remaining cars on these reports show unusual delay, the cause of delay should be shown in column provided for that purpose.

C. T. 1039, REPORT OF CARS SWITCHED

41 This report must be made in duplicate and both copies forwarded to the Car Record Office at the close of each month after having been certified to by the Agent or representative of the line for which the switching was performed.

It must contain the initials and numbers of cars and information called for in each column heading for all cars switched under per-diem rules.

When there are no cars to report, send a blank, dated and signed, and write across the face "No cars to report."

LIGHT-WEIGHING CARS AND REPORTS OF LIGHT WEIGHT

TO WEIGHMASTERS

42 Report to the Car Record Office on C. T. 1103 the initials, numbers and final destination of cars passing over your scales that do not bear light-weight marks or that are improperly marked, or that have not been light-weighed in accordance with General Notice 67D, so that the car may be traced, light-weighed and marked correctly.

43 After light-weighting cars, hand to the Car Marker a memorandum made up on C. T. 1102, showing the light-weight to be marked on each car.

44 Report on C. T. 1101 the initials and numbers of all cars light-weighted and remarked at the scales, in accordance with General Notice 67D. Show the cars light-weighted up to midnight of Saturday of each week, fill in all information called for on the report, and forward a copy on Monday of each week to the Car Record Office, copy to Foreman of Car Repairs, and retain a copy for file.

C. T. 1098 REPORTS

45 In making your daily report C. T. 1098 include all carloads billed, weighed or reconsigned from your scale. When your scale is located at the junction with a foreign railroad, include all cars received from that road. Show the full route in all cases.

Shipments of coal or coke to points short of scales billed at estimated or shipper's weights should also be reported on C. T. 1098 by the Agent waybilling such shipment.

When there are no cars to report, send a blank, dated and signed, and write across the face "No cars to report."

Enclose reports to Car Record Office daily (Sundays and Holidays excepted if scales are not operated on these days) in perforated envelope C. T. 1113.

C. T. 1112 REPORTS

46 Supervisors, at the close of each month, will report on C. T. 1112 the initials and numbers of all maintenance of way equipment on their divisions, and of all other cars in regular use by them. Report the kind and number of each car received or sent away during the month, with date and point from which they were received and to which they were sent. Show under the head of "Remarks" the initials and numbers of cars on hand and not wanted or unfit for service. If there are no cars to report, send a blank, dated and signed, and write across the face "No cars to report."

47 Report opposite each car number the number of working days, excluding Sundays and Legal Holidays, conducting transportation cars and maintenance of way stone and wood trucks and eight-wheel gravel dumps are used in construction or maintenance of way service or in special C. T. service. If used jointly, show separately the number of working days, excluding Sundays and Legal Holidays, chargeable to each department.

When cars are not used, give the number working days idle.

48 Shop Foremen, at the close of each month, will report on C. T. 1112, the initials and numbers of all maintenance of way equipment in regular use at shops and in shops for repairs, showing the date received in

shops and the date turned out of shops, and stating in each case whether the car was in shops for repairs or for regular use. Also, report on C. T. 1112 the initials and numbers of all conducting transportation cars in regular use at shops, showing the dates the cars were received from and the date they were returned to C. T. service; and show the cars on hand at the close of the month not wanted, and which are unfit for service.

When there are no cars to report send a blank, dated and signed, and write across the face "No cars to report."

C. T. 1022 REPORTS

49 Shop Foremen will report daily on C. T. 1022 the initials and numbers of all cars received in shop and on shop sidings under the jurisdiction of the Shop Foreman and turned out for service from midnight to midnight, including cars loaded with Company material. The cars repaired in trains and on yard tracks by Car Inspectors should not be reported. Give the initials and numbers of all cars torn up or built, including all cars damaged on the road and torn up at shops. When marks on cars are changed give full explanation.

Box cars of these lines will be marked with the initials and number on the top plate on the inside of the car to the left of the doorway to correspond with the initials and number on the outside of the car. When any change in the initials or number is made on the outside of the car, care should be taken to make the same change on the inside of the car.

When a damaged car is loaded on another car and sent to home shops, the initials and number of the damaged car should be shown on report and a notation made to that effect.

When there are no cars to report send a blank, dated and signed, and write across the face "No cars to report."

Enclose reports to Car Record Office in perforated envelope C. T. 1113.

50 All cars from shops should be sent to the nearest scales for re-light-weighting, if repairs likely to change their light-weight have been made.

C. T. 228 REPORTS

51 Make report of every accident to any car which necessitates its being sent to shops, giving point shown in this book at or near which the accident occurred, and of all cars found broken, even if it is not possible to locate the point or cause of accident.

A copy of C. T. 228 report should be sent to each of the following:

Car Record Office, all cases;

Freight Claim Agent, when transfer of lading or loss or damage to lading occurs.

Superintendent Motive Power, when cars are damaged or destroyed;

Superintendent Insurance Department, when cars are damaged or destroyed by fire; and such other copies as may be directed by Superintendent or General Superintendent.

Report must be made at once, and if full details cannot be given, mark report preliminary and follow up promptly with supplementary report giving full details, including cause, amount of damage and how extinguished in case of fire. When form C. T. 228 is used to report damage to or destruction of equipment by fire, it will not be necessary to make out form ID7 report to the Insurance Department.

This form is also to be used in cases when drop bottoms come down causing loss of lading.

This report should not include passenger, freight or maintenance of way equipment cars which are repaired by Car Inspectors outside of shops.

When a transfer of the lading or its seizure for Company's use is the result of the accident, report on C. T. 228 all particulars called for on C. T. 321 and 322, in regard to billing, etc.

Card waybills should be sent to the Car Record Office for all cars containing lading destroyed, lost or otherwise disposed of, which will not reach destination.

C. T. 321 AND 322 REPORTS

52 Report in every case on C. T. 321 when all or any portion of lading in carloads is transferred from one car to another; and on C. T. 322 when all or any portion of lading in carloads is taken for Company use not reported on C. T. 228.

C. T. 216 A and 216 B REPORTS

53 Report on these forms every car which has passed the scales loaded or has been billed and is reconsigned to a new consignee or a new destination; also when a car has route changed enroute, and also when a car is delivered and unloaded in error by the wrong consignee.

Enclose reports to Car Record Office in perforated envelope C. T. 1113.

GENERAL INSTRUCTIONS

54 When the number of a car is changed in transit all the waybills traveling with the car must be changed to correspond.

55 Where there has been a loss of lading from car it should be reweighed and proper notation made on card waybill. When portion of a carload has been transferred to another car, both cars should be reweighed after transfer. When the entire contents of a car have been transferred to another car it is not necessary to weigh the car to which transfer has been made if there has been no loss of lading. When transfer of lading is necessary, a car of construction similar to that of original car should be selected to take care of the transferred lading.

56 When a carload shipment is transferred enroute the initials and number of car into which lading was transferred should be shown on the card waybill in place of initials and number of original car. Also the light weight of the car into which lading was transferred should be shown on the card waybill added to net weight to give new gross weight.

57 When freight is transferred by local trainmen, the transfer must be noted on the waybill, showing car transferred to, date of transfer and name of Conductor. If freight is checked out of car by trainmen while Agent is not present, any exceptions as to Over, Short or Damage must be noted on waybill over signature of Conductor. If Conductor unloads freight for which he does not hold waybill, he must furnish Agent with a memorandum showing from what car unloaded and from what point he received the car.

58 When a loaded car is cut out of a train for repairs, this fact should be noted on the back of card waybill by Conductor, showing point at which car is left, and date.

Similar endorsement should be made by Yard-Master when loaded cars in transit are repaired in yards or shops.

59 When a car is left at a station, other than its proper destination, the Agent should secure from the Conductor the waybill on which such car is moving.

60 When directed to forward an empty car free to a particular point, use a C. T. 212 card—a separate card for each car. This card must not be used for loaded cars, nor for empty cars when a charge is made for the movement.

When the final destination is a point on a connecting road, card the car only to the junction point with the connecting line, and show the final destination in addition for information only. The C. T. 212 card should be delivered to the Agent or Yard-Master of the connecting road with the car.

When a car can be loaded at some intermediate station in the direction of the point to which it is ordered, card it as above to that station, and put after the name of the station the words "To be loaded to" the desired point.

When a car moving on a C. T. 212 card is loaded at an intermediate point, fill out the back of the card and retain it for record.

When a car moving on a C. T. 212 card is received at destination, fill out the back of the card and retain it for record.

61 When new cars on their own wheels make their first trip from your station or are received at your station from a connecting line on their first trip, they should be reported to this office by letter, giving initials, number and kind of each car, lading (if any) and destination, stating whether cars are waybilled or not. A similar report should be made of all empty cars waybilled as

freight and traveling under charges, as no per diem or mileage earnings are allowed on these cars. Such cars must not be loaded.

62 The initials of the car on the card waybill must conform to the abbreviations on pages 19 to 47 of this book. The number on the card waybill must agree with the number on the car. Do not despatch nor move cars if the card waybill is not made out as above, nor on a card waybill that has been altered in any way unless the authority for the change is plainly noted in ink on the back, over the signature of the Yard-Master making the change. A Yard-Master or Conductor having a card waybill on which the initials or number of the car do not agree with the car, or having a card waybill without the car, or having a loaded car traveling without a card waybill, should report the same promptly to the Superintendent for instructions or authority to forward on Special Card Waybill, A. D. 1241, the loaded car without the card waybill. (Conductors, Yard-Masters and all other interested persons must examine the backs of all card waybills.)

When the initials or car number on the card waybill disagrees with the initials or number on the car, and there is no reason to doubt that the one belongs to the other, correction should be made on the face of card waybill to conform to the abbreviations on pages 19 to 47 of this book, and notation "Initials (or Number) Changed by" followed by the signature of the Yard-Master making the change plainly noted in ink on the back of the card waybill and car sent forward, and a report made to the Superintendent so that attention may be called to the error. If, however, there is reason to believe that the card waybill does not belong to the car it accompanies, same should be reported to the Superintendent for instructions.

When a car is numbered wrong on one side, it should not be held up in transit, but allowed to go forward and a report made of same; notation to be made on card waybill, so that other Yard-Masters will not report same error in number.

If a car is found on a siding at which there is no Agent, and its initials or number do not agree with the card waybill, do not move the car but report the error by telegraph to the Superintendent.

Exception to this rule will be made when a car is loaded with live stock or perishable freight, or is moving on a preference sticker; such cars should be forwarded without waiting for correction, and the error reported by telegraph to the Superintendent. A notation must be made by the Yard-Master on the back of card waybill showing that attention of his Superintendent has been called to the error in card waybill, so that connecting divisions will not duplicate the report as to error in card waybill which is receiving attention of the Superintendent Freight Transportation.

The authority for making any alteration on a card waybill, except as provided above, must come from the Superintendent, who will be instructed by this office or the General Superintendent, except that the Superintendent may authorize a change in the consignment or destination of a car upon request of the Division Freight Agent. To alter a card waybill, draw a pen-stroke through the original marks, and write the correction in ink above or below, taking care to leave the original marks so they can be easily read. On the back of the card give the authority for the change, and date and sign the notation. Trainmen must not make any alteration on a card waybill. We will accept cars traveling on altered card waybills from lines west of Pittsburgh when proper notation is made on the card waybill that the alteration has been made by authority of the proper officer of our western lines.

63 When a loaded car is found to have been damaged, broken open, or with ventilators, screen doors or seals tampered with so as to permit pilfering, or showing evidence of contents having been pilfered, the circumstances must be reported to the Superintendent, and car resealed or repaired at once, noting the same on back of card waybill.

64 When a car is delivered on an outlying siding, or at a place at which there is no freight agent, the Conductor must make a report on C. T. 850 of the seals on the side and end doors, together with all letters, numbers and marks on the face and back of seal, which must be delivered with the waybill to the Agent.

65 Conductors and Brakemen must examine seals at intervals while cars are in their charge. When seals are discovered which apparently have been tampered with, the Conductor should advise the Division Superintendent by wire, giving all the facts, and should fill out C. T. 865 in such cases and leave it with the Yard-Master at the end of the run, or with such other person as may be designated by the Superintendent. Such examination of the contents of the car as may be practicable should be made before the car is re-sealed.

66 When it becomes necessary to break a seal on a car in transit, in passing through shops for repairs, or for sampling or inspection of contents, only the seals broken should be replaced. A report on C. T. 865 showing all letters, numbers and marks on the face and back of seals removed, on the seals applied and on the seals which were not disturbed should be forwarded to the Division Superintendent.

67 Agents should note carefully the condition of lading when a car is unloaded, and if evidence of a leaky roof is found, and the car belongs to any of the lines shown under Pool List, page 318, the edge of the roof on each side immediately above the door should be marked with

white paint (if not supplied with white paint, white chalk may be used), but in addition the words "leaky roof" must be written in a prominent position on each side of the car. Cars so marked, unless required for the movement of freight which would not be damaged by water, should be sent to the nearest shop for repairs and the white marks must be obliterated when such repairs have been made. Cars marked in this way must not be loaded with any commodity which would be damaged by water.

Agents should report to the Superintendent on C. T. 793 cars received found to be defected which would render the car unfit for freight liable to loss by leakage or damage by rain or snow.
