# INSTRUCTIONS

These instructions are intended for the guidance of persons making reports to the Superintendent Car Service, Philadelphia, Pa.

## FREIGHT CONDUCTORS.

1 A Car Report must be made to the Superintendent Car Service of every train moved, using Forms C. T. 1034 and 1034A, which constitute one report, for all freight trains in road service. Full instructions for the preparation of these reports are printed on the back of Form C. T. 1034. Form C. T. 1034B should be used by the conductors engaged in yard service, and Form C. T. 1034C by conductors in charge of work trains.

2 If a train consists of an engine without cars, or an engine and cabin, the word "Light" should be written across the face of the report. Helping engines returning light and foreign trains detoured and foreign engines running under their own steam in charge of pilot or home trains detoured over foreign roads must be shown on C. T. 1034 or C. T. 1034B.

3 Date the Car Report according to the actual time of departure, regardless of the time train is scheduled to leave. When train leaves starting point exactly at midnight, show departure time as 12.01 A. M. and date report accordingly.

Use the Standard Time in effect on the Division over which the movement is being made.

4 Show actual date and actual time leaving starting point and arriving at destination, and actual date and actual time arriving and leaving all stations and sidings where cars are picked up or set off, where engines are changed and helpers are taken on or dropped, showing the initials and numbers of each engine in service during the trip; also, symbol of train, train number, section number and kind of train, showing the full name of the Division or road over which train moves and the direction.

Enter on the report the route train moves if diverted from its usual route or if there is more than one route via which the trip may be made.

The name of the Division on which the train originates should be shown at the top of Forms C. T. 1034, C. T. 1034A, C. T. 1034B and C. T. 1034C, and the name of the home Division should be shown in space provided for that purpose.

5 Use numbers or letter abbreviations of stations or sidings as shown in C. T. 1000 to indicate points from which cars are moved or set off.

Care should be exercised not to use telegraph calls, telegraph towers or numbers in use in any other publication. When no number or abbreviation is shown for a station or siding where cars are picked up or set off full name should be written in.

6 When several stations or sidings are included in a brace with but one abbreviation, that abbreviation should be used for all points included therein. Movements between points covered by the same brace should not be reported.

7 Beginning at the engine, show each car as it stands in the train at the beginning of the trip. The cabin car should be shown in the space provided at the head of the report.

Care must be exercised to include on the report all cars moved. When wrecked cars are moved loaded on other cars a notation should be made to that effect on the back of the report giving the initials and numbers of the wrecked cars.

8 Use Form C. T. 1034C in reporting movements of work trains and construction trains, showing all cars moved in the trains whether regularly assigned to work service or only temporarily engaged in this work. This form should be used in reporting the movements of material and supply trains, gravel and ballast trains, wrecking trains, repair trains, snow plows and flangers.

9 The following abbreviations should be used in designating the commodity, immediately following the car number:

| ABBREVIATION | COMMODITY                  |
|--------------|----------------------------|
| A.....       | Anthracite Coal            |
| B.....       | Bituminous Coal            |
| K.....       | Coke                       |
| X.....       | All other kinds of lading. |

and a dash “—” should be used to indicate empty cars. Do not use ditto marks, but place the loaded or empty symbol after each car number.

Should a car in the train be loaded or unloaded during the trip, the number should be entered once for each loaded and once for each empty movement separately, the same as if each movement had been made by a different car. When two or more cars are required to carry lading on account of its length, the initials and numbers of all cars, including the idlers, should be reported.

At the top of the report show the number of loaded and the number of empty cars moved during the trip, counting the cabin as an empty car and counting each separate movement as an empty when the same car makes both loaded and empty movement. New cars moving empty on revenue card waybills should be counted as empty.

10 Report each dead engine and each tender not in service when moving on their own wheels, showing the initials and number of each as loaded, using a separate line for each engine or tender and report them in the order in which they stand in the train, marking them “Engine” or “Tender.”

If loaded on a car they should be considered the same as any other lading, and the initials and number of the car should be reported, but not the initials and numbers of the engine.

11 The following abbreviations should be used in designating kind of car:

| Freight Equipment |                   | Work Equipment       |
|-------------------|-------------------|----------------------|
| A. Automobile     | H. Hopper Gondola | M. C. Cabin          |
| BF. Furniture     | F. Flat           | T. B. Tool and Block |
| R. Refrigerator   | CK. Coke          | S. P. Snow Plow      |
| B. Box            | D. Coal Dump      | DK. Derrick          |
| DD. Double Deck   | L. Lime           | S.W. Stone and Wood  |
| Stock             | LP. Live Poultry  | Truck                |
| SD. Single Deck   | PH. Palace Horse  | G. D. Gravel Dump    |
| Stock             | T. Tank           | MW. Ballast          |
| G. Gondola        | C. Cabin          |                      |

12 Station and siding abbreviations must be reported in full including the letter prefix or suffix the same as the number of the station. The reporting marks appearing over the car number should be used showing the initials of the car. Letters and figures should be plain and carefully confined to the space provided on the reports. When one blank will not take care of the number of cars in the train, use as many additional full blanks as may be necessary to take care of all of the cars in the train. Reports should be carefully pinned together before being turned in at the end of the run for forwarding to the Superintendent Car Service, and care should be exercised to see that the total number of cars in the train is indicated on each blank.

The conductor should sign his report at the end of the trip and deposit the report, together with one copy of C. T. 1034, at place designated by the Superintendent. The original report, C. T. 1034A, and one copy of C. T. 1034, should be forwarded by first passenger train to Superintendent Car Service, enclosed in C. T. 1107, and the carbon copy to be disposed of as directed by the Superintendent.

### PASSENGER CONDUCTORS.

13 Conductors of through passenger trains should make their car report on Form C. T. 1023A, using a separate report for each train. Form C. T. 1024A should be used by conductors in charge of local passenger trains showing each trip in the order in which the trip was made and all the trains handled on one date should be shown on one report. This report should be used also in reporting official trains, inspection trains, etc., and should be marked in such a manner that the train may be easily identified. Form C. T. 1024B should be used by conductors in charge of mixed trains and one report should be used for all the trains handled in any one day.

A mixed train is one scheduled to carry both freight and passenger cars and the incidental omission of either freight or passenger cars on any one run should not change the classification of the train.

The initials and numbers of each car should be shown as it stands in the train, beginning at the engine. The names of all Pullman cars should be shown and the names should be written plainly. If a car is only used during part of the trip, it must be reported as loaded. All passenger, passenger-baggage, sleeping, parlor, dining or private cars that are locked or in charge of attendants or porters, and not open for use by passengers, must be reported as "Empty." Show actual time of departure and arrival regardless of schedule. Enter on the report the route train moves if diverted from its usual route or if there is more than one route via which the trip may be made. Use numbers or letter abbreviations of stations or sidings as shown in C. T. 1000 to indicate points from which cars are moved or set off.

These reports should be turned in promptly at point designated by the Superintendent and should be forwarded to the Superintendent Car Service enclosed in envelope Form C. T. 1167.

14 The following abbreviations should be used to designate commodity:

|                       |                                    |
|-----------------------|------------------------------------|
| M.....Mail            | MK.....Milk                        |
| M. S.....Mail Storage | (when moved under milk tariffs)    |
| EX.....Express        | EX.....Milk                        |
| BG.....Baggage        | (when moved under express tariffs) |
| PK.....Baggage        | EC.....Empty Milk Cans             |
| (under package stamp) | FT.....Freight                     |
| NP.....Baggage        | CO. MTL.....Company material       |
| (newspapers in bulk)  | X.....Cars with Passengers         |
|                       | .....Empty Cars                    |

15 The following abbreviations should be used to designate kind of cars:

| Passenger Equipment |                                |                         |
|---------------------|--------------------------------|-------------------------|
| PL. Parlor          | P. B. Pass.-Bagg.              | P. S. Postal Storage    |
| DN. Dining          | P. B. M. Pass., Bagg. and Mail | Exp. Express            |
| SL. Sleeper         | PL. B. Parlor-Bagg.            | R. E. Refrigerator Exp. |
| OB. Observation     | BG. Baggage                    | B. E. Box Express       |
| P. Passenger        | B. M. Bagg.-Mail               | H. C. Horse-Carriage    |
| 2 P. 2d Class Pass. | PO. Postal                     | E. C. Emergency         |
| V. Business         |                                |                         |

### INTERCHANGE REPORTS.

16 Each car interchanged with a foreign railroad must be reported to this office by the Agent or Yard Master in charge on the established Form of interchange report. The reports must be made daily and closed at midnight to include all cars interchanged during previous twenty-four hours. All initials and car numbers must be written distinctly and the writing kept within the space provided on the report. No ditto marks should be used in prepara-

tion of these reports. Care should be exercised to insure good and legible carbon copies. The sheets should be numbered consecutively beginning with the first of each month, a separate series of numbers for each road interchanging cars.

In cases where there are different standards of time at an interchange point, the more Easterly time shall be used.

The reports must be signed by the proper representative of the delivering road and certified to by the proper representative of the receiving road, after careful checking. Standard cut-up Form of interchange report Blanks, Forms C. T. 1019D, C. T. 1019E and C. T. 1019F, must be used in reporting all cars delivered to connecting lines. Four copies of the large sheet and one copy each of the pink and yellow narrow sheet should be made. The pink sheet and one copy of the large white sheet, showing cars delivered to connecting lines, should be forwarded promptly to the Superintendent Car Service, Philadelphia, Pa., and the yellow narrow sheet and two large white sheets should be furnished the Agent of the receiving line for his file and for the use of his Car Service Department.

The connecting delivering line will furnish each Freight Agent or Yardmaster in charge of the interchange with one yellow sheet and two white sheets, the yellow sheet and one white sheet to be forwarded promptly to the Superintendent Car Service, after checking and one white sheet retained for file. Separate reports should be furnished showing interchange of passenger equipment and numbered in separate series.

Car Service Rule 6 governs the delivery of cars, the date and time of delivery of cars upon the interchange tracks shall prima facie be the date and time given by the delivering road.

#### CAR SERVICE RULE 6.

"Cars shall be considered as having been delivered to a connecting railroad when placed upon the track agreed upon and designated as the interchange track for such deliveries, accompanied or preceded by proper data for forwarding and to insure delivery, and accepted by the car inspector of the receiving road.

Unless otherwise arranged between the roads concerned the receiving road shall be responsible for the cars, contents and per diem after receipt of the proper data for forwarding and to insure delivery, and until they have been accepted by its inspector or returned to the delivering road."

Reports should show the final destination of all loaded cars and if empty cars are carded to a given point the destination should be shown. The final destination should be given even if the car is not billed through.

All Interchange Reports should be checked by the Agents or Yardmasters of both roads and their correctness

certified to. Supplementary Interchange Reports must not be numbered but the word "Supplementary" must be written in the space provided for the sheet number. Date of interchange should be shown in space provided and a notation reading "Supplementary Report issued \_\_\_\_\_" written across face of all four copies of the large white sheets. The original report must not be delayed and any errors or corrections should be made on Form C. T. 1095, in accordance with instructions printed on the blank.

Reports should be forwarded to Superintendent Car Service, Philadelphia, Pa., in envelope, Form C. T. 1167.

### **C. T. 1138 REPORT OF CARS HELD FOR DELIVERY TO CONNECTING ROADS UNDER PER DIEM RULE 15.**

17 When cars upon which no embargo has been placed are not accepted by connecting line prior to midnight, such cars are subject to per diem reclaim. This will also apply to cars against which connecting lines have placed embargo, if cars were already loaded, or loaded within 24 hours after the date of the embargo, as evidenced by the billing accompanying the car.

The delinquent line must be notified, daily, prior to midnight, of the number of cars held at or back of junction point, and of our intention to make reclaim, covering detention of same on our rails, and the Superintendent Car Service must be furnished with the proper information by wire, as per detailed instructions appearing on reverse side of Form C. T. 1138.

Within 48 hours, the delinquent line must be furnished with Form C. T. 1138, showing initials and numbers of the cars held, as of 11.59 P. M.

### **C. T. 1039B REPORT OF CARS SWITCHED.**

18 This report must be made in duplicate and both copies forwarded to the office of Superintendent Car Service, at the close of each month after having been certified to by the Agent or representative of the line for which the switching was performed.

It must contain the initials and numbers of all cars switched, including our own System cars and all information called for in the heading of each column, as provided for in Per Diem Rule 5.

When there are no cars to report, send a blank form, dated and signed, and write across the face, "No Cars to Report."

### **C. T. 545.**

19 This form should be used for the purpose of making report to the office of Superintendent Car Service, of freight cars of railroad ownership detained by reason of railroad error, which prevents proper tender or delivery. After receipt of data for disposal of car, report must be

made in triplicate, showing full information called for and two copies forwarded to the Superintendent Car Service. The Agent making the report should retain the remaining copy.

The privilege of per diem reclaim on cars detained account of railroad error is predicated on the provisions of Per Diem Rule 14, same being printed at the bottom of Form C. T. 545.

Care should be taken to furnish full information necessary in order to substantiate the claim for per diem.

### **C. T. 228 REPORT.**

20 A report on form C. T. 228 should be made of any accident to cars, loaded or empty, which necessitates their being sent to shops, giving point at or near which the accident occurred, and all cars found damaged, even if it is not possible to locate the point where damaged or cause thereof.

This form should also be used to report cases where drop bottoms come down causing loss of lading, and all cases where loss of lading is discovered by reweighing of car or otherwise, showing the actual or estimated amount of lading lost and full manifest information in all cases.

Report must be made at once and if full details cannot be given, mark report "preliminary" and follow up promptly with supplementary report giving full details. If damage is caused by fire, show cause of fire, amount of damage, and how fire was extinguished. When form C. T. 228 is used to report damage to or destruction of equipment by fire, it will not be necessary to make out form I. D. 7 report to the Insurance Department.

This report should not include passenger, freight or work equipment cars repaired by car inspectors outside of shops.

A copy of C. T. 228 report should be sent to each of the following:

- Superintendent Car Service, all cases;
- Freight Claim Agent, when transfer of lading or loss or damage to lading occurs;
- Superintendent Motive Power, when cars are damaged or destroyed;
- M. C. B. Clearing House, Altoona, Pa., when cars are damaged or destroyed;
- Superintendent Insurance Department, when cars are damaged or destroyed by fire;
- Other copies as may be directed by Superintendent or General Superintendent.

### **C. T. 321 REPORT.**

21 Report promptly in every case on form C. T. 321 when all or any portion of lading in carloads is transferred from one car to another. In case transfer of lading is reported on form C. T. 228 in connection with report of accident, no report on form C. T. 321 is necessary.

**C. T. 322B REPORT.**

22 Report promptly in every case, on form C. T. 322B when all or any portion of lading in carloads is taken for Company use not reported on C. T. 228.

**C. T. 216A REPORT.**

23 Report on this form every car which has been billed and subsequently reconsigned to a new consignee or a new destination; also when a car has route changed enroute, and also when a car is delivered and unloaded in error by the wrong consignee.

Enclose reports to Superintendent Car Service in perforated envelope C. T. 1167.

**C. T. 1001 REPORT.**

24 When new Individual or Company sidings have been installed, or a relocation of Individual or Company trackage, or any change in tracks that affects information shown in C. T. 1000, a report should be made on form C. T. 1001.

A prompt report should be made of any changes in name of siding or name of siding owner, taking care to show the trade name and where a new colliery has been opened or where a change has been made in colliery operators, give full name of colliery, along with the name of operator. Also a report made when sidings are eliminated.

Siding and station abbreviations to be used in making reports to office of Superintendent Car Service will be assigned by this office, and abbreviations for new sidings, or changes in abbreviations should not be made without first securing authority therefor.

**C. T. 1022 REPORT.**

25 Shop Foreman will report daily on form C. T. 1022 the initials and numbers of all cars received in shop and on shop sidings under the jurisdiction of the Shop Foreman and turned out for service from midnight to midnight, including cars loaded with Company material. The cars repaired in trains and on yard tracks by Car Inspectors should not be reported. The C. T. 1022 form is a "cut-up" form, and therefore essential that all writing be kept within the space provided. In the columns of the "cut-up" portion provided for "date in" and "date out" of shops, the dates shown should be same as date entered at top of report. "Ditto" marks must not be used. Show on back of report in space provided the initials and numbers of all cars torn up or built, including all cars damaged on the road and torn up at shops. When marks on cars are changed give full explanation.

Box cars are sometimes marked with the initials and numbers on the top plate on the inside of the car to correspond with the initials and number on the outside of the car. When any change in the initials or number is made on the outside of the car, care should be taken to make the same change on the inside of the car.

When a damaged car is loaded on another car and sent to home shops, the initials and number of the damaged car should be shown on report and a notation made to that effect.

When there are no cars to report send a blank, dated and signed, and write across the face "No cars to report."

#### **C. T. 1098, C. T. 1098A AND C. T. 1098B.**

26 A daily report on form C. T. 1098, C. T. 1098A or C. T. 1098B should be made of all carloads billed, weighed or reconsigned from scales. Show the full route in all cases.

Shipments of coal or coke to points short of scales billed at estimated or shipper's weights should also be reported on this form by the Agent waybilling such shipment.

When there are no cars to report, send a blank, dated and signed, and write across the face "No cars to report."

#### **C. T. 647.**

27 Report should be made to Superintendent Car Service on Form C. T. 647 showing the movement of all freight trains over the Division for the preceding twenty-four hours and forwarded by first train after midnight, as per instructions printed on bottom of the report. Engines moving light without trains should be so indicated in space provided for conductor's name.

#### **C. T. 647A.**

28 Only special passenger trains and additional sections of regular trains should be reported on Form C. T. 647A. Any regular trains which may have been annulled for cause should be reported as "Annulled."
