INSTRUCTIONS.

TO YARD-MASTERS, CONDUCTORS AND AGENTS.

CARD WAY-BILLS.

1. A special form of card provided for the purpose and reading

"To.....Scales.

Memorandum to agent for billing."

will be used by shippers, when authorized by the Auditor, to forward car-load freight to the first scale when the destination of the property is beyond the scale point.

With this exception do not despatch nor move freight in car loads without a card way-bill for each car, or freight in less than car loads without a road way-bill covering each article, the way-bill in both cases to be signed by an agent of the Company or his authorized representative.

2. The initials of cars should be entered on the card way-bill as per abbreviations on pages 19 to 49 of this book. The number should agree with the marks on the car. Do not despatch nor move cars if the card way-bill is not made out as above, nor on a card way-bill that has been altered in any way unless the authority for the change is plainly noted in ink on the back, over the signature of the Yard-Master making the change.

An exception to this rule will be made when the initials of the car on a card way-bill made out at a point on a foreign road agree with the marks on the car, even if they differ from the abbreviations given herein, but such errors must be reported by telegraph to the Superintendent.

Exceptions to this rule will also be made when a car is loaded with live stock or perishable freight, or is moving on a disk or a diamond sticker. Forward such cars without waiting for correction, and report the error by telegraph to the Superintendent.

If a car is found on a siding at which there is no agent, and its initials or number do not agree with the way-bill, do not move the car unless it is loaded with live stock or perishable freight, or carded with a disk or a diamond sticker, but report the error by telegraph to the Superintendent.

When the number of a car is changed in transit all the way-bills traveling with the car must be changed to correspond.

3. When a card way-bill is received for a "Co-operative Line" car, and the initials of the Line only are given, and not the initials of the name of the road, or *vice versa*, it may be allowed to go through to destination, thus: a "N. Y., N. H. & H., U. L." car should not be cut out and held for correction of way-bill if the initials "U. L." only or initials "N. Y., N. H. & H." only are given.

4. The authority for making any alteration on a card way-bill must come from the General Agent, Superintendent or this office. To alter a card way-bill, draw a

pen stroke through the original marks, and write the correction in ink above or below, taking care to leave the original marks so they can be easily read. On the back of the card give the authority for the change, and date and sign the notation. Trainmen must not make any alteration on a card way-bill.

5. When cotton, compressed in bales, has been on fire, there is always danger of its heating and taking fire again. In order that the delivering agent may take the necessary precaution to prevent damage to other property, the condition of such lading must be stated by the forwarding agent on the card and regular way-bills. When the fire occurs in transit, the notation must be made on the way-bill accompanying the freight by the yard master or conductor having the car in charge.

6. The conductor leaving property on a siding or platform or at a station at which there is no freight agent, must show over his signature on the card or regular way-bill the hour of delivery.

7. When a car is left at a station other than its proper destination, the agent should secure from the conductor the way-bill for such car; when left at a point at which there is no agent, the conductor should leave the way-bill at the next station or telegraph office and report to his Superintendent by wire.

8. When directed to forward an empty car free to a particular point, use a C. T. 212 card—a separate card for each car; fill out the coupon, detach it, and send it to me at Broad Street Station, Philadelphia. This card must not be used for loaded cars, nor for empty cars when a charge is made for the movement.

When the destination is a point on a connecting line, card the car only to the junction point with the connecting line, and show the final destination in addition for information only. The C. T. 212 card should be delivered to the agent or yard master of the connecting line with the car.

When a car can be loaded at some intermediate station in the direction of the point to which it is ordered, card it as above to that station, and put after the name of the station the words "To be loaded to" the desired point.

When a car moving on a C. T. 212 card is received, fill out the back of the form and send it to me at Broad Street Station, Philadelphia.

If a car is loaded, which moved on a C. T. 212 card, fill out the back of the form and send it to me as above.

9. When new cars on their own wheels make their first trip from your station or are received at your station from a connecting line on their first trip, they should be reported to this office. If they are moved on C. T. 212 cards, it will be sufficient to endorse the coupon "New Car." If they are moved in any other way advise this office by letter, giving initials, number and kind of each car, lading (if any) and destination, stating whether

cars are way-billed or not. A similar report of all empty cars should be made when a charge is made for the movement, whether moved from your station or received from a connecting line.

10. For the information of Conductors and Yardmen, the words "Perishable" or "Live Stock" will be written with ink in a conspicuous place on the back of the road way-bill for perishable freight or live stock in less than car loads, if it accompanies the car, or on the card way-bill for a car load of perishable freight or live stock, or for a solid car for one destination if it contains any perishable freight or live stock. (See Rule —, General Instructions for the Government of Freight Agents, dated —, 1895.)

11. Whenever it becomes necessary to break a seal on a car in transit, a record must be made showing the kind of seal, together with all numbers and letters (on face and back), and the car must be immediately resealed and a record kept of the resealing.

12. (a.) Acid, brine or other liquids, in packages, must not be loaded on top of, or near, other freight liable to be damaged by leakage.

(b.) Acid in carboys should be loaded in the centre of the car near the door, and the floor around the carboys should be stripped and the space within the strips covered with sawdust, so that in case of breakage of a carboy the acid will be absorbed or pass out of the car door without injuring other property.

13. Every car containing any explosive substance, whether in car loads or less than car loads, must be plainly marked on both sides and both ends with the card C. T. 81, reading "Powder, handle carefully."

Cars for carrying explosives must be first class in every respect, must be tight everywhere and have doors that can be closely shut, leaving no cracks for sparks to get in. When in full car loads the doors must be stripped.

Conductors must not move cars containing explosives unless the above instructions have been fully carried out, and such cars must be placed in the train as near the middle as possible.

14. *Yard Masters, Car Inspectors and Conductors of Freight Trains* are required to see that cars are not loaded beyond their capacity in dimensions or weight, and Car Inspectors particularly should watch the dimensions of lading.

C. T. 228 REPORTS.

15. Make out a report of every accident to any car which necessitates its being sent to shops, including passenger cars slightly damaged, if this prevents their use in regular service, giving point shown in this book at or near which accident occurred ; and of all cars found broken, even if it is not possible to locate the point or cause of accident.

This report should not include cars which are repaired by Car Inspectors outside of shops.

When a transfer of the lading or its seizure for Company's use is the result of the accident, report on C. T. 228 all particulars called for on C. T. 321 and 322, in regard to billing, etc.

C. T. 321 REPORTS.

16. Make out report in every case when freight is transferred from one car to another not reported on C. T. 228.

C. T. 322 REPORTS.

17. Make out report in every case when lading is taken for Company's use not reported on C. T. 228.

TO AGENTS AND OTHERS WHO REPORT ON C. T. 32.

18. Make out this report at the close of each day's business, and send a copy by first train to me at Broad Street Station, in an envelope provided for the purpose, and to such other persons as your Superintendent directs. Do not use these envelopes for other reports. Keep one copy on file for seven years.

19. Under the heading "Received" enter all the cars standing on all the sidings under your control, with date received, commencing with the oldest car. Enter also all cars which have arrived since date of last report, even if they have left your sidings. Mark those received loaded, "X," those received empty, "—". Give in column No. 7 the lading of car on arrival. When cars are on a siding which is included under a brace in this book, give under the heading "Sidings" the letter which is placed to the right of the name to designate on which particular siding under your control the car is located. If a car received loaded has been unloaded and has not been taken away when the report is made up, show it in column No. 8, giving the proper date. Enter each car daily without change until the day after it has left your sidings, when it may be dropped; on the day it leaves fill out the columns under the heading "Forwarded." In column 15 give full cause of refusal; or if held for orders, state by whose order, and when disposed of, state in what way.

20. If a car is forwarded with freight for more than one station, give under the heading "Final Destination" both the nearest and farthest points for which the car contains freight. Under the heading "Lading," columns 7 and 11, give the name of the lading in full. If made up of many different kinds, mark "Miscellaneous."

21. If the final destination, column 12, is a point the name of which is duplicated in this book, add the name of the division or railroad on which it is located; if on a connecting line, give in column 14 the name of the State and the junction point at which shipment will leave these lines.

22. If the shipment is forwarded via Union Line, Empire Line, or any other recognized Fast Freight Line, show in column 14 the name of the Line. In this case it will not be necessary to show the junction point at which it will leave these lines.

23. Under the heading "Number of Loading Classifications," column 13, show the number of the district minimum or regardless of quantity classification as given in General Notice No. 136, or extract therefrom, as it applies to your station.

Classification number is to be omitted and this column left blank only in the case of cars forwarded with car-load freight for one consignee to any destination.

The number of the district minimum classification should be given for each car of L. C. L. freight forwarded (with the specified minimum tonnage or over) for one or more consignees, to the point or points covered by the carding or destination of such district minimum classification.

The number of the regardless of quantity classification should be given for each car of L. C. L. freight forwarded (unlimited as to tonnage) for one or more consignees, to the point or points covered by the carding or destination of such regardless of quantity classification.

In reporting cars of L. C. L. freight forwarded to a point or points not covered by the carding or destination of the district minimum or regardless of quantity classifications for your station, add an X mark in this column.

24. Use enough sheets to include all the cars, number them, pin them together, and sign the last one. When there are no cars to report, either on sidings at your station or on sidings under your control but having different numbers from your station, send a blank, dated and signed, and write across the face "No cars to report."

25. Do not hold an empty car more than twenty-four hours without permission from your superintendent. If you have freight for foreign roads state under the head of "Remarks" the destination and route of the shipments and the number and ownership of the foreign cars required. If suitable foreign cars are not supplied the next day load the freight in home cars.

REPORTS TO THE CAR RECORD OFFICE.

26. Blanks for making reports to the Car Record Office will be furnished by your Superintendent, on whom requisitions should be made.

27. Every train should be reported to this office by the Conductor, even if it should consist only of an empty engine or of an engine and cabin, except that helping engines returning empty should not be reported.

In the case of empty engines, the word "empty" should be written across the face of the report.

28. For initials of cars use the abbreviations given on pages 19 to 49, inclusive. For cars whose initials are not given, report the full name marked on the car, using two or more spaces if necessary. For stations and sidings use the letters and numbers given in the list of "Stations and Sidings." If a station or siding is not given in this list, report the full name.

When several stations or sidings are included in this book, in a brace, and have but one number, that number should be used for all the points included in that brace. Movements made between points covered by the same brace should not be reported.

29. The letters placed at the right of the names of sidings covered by a brace are only to be used on C. T.

32. Conductors must not use these letters on their car reports to the Car Record Office.

30. All of the passenger equipment of the lines east of Pittsburg and Erie is marked "Pennsylvania," and numbered as shown on page 198 of this book.

The passenger equipment of the P., W. & B. R. R., N. C. R., W. J. R. R. and C. & A. R. R., in addition to being marked "Pennsylvania," is marked in smaller letters with the initials of the road to which it belongs. These small letters will appear on the coaches, combined, parlor and dining cars at the ends of the letter boards, and under the number on the sides of the baggage, express and postal cars.

In making reports to this office all passenger equipment marked "Pennsylvania" should be reported as P. R. R. without regard to the small letters.

31. Use C. T. 1027, old form C. R. 33, for all trains in which more freight than passenger cars are hauled; use C. T. 1023, old form C. R. 29, for through passenger trains, and C. T. 1024, old form C. R. 30, for local passenger trains on which more passenger than freight cars are hauled.

32. Date your Car Report according to actual time of starting without reference to the day your train is scheduled to leave. When train leaves starting-point exactly at midnight, give the time of leaving as 12.01 A. M., and date your report accordingly. Give the name and not the number of the month.

33. Give actual date and actual time leaving starting-point and arriving at destination, and actual date and actual arriving and leaving time at all stations and sidings where cars are picked up or cut off, where engines are changed and helpers taken on or dropped, noting A. M. or P. M., as the case may be. Enter on your report the route your train takes in case it is diverted from its usual route, or if there is more than one route by which the trip can be made.

When there is an accident to your train, note the fact on the back of report. Mark all cars which are badly damaged by putting a circle in pencil around the small

number printed in the initials column on C. T. 1023, old form C. R. 29, 1027, old form C. R. 32, 1028, old form C. R. 33, 1029, old form C. R. 34, and 1031, old form C. R. 35, and by putting a circle around the number of the car on C. T. 1024, old form C. R. 30.

34. Give the full name of the Division or Railroad over which the train moves, and the direction in which it is bound, as shown on time table.

35. Give the section number, train number, and name or kind of train, including the Working Book name. Give the numbers of the stations or sidings from which the train starts and to which it moves. If the schedule is changed during the trip, note it on report so as to show what schedules and sections were represented, and from and to what points the changes, if any, were in effect.

36. Give the initials and number of each engine used during the trip, using the number shown on the sand box or cab. The engine hauling the train should be given first, pullers next, and pushers in order afterwards. The number of the station or siding at which each engine was coupled to the train and was detached should be given.

37. Beginning at the engine, take the initials, kind, number of wheels, and number of each car as it stands in the train, showing the cabin, or car in use as a cabin, as it stands in the train at the beginning of the trip. On C. T. 1024, old form C. R. 30, the order of cars in train need not be observed. Initials or numbers of cars must not be copied from way-bills or the memoranda of other persons. Cars having no initials, name or number should be so reported. Where palace cars have names as well as numbers, they should be reported by the names. When wrecked cars are moved loaded on other cars, a note should be made to that effect, giving initials and numbers of the wrecked cars. The numbers of two cars must not be entered on same line. When there are two or more cars of the same initials next to each other in the train, ditto marks should be used for the initials after the first. When two or more cars with the same number of wheels follow each other in the train, ditto marks should be used for the number of wheels after the first.

38. Place this mark, X, in column immediately after the number of each loaded car, and this mark, —, after the number of each empty car, as the car may be at beginning of the trip. Should a car in a freight train be loaded or unloaded during the trip, its initials and number should be entered once for each loaded and once for each empty movement, and the loaded and empty movements should be entered separately as if each movement was made by a different car. In a passenger train, if a car is used during a part of the trip, it should be reported as loaded from the starting-point. All passenger, passenger-baggage, Pullman or private cars that are locked or in charge

of attendants or porters and not used by passengers should be reported as empty. Do not use the ditto mark in the "X" or "—" column, but place the "X" or "—" mark after each car number. At the bottom of the report give the number of loaded and the number of empty cars moved during the trip, counting each four-wheel car as one car and the cabin as an empty car, and counting each separate movement as a car when the same car makes both loaded and empty movements. New cars on their way to the home road from the shops where built, moving on card way-bills for loaded cars, should be counted as empty, unless the cars contain lading.

39. Report each dead engine and each tender not in service as a loaded car, if on its own wheels, giving the initials and number, and report them in the order in which they stand in the train, marking them "Engine" or "Tender." If loaded on a car they should be considered as any other lading, and their initials and number should not be given.

40. The kind of car must be designated as follows :

Passenger Equipment.	Freight Equipment.	M. of Way Equipment.
PL. Parlor.	R. Refrigerator.	M. C. Cabin.
DN. Dining.	B. Box.	T. B. Tool and Block.
SL. Sleeper.	S. Stock and Rack.	S. P. Snow Plow.
OB. Observation.	G. Gondola.	DK. Derrick.
P. Passenger.	H. Hopper Gondola.	S. W. Stone and Wood
2 P. 2d Class Pass.	F. Flat.	Truck.
V. Private.	K. Coke.	G. D. Gravel Dump.
P. B. Pass.-Bagg.	D. Coal Dump.	
PL. B. Parlor-Bagg.	L. Lime.	
BG. Baggage.	T. Tank.	
B. M. Bagg.-Mail.	C. Cabin.	
PO. Postal.		
P. S. Postal Storage.		
Exp. Express.		
B. E. Box Express.		

41. Report baggage, express and baggage-express as baggage or express cars according to the service in which they are used. Cars used for both baggage and express matter should be reported as baggage.

42. Show plainly the number of the station or siding to or from which each car is moved. When two or more cars next to each other in the train are moved to or from the same point, ditto marks should be used for the station-number of all but the first car. When cars are taken on or left off at a new siding not given in this book, or to which a number has not been assigned, report the full name of the siding.

43. Numbers of cars or of stations and sidings with a letter or cipher prefixed or affixed, thus,—“D35842,” “1354A” or “014” must be so reported, considering the prefix or affix as part of the number; but as stated in Rule 29, the letter placed to the right of the *name of the siding* in this book should not be used by conductors on their car reports to the Car Record Office.

44. Make the letters and figures plain, so that there can be no doubt as to what they are intended for. Observe the dotted lines in the columns headed "No. of Car" and keep the right-hand column full, entering no more than one figure in a square.

45. The back of the report must not be used for car numbers until the face of the report is filled up, and the numbers of cars must not be entered below the double line at bottom of blank. When one blank will not hold the numbers of all the cars in train, use two full blanks (not part of a blank), and fasten them together so that they will reach the Car Record Office as one report. Head and sign the second blank the same as the first, and mark it "Continued," and show the total number of cars in the train, as per Rule 38, in proper place on the main portion as well as on the continued portion of the reports.

46. Make out your report during the trip, and do not copy it after the trip is made from memoranda or from the Duplicate Report Book, C. T. 1026, old form C. R. 75. The original report as made up from the train must be forwarded to the Car Record Office.

47. Sign your report, keep it clean, and at end of trip deposit it without delay at the place designated by your Superintendent. Before depositing, carefully examine it to see that it is correct in every particular.

TO FREIGHT CONDUCTORS.

48. When articles liable to injury by falling are held in place by other freight, the conductor removing the supporting freight must see that the property remaining in the car is in position for safe carriage to destination.

49. Report on C. T. 1027, old form C. R. 33, making one report for each trip, the initials and number of each car as it stands in the train, beginning at the engine, as per Rule 38. On the back of the report, give the date as well as the time at each station and siding, as instructed by Rule 33.

50. Conductors reporting on C. T. 1028, old form C. R. 34, and C. T. 1029, old form C. R. 35, need not report their trains on C. T. 1027, old form C. R. 33. First Division's Conductors will fill in car numbers. Second Division's Conductors will add numbers not shown. First Division's Conductors will use column provided for cars they move. Second Division's Conductors will use column provided for cars they move, and write the words "Not Moved" opposite numbers of cars they do not move.

51. Keep an exact copy of your car reports in the Duplicate Report Book, C. T. 1026, old form C. R. 75. When a book is filled up, send it to your Superintendent.

Where copying pencils are supplied, conductors need not keep a copy of their reports.

FOR NEW YORK, PHILADELPHIA, PITTSBURG AND
MONONGAHELA DIVISION FREIGHT CONDUCTORS
ONLY.

52. Conductors will show on their Car Reports, C. T. 1027, old form C. R. 33, the lading hauled in cars loaded with commodities given in list below, using the proper abbreviation in the loaded column on their reports in place of the "X." This "X" to be used only when the car is loaded with some article not specified.

ABBREVIATION.	COMMODITY.
A.....	Anthracite Coal.
B.....	Bituminous Coal.
K.....	Coke.
X.....	Not Specified.

TO PASSENGER CONDUCTORS.

53. Report on C. T. 1024, old form C. R. 30, local passenger trains showing each and every trip in the order in which it is made, so that at the close of the day's work the report will give a complete record of all movements made. Include the whole day's work, even if it is not finished until after midnight, and date the report with the day on which the first trip begins.

54. Report on C. T. 1023, old form C. R. 29, through passenger trains, making one report for each trip, showing the initials and number of each car as it stands in the train, beginning at the engine, as per Rule 37.

When the cars making up your train have been delayed, and are not running upon their regular schedule, show the section and train number on which they are running, but give the name of train exactly as if it was on time. Thus, if New York & Chicago Limited (train 2) is delayed and is running as 3d section of train 8, the report should show "3d 8 New York & Chicago Limited."

55. Place the letters "Es," instead of the mark "X," in column immediately after the number of each loaded car on blanks C. T. 1023, old form C. R. 29, and C. T. 1024, old form C. R. 30, to designate all baggage, baggage-express, express or box cars containing solid car loads of express matter locked or sealed. The mark "X" is to be used to designate all other loaded cars as heretofore.

TO CONDUCTORS OF MAINTENANCE OF WAY TRAINS.

56. Report each day on C. T. 1031, old form C. R. 32, the movement of each and every car, including maintenance of way cars as well as conducting transportation cars, whether assigned to and in regular use by the Maintenance of Way Department or otherwise, showing the point from and to which the cars are moved on each trip. In case of maintenance of way equipment and conducting transportation cars regularly assigned to the Maintenance of Way Department, the extreme points

between which the cars are moved during the day should be given.

When there are no cars to report, send a blank, dated and signed, and write across the face of it "No cars to report."

TO AGENTS.

57. Observe Rules 28, 30, 37, 38, 39, 40, 43 and 44, as far as they apply to your reports. Enter the name of station and date of report on back as well as on face of reports C. T. 1013, old form C. R. 2.

58. In making out reports C. T. 1013, 1016 A, 1016 B, 1016 C, 1017 A, 1017 B and 1017 C, old forms C. R. 2, 5 and 6, give the final destination of all cars. When cars are not billed through do not give the point to which they are billed, but give the final destination as above. On these reports the number of the station or siding as given in this book may be used to show destination of cars for points on these lines. When there are no cars to report, send a blank, dated and signed, and write across the face "No cars to report."

Under the heading "Number of Loading Classifications" on C. T. 1013, old form C. R. 2, show the number of the district minimum or regardless of quantity classifications as given in General Notice No. 136, or extract therefrom, as it applies to your station.

Classification number is to be omitted and this column left blank only in the case of cars forwarded with car-load freight for one consignee to any destination.

The number of the district minimum classification should be given for each car of L. C. L. freight forwarded (with the specified minimum tonnage or over) for one or more consignees, to the point or points covered by the carding or destination of such district minimum classification.

The number of the regardless of quantity classification should be given for each car of L. C. L. freight forwarded (unlimited as to tonnage) for one or more consignees, to the point or points covered by the carding or destination of such regardless of quantity classification.

In reporting cars of L. C. L. freight forwarded to a point or points not covered by the carding or destination of the district minimum or regardless of quantity classifications for your station, add an X mark in this column.

59. In making out report C. T. 1098, old form C. R. 85, include all full car loads billed, weighed or re-consigned from your station or scale. When your station is located at the junction with a foreign railroad, include all cars received from that road. Show the full route in all cases.

When there are no cars to report, send a blank, dated and signed, and write across the face "No cars to report."

TO AGENTS AND OTHERS WHO REPORT ON C. T. 327.

60. Report C. T. 327 must be made out at the close of each day's business and sent by first train to me at Broad Street Station.

Under the heading "Cars Forwarded Light-Loaded, under R. Q. Classifications," show the R. Q. Classification number given in General Notice No. 136, and weight of lading of each car containing less than 5000 pounds forwarded under these classifications.

Under the heading "Other L. C. L. Cars Forwarded Light-Loaded" show initials and number of each car forwarded containing less than 5000 pounds for which your station has no authorized classification, with weight of lading, destination and reason for light-loading.

Under the heading "Other L. C. L. Cars Received Light-Loaded" show initials and number of each car received containing less than 5000 pounds, with lading and weight of same, the point from which car is carded, or last transfer point.

The figure of 5000 pounds given above is applicable to cars moving between points on the Pennsylvania Railroad System of Lines east of Pittsburg and Erie. When cars move between such points and points on foreign railroads and on the Pennsylvania Lines west of Pittsburg and Erie, they should be reported if they contain less than 6000 pounds.

TO AGENTS AND YARD-MASTERS AT POINTS OF JUNCTION WITH FOREIGN ROADS WHO REPORT ON C. T. 1016 A, 1016 B, 1016 C, 1017 A, 1017 B and 1017 C, OLD FORMS C. R. 5 AND 6.

61. Every car interchanged with a foreign railroad should be reported to this office by the Agent or Yard-Master in charge of the interchange. These reports should always close at midnight, and should include both passenger and freight equipment. Observe Rules 28, 30, 37, 38, 39, 40, 43 and 44, as far as they apply to your reports. C. T. 1016 A, 1016 B, 1016 C, 1017 A, 1017 B and 1017 C, old forms C. R. 5 and 6, should show the final destination of all loaded cars delivered to and received from foreign roads. The final destination should be given even if the car is not billed through. When empty cars are carded to a given point, it should be shown under head of final destination.

When there are no cars to report, send a blank, dated and signed, and write across the face "No cars to report."

TO SHOP FOREMEN.

62. Report daily on C. T. 1022, old form C. R. 13, the initials and numbers of cars repaired from midnight to midnight, which have been received in shop and on shop sidings and turned out for service. The cars repaired in trains should not be reported. Give the initials and numbers of all cars torn up or built, including all cars damaged on the road and torn up at shops. When marks on cars are changed give full explanation.

When a damaged car is loaded on another car and sent to home shops, the initials and number of the damaged car should be shown on report and a notation made to this effect.

When there are no cars to report send a blank, dated and signed, and write across the face "No cars to report."

63. Report at the close of each month, on C. T. 1112, old form C. R. 23, the initials and numbers of all maintenance of way equipment in regular use at shops and in shops for repairs, showing the date received in shops and the date turned out of shops, and stating in each case whether the car was in shops for repairs or for regular use. Also, report on C. T. 1112, old form C. R. 23, the initials and numbers of all conducting transportation cars in regular use at shops, showing the dates the cars were received from and the date they were returned to C. T. service; and state which of the cars on hand at the close of the month are not wanted, and which are unfit for service.

When there are no cars to report send a blank, dated and signed, and write across the face "No cars to report."

64. All cars from shops should be sent to the nearest scales for re-light-weighing, if repairs likely to change their light-weight have been made.

TO SUPERVISORS.

65. Report at the close of each month on C. T. 1112, old form C. R. 23, the initials and numbers of maintenance of way equipment and of all other cars in regular use by you. Report the kind and number of each car received or sent away during the month, with date and point from which they were received and to which they were sent. Show under the head of "Remarks" the initials and numbers of cars on hand and not wanted or unfit for service. If there are no cars to report, send a blank, dated and signed, and write across the face "No cars to report."

66. Report opposite each car number the number of working days conducting transportation cars and maintenance of way stone and wood trucks and eight-wheel gravel dumps are used in construction or maintenance of way service. If used jointly, show separately the number of working days chargeable to each department.

When cars are not used, give the number of days idle.

LIGHT-WEIGHING CARS AND REPORTS OF LIGHT WEIGHT.

TO WEIGHMASTERS.

67. P. R. R., N. C. R., P., W. & B. R. R., C. & A. R. R., W. J. R. R., P. R. R. Empire Line cars, and individual cars at home on these lines, should be weighed at the scales

of any of the lines that are light-weighting cars, at intervals of one year, and new cars should be weighed at the end of six months after date of their first weighing. All cars should be light-weighted immediately after coming from shops, if repairs likely to change their light-weight have been made.

68. See that the scales are in proper order and weigh correctly, that cars are clean and dry when weighed, that the light-weight is carefully taken, with car stopped on the scales, and that no more than one car is weighed at a time.

69. In weighing loaded stock cars that have been light-weighted with double deck in, should the double deck be out of car, deduct 1200 pounds from the light-weight of cars of less than 40,000 pounds capacity, and 1500 pounds from cars of greater capacity, that being the weight of material in double deck, and add 1200 and 1500 pounds respectively to light-weight of single deck cars that have had double decks put in after being weighed as single deck cars.

70. Report weekly on C. T. 1101, old form C. R. 20, the initials and numbers of all cars light-weighted, the light-weight of the car, and date weighed. Show the cars light-weighted up to midnight of Saturday of each week, and forward the reports to the Car Record Office on Monday, keeping a copy. If no cars have been light-weighted, send a blank, dated and signed, and write across the face "No cars to report."

71. Report to the Car Record Office on C. T. 1103, old form C. R. 22, the initials, numbers and final destination of the above-named cars passing over your scales that do not bear light-weight marks or that are improperly marked, or that have not been light-weighted within twelve months, so that the car may be traced, light-weighted and marked correctly.

72. When reporting the light-weight of stock cars containing double decks, place the letters "D. D." immediately over the weight, on the reports to the Car Record Office and Car Marker.

73. After light-weighting cars, hand to the Car Marker a memorandum made up on C. T. 1102, old form C. R. 21, showing the light-weight to be marked on each car.

74. Observe Rule 59 in regard to preparing C. T. 1098, old form C. R. 85.

TO CAR MARKERS.

75. Car Markers must erase the old light-weight marks and stencil cars as follows: On both sides of car, the place, weight, and date of weighing, thus,—“P20, Wt. 18,000, 1st 95.” Box, stock, gondola, and coal cars with fixed ends will be marked on ends in addition, thus,—“Wt. 18,000.” Gondola and coal cars without fixed ends will be marked only on the sides and in the centre of the car, to avoid the marks being covered by the standards. On stock cars with double deck in, the letters “D. D.”

must be placed after the date on sides, thus,—“P20, Wt. 19,000, 1st 95, D. D.,” and after the weight on ends, thus,—“Wt. 19,000, D. D.” When a new car is first weighed, the word “New” must be placed after the marks as given above, and at the end of six months after date of weighing such new car, it must be re-weighed and the correct weight marked, erasing the word “New.”

76. Box cars of these lines will be marked with the initials and number on the top plate on the inside of the car to the left of the doorway to correspond with the initials and number on the outside of the car. When any change in the initials or number is made on the outside of the car, care should be taken to make the same change on the inside of the car.

77. Car Markers must notify the weighmaster promptly when cars are not marked as directed, that he may notify the Car Record Office to have the car traced and properly marked at another point.

J. B. HUTCHINSON,

Gen'l Sup't of Transportation.

Approved:

S. M. PREVOST,

General Manager.

PHILADELPHIA, PA.,

July 1st, 1895.
