INSTRUCTIONS

These instructions are intended chiefly for the guidance of persons making reports to this office, and must not be used by Agents in lieu of the Freight Distance Table in billing freight.

Blanks for making reports to this office, and envelopes for enclosing the same, will be furnished by your Superintendent.

PASSENGER AND FREIGHT CONDUCTORS

1 Every train should be reported to this office by the Conductor. If the train should consist only of an empty engine, or of an engine and cabin, the word "empty" should be written across the face of the report. Helping engines returning empty should not be reported.

2 Date your Car Report according to actual time of starting without reference to the time your train is scheduled to leave. When train leaves starting-point exactly at midnight, give the time of leaving as 12.01 A. M., and date your report accordingly.

3 Give actual date and actual time leaving starting-point and arriving at destination, and actual date and actual arriving and leaving time at all stations and sidings where cars are picked up or cut off, where engines are changed and helpers taken on or dropped, noting A. M. or P. M., as the case may be. Enter on your report the route your train takes in case it is diverted from its usual route, or if there is more than one route by which the trip can be made.

4 Use C. T. 1033 for all trains in which more freight than passenger cars are hauled; use C. T. 1023 for through passenger trains, and C. T. 1024 for local passenger trains on which more passenger than freight cars are hauled.

5 In case of accident to your train, note the fact on the back of report. Mark all cars which are badly damaged by putting a circle in pencil around the small number printed in the initials column on C. T. 1023, 1031 and 1033, and by putting a circle around the number of the car on C. T. 1024.

6 Give the full name of the Division or Railroad over which the train moves, and the direction in which it is bound, as shown on time table.

7 Give the section number, train number, and name or kind of train. Give the numbers of the stations or sidings from which the train starts and to which it moves. If the schedule is changed during the trip, note it on report so as to show what schedules and sections were represented, and from and to what points the changes, if any, were in effect.

8 Give the initials and number of each engine used during the trip. The engine hauling the train should be given first, pullers next, and pushers in order afterwards. The number of the station or siding at which each engine was coupled to the train and was detached should be given.

9 When reporting the initials of cars the abbreviations given on pages 23 to 49, inclusive, should be used. When the initials of a car are not given in the list of abbreviations, report the full name marked on the car.

When several stations or sidings are included in this book, in a brace, and have but one abbreviation, that abbreviation should be used for all the points included in that brace. Movements made between points covered by the same brace should not be reported. If a station or siding is not given in this book, report the full name.

10 Beginning at the engine, take the initials, kind, and number of each car as it stands in the train, showing the cabin, or car in use as a cabin, as it stands in the train at the beginning of the trip. On C. T. 1024 the order of cars in train need not be observed. Initials or numbers of cars must not be copied from way-bills or the memoranda of other persons. Cars having no initials, name or number should be so reported. Sleeping, parlor or dining cars having names as well as numbers should be reported by the names. When wrecked cars are moved loaded on other cars, a note should be made to that effect, giving initials and numbers of the wrecked cars. When there are two or more cars of the same initials next to each other in the train, ditto marks should be used for the initials after the first.

11 Place this mark, X, in column immediately after the number of each loaded car, and this mark, —, after the number of each empty car, as the car may be at beginning of the trip. Do not use the ditto mark in the "X" or "—" column, but place the "X" or "—" mark after each car number. Should a car in a freight train be loaded or unloaded during the trip, its initials and number should be entered once for each loaded and once for each empty movement, and the loaded and empty movements should be entered separately as if each movement was made by a different car. In a passenger train, if a car is used during a part of the trip, it should be reported as loaded from the starting-point. All passenger, passenger-baggage, sleeping, parlor, dining or private cars that are locked or in charge of attendants or porters and not used by passengers should be reported as empty. At the bottom of the report give the number of loaded and the number of empty cars moved during the trip, counting the cabin as an empty car, and counting each separate movement as a car when the same car makes both loaded and empty movements. New cars on their way to the home road from the shops where built, moving on card way-bills for loaded cars, should be counted as empty, unless the cars contain lading.

12 Report each dead engine and each tender not in service as a loaded car, if on its own wheels, giving the initials and number, and report them in the order in which they stand in the train, marking them "Engine" or "Tender." If loaded on a car they should be considered as any other lading, and their initials and number should not be given.

13 The kind of car must be designated as follows :

Passenger Equipment	Freight Equipment	M. of Way Equipment
PL. Parlor	R. Refrigerator	M. C. Cabin
DN. Dining	B. Box	T. B. Tool and Block
SL. Sleeper	S. Stock and Rack	S. P. Snow Plow
OB. Observation	G. Gondola	DK. Derrick
P. Passenger	G. R. Steel Gondola	S. W. Stone and Wood
2 P. 2d Class Pass.	H. Hopper Gondola	Truck
V. Private	S. H. Steel Hopper	G. D. Gravel Dump
P. B. Pass.-Bagg.	F. Flat	
PL. B. Parlor-Bagg.	K. Coke	
BG. Baggage	D. Coal Dump	
B. M. Bagg.-Mail	L. Lime	
PO. Postal	T. Tank	
P. S. Postal Storage	C. Cabin	
Exp. Express		
B. E. Box Express		
H. C. Horse-Carriage		

14 Report baggage, express and baggage-express as baggage or express cars according to the service in which they are used. Cars used for both baggage and express matter should be reported as baggage.

15 Show plainly the number of the station or siding to or from which each car is moved. When two or more cars next to each other in the train are moved to or from the same point, ditto marks should be used for the station-number of all but the first car.

16 Numbers of cars or of stations and sidings with a letter or cipher prefixed or affixed, thus,—“D35842,” “354A” or “or14” must be so reported, considering the prefix or affix as part of the number.

17 Make the letters and figures plain, so that there can be no doubt as to what they are intended for. Observe the dotted lines in the columns headed “No. of Car” and keep the right-hand column full, entering no more than one figure in a square.

18 When one blank will not hold the numbers of all the cars in train, use two full blanks (not part of a blank), and fasten them together so that they will reach the Car Record Office as one report. Head and sign the second blank the same as the first, and mark it “Continued,” and show the total number of cars in the train, as per Rule 11.

19 Make out your report during the trip, and do not copy it after the trip is made from memoranda or from

the Duplicate Report Book, C. T. 1026. The original report as made up from the train must be forwarded to the Car Record Office.

20 Report on C. T. 1033, making one report for each trip, the initials and number of each car as it stands in the train, beginning at the engine, as per Rule 10. On the back of the report, give the date as well as the time at each station and siding, as instructed by Rule 2.

21 Keep an exact copy of your car reports in the Duplicate Report Book, C. T. 1026. When a book is filled up, send it to your Superintendent.

22 A special form of card provided for the purpose and reading

“To.....Scales.

Memorandum to agent for billing,”

will be used by shippers, when authorized by the Auditor to forward car-load freight to the first scale when the destination of the property is beyond the scale point.

With this exception, do not move freight in car loads without a card way-bill for each car, nor in less than car loads without a road way-bill covering each article.

In the space for signature the revenue and card way-bills must be stamped with the office stamp of the billing agent, or signed by the agent or his authorized representative.

Card and revenue way-bills must be surrendered to agent at the place of delivery, or to agent at next station beyond if freight is delivered at a place where there is no freight agent.

When two or more cars are required to carry lading on account of its length, the initials and numbers of all the cars, including the idlers, should be shown on one card way-bill.

23 The initials of the car on the card way-bill should conform to the abbreviations on pages 23 to 49 of this book. The number on the card way-bill must agree with the number on the car. Do not despatch nor move cars if the card way-bill is not made out as above, nor on a card way-bill that has been altered in any way unless the authority for the change is plainly noted in ink on the back, over the signature of the Yard-Master making the change. (Conductors, Yard-Masters and all other interested persons must examine the backs of all card way-bills.)

An exception to this rule will be made when the initials of the car on a card way-bill made out at a point on a foreign road agree with the marks on the car.

Exceptions to this rule will also be made when a car is loaded with live stock or perishable freight, or is moving on a disk or a diamond sticker. Forward such cars without waiting for correction, and report the error by telegraph to the Superintendent.

Conductors must not move cars of Coal except when accompanied by special card way-bills marked COAL in large letters.

If a car is found on a siding at which there is no agent, and its initials or number do not agree with the card way-bill, do not move the car unless it is loaded with live stock or perishable freight, or carded with a disk or a diamond sticker, but report the error by telegraph to the Superintendent. Cars containing "ORDER FREIGHT" should not be placed for delivery without authority of the Agent at the station to which the property is billed.

24 When a card way-bill is received for a Co-operative Line car, and the initials of the Line only are given, and not the initials of the name of the road, or *vice versa*, the car may be allowed to go through to destination, thus : a Pennsylvania R. R., Union Line, car should not be cut out and held for correction of card way-bill if the initials "U. L." only or abbreviation "P. R. R." only is given.

25 Report on C. T. 1024 local passenger trains, showing each and every trip in the order in which it is made, so that at the close of the day's work the report will give a complete record of all movements made. Include the whole day's work, even if it is not finished until after midnight, and date the report with the day on which the first trip begins.

26 Report on C. T. 1023 through passenger trains, making one report for each trip, showing the initials and number of each car as it stands in the train, beginning at the engine, as per Rule 10.

When your train has been delayed, and is not running on its regular schedule, show the section and train number on which it is running, but give the name of train exactly as if it were on time. Thus, if The Pennsylvania Limited (train 2) is delayed and is running as 3d section of train 8, the report should show "3d 8 The Pennsylvania Limited."

27 Report each day on C. T. 1031 the movement of each and every car, including maintenance of way cars as well as conducting transportation cars, whether assigned to and in regular use by the Maintenance of Way Department or otherwise, showing the point from and to which the cars are moved on each trip. In case of maintenance of way equipment and conducting transportation cars regularly assigned to the Maintenance of Way Department, the extreme points between which the cars are moved during the day should be given.

28 Freight Conductors on New York, Philadelphia, Pittsburgh and Monongahela Divisions will show on their Car Reports, C. T. 1033, the lading hauled in cars loaded with commodities given in list below, using the proper abbreviation in the loaded column on their reports in place of the "X."

This "X" to be used only when the car is loaded with some article not specified.

ABBREVIATION	COMMODITY
A.....	Anthracite Coal
B.....	Bituminous Coal
K.....	Coke
X.....	Not Specified

29. Sign your report, keep it clean, and at end of trip deposit it without delay at the place designated by your Superintendent. Before depositing, carefully examine it to see that it is correct in every particular.

Reports should be forwarded to Car Record Office by first passenger train after arrival at destination.

TO AGENTS, YARD-MASTERS AND OTHERS MAKING REPORTS TO THIS OFFICE

C. T. 1016 A, 1016 B, 1017 A and 1017 B,

REPORTS

30 Every car interchanged with a foreign railroad must be reported to this office by the Agent or Yard-Master in charge of the interchange. These reports should always close at midnight, and should include both passenger and freight equipment. Observe Rules 9, 10, 11, 12, 13, 16 and 17, as far as they apply to your reports. C. T. 1016 A, 1016 B, 1017 A and 1017 B should show the final destination of all loaded cars delivered to and received from foreign roads. If the final destination is a point the name of which is duplicated in this book, add the name of division or railroad on which it is located; if on a connecting line give the name of the State. The final destination should be given even if the car is not billed through. On these reports the number of the station or siding as given in this book may be used to show the destination of a car, if for a point on these lines. When empty cars are carded to a given point, it should be shown under head of final destination.

31 Agents or Yard-Masters at junction points with foreign roads who do not use the Interchange Slip, C. T. 1018, should submit a copy of their C. T. 1016 A, 1016 B, 1017 A or 1017 B reports to the Agent or representative of the connecting line for checking and to certify to their correctness, and should receive the interchange reports of the connecting line and perform a like service. The original report must not be delayed, but the Agent or Yard-Master should submit a copy for checking and notify this office of any errors or corrections on Form C. T. 1095.

When there are no cars to report, send a blank, dated and signed, and write across the face "No cars to report."

C. T. 1018, INTERCHANGE SLIP

32 Agents who use C. T. 1018, Interchange Slip, should make one report and its carbon copy for each cut of cars delivered to a connecting road.

Deliveries to different lines not to be included on same slip.

The report and its copy to be made before leaving the yards of this Company, and signed by its proper representative, leaving vacant the time of delivery, which will be filled in on reaching the delivery tracks of the connecting road, and the signature of the representative authorized to sign for that road obtained to the duplicate slips, one of which will be left with the connecting road, and the other returned to the Agent of the Pennsylvania R. R. Co.

These slips must be preserved for production as evidence if accuracy should be subsequently disputed.

Agents or other duly authorized representatives holding certified C. T. 1018 reports need only sign their own names to the daily C. T. 1016 A, C. T. 1016 B, C. T. 1017 A and C. T. 1017 B reports to the Car Record Office.

TO AGENTS AND OTHERS WHO REPORT ON C. T. 32

33 Make out this report at the close of each day's business, and send the original by first train to the Car Record Office, Broad Street Station, in an envelope (C. T. 1116) provided for the purpose, and to such other persons as your Superintendent directs. Do not use these envelopes for other reports.

34 Under the heading "Received" report all the cars standing on all the sidings under your control, with date received, commencing with the oldest car. Enter also all cars which have arrived since date of last report, even if they have left your sidings. If a car received loaded has been unloaded and has not been taken away when the report is made up, show the date received in column 5 and the date unloaded in column 8. Continue to enter all cars on your report daily until they leave your sidings; on the date a car leaves, fill out the columns under heading "Forwarded," giving the date forwarded, etc. In column 17 give cause of delay in detail.

35 If a car is forwarded with freight for more than one station, give under the heading "Final Destination" both the nearest and farthest points for which the car contains freight. Under the heading "Lading," columns 7 and 11, give the name of the lading in full. If made up of many different kinds, mark "Miscellaneous."

36 If the final destination is a point the name of which is duplicated in this book, add the name of the division or railroad on which it is located.

37 Use enough sheets to include all the cars, number them, pin them together, and sign the last one. When there are no cars to report, either on sidings at your station or on sidings under your control but having different numbers from your station, send a blank, dated and signed, and write across the face "No cars to report."

38 Do not hold an empty car more than twenty-four hours without permission from your Superintendent.

TO SHOP FOREMEN, MASTER MECHANICS, SUPERVISORS, ASSISTANT ENGINEERS AND ALL OTHERS WHO REPORT ON C. T. 195

39 Make out this report at the close of each day's business and send the original by first train to the Car Record Office, Broad Street Station, in an envelope (C. T. 1116) provided for that purpose, and to such other persons as your Superintendent directs.

40 This report should show all cars except Maintenance of Way cars in Maintenance of Way service on hand loaded with Company material, except Company coal, with date received, and the cars released on the day on which the report is made out. If the remaining cars show unusual delay, the cause of delay should be shown in column provided for that purpose.

C. T. 1039, REPORT OF CARS SWITCHED

41 This report must be made in duplicate and both copies forwarded to the Car Record Office at the close of each month after having been certified to by the Agent or representative of the line for which the switching was performed.

It must contain the initials and numbers of cars and information called for in each column heading for all cars switched under per-diem rules.

LIGHT-WEIGHING CARS AND REPORTS OF LIGHT WEIGHT

TO WEIGHMASTERS

42 Cars of the following lines :

P. R. R.	T., W. V. & O. R. R.
N. C. R.	Penna. Co.
P., B. & W. R. R.	Union Line, Penna. Co.
W. J. & S. R. R.	C. & Marietta R. R.
P. R. R., Empire Line	P., C., C. & St. L. Ry.
N. C. R., Canada Southern Line	C. & M. V. R. R.
N. C. R., Midland Line.	C. V. R. R.
P., F. W. & C. Ry.	N. Y., P. & N. R. R.
C. & P. R. R.	A. V. Ry.
E. & P. R. R.	W. N. Y. & P. Ry.
P., Y. & A. R. R.	P. & N. W. R. R.

and individual cars at home on these lines should be light-weighed on any of the scales of any of these lines that are equipped for light-weighing cars, as follows :

First. New cars must be stenciled when built with actual light-weight and date of weighing, and shall be re-weighed and re-stenciled in both second and third years thereafter, except cars composed entirely of steel, which should not be weighed after first light-weighing, unless repairs have been made which would materially affect their light-weight.

Second. Any car receiving repairs of such a nature as to make a change in weight of car must be weighed and stenciled.

For example, a car built in 1905 should be light-weighted when turned out for service, and again re-light-weighted and stenciled in 1906 and in 1907, after which it should not be light-weighted except when the light-weight marks have become obliterated or if it has received repairs or special fittings likely to change the light-weight. Green Line tank cars and other foreign and individual tank cars should not be light-weighted and stenciled. All foreign and other individual cars should be light-weighted immediately after coming from shops, if repairs likely to change their light-weight have been made.

43 See that the scales are in proper order and weigh correctly, that cars are clean and dry when weighed, that the light-weight is carefully taken, with car stopped on the scales, and that no more than one car is weighed at a time.

44 In weighing loaded stock cars that have been light-weighted with double deck in, should the double deck be out of car, deduct 1200 pounds from the light-weight of cars of less than 40,000 pounds capacity, and 1500 pounds from cars of greater capacity, that being the weight of material in double deck, and add 1200 and 1500 pounds respectively to light-weight of single deck cars that have had double decks put in after being weighed as single deck cars.

45 When reporting the light-weight of stock cars containing double decks, place the letters "D. D." immediately over the weight, on the reports to the Car Record Office and Car Marker.

46 Report weekly on C. T. 1101 the initials and numbers of all cars light-weighted and stenciled, the light-weight of the car, and date weighed. Show the cars light-weighted up to midnight of Saturday of each week, and forward the reports promptly to the Car Record Office, keeping a copy. When reporting light-weights of foreign and individual cars that have been light-weighted by reason of change in weight on account of repairs or having incorrect light-weight marks, report the old as well as the new weights. If no cars have been light-weighted, send a blank, dated and signed, and write across the face "No cars to report."

47 Report to the Car Record Office on C. T. 1103 the initials, numbers and final destination of the above-named cars passing over your scales that do not bear light-weight marks or that are improperly marked, or that have not been light-weighted in accordance with Rule 42, so that the car may be traced, light-weighted and marked correctly.

48 After light-weighting cars, hand to the Car Marker a memorandum made up on C. T. 1102, showing the light-weight to be marked on each car.

49 Car Markers must erase the old light-weight marks and stencil cars as follows: On both sides of car, the place, weight, and date of weighing, thus,—“P20, Wt. 18,000, 1st 05.” Box, stock, gondola, and coal cars with

fixed ends will be marked on ends in addition, thus,—“Wt. 18,000.” Gondola and coal cars without fixed ends will be marked only on the sides and in the centre of the car, to avoid the marks being covered by the standards. On stock cars with double deck in, the letters “D. D.” must be placed after the date on sides, thus,—“P20, Wt. 19,000, $\frac{6}{10}$ 05, D. D.,” and after the weight on ends, thus,—“Wt. 19,000, D. D.” When a new car is first weighed; the word “New” must be placed after the marks as given above, and at the end of one year after date of weighing such new car, it should be re-weighed and the correct weight marked, erasing the word “New.”

50 Box cars of these lines will be marked with the initials and number on the top plate on the inside of the car to the left of the doorway to correspond with the initials and number on the outside of the car. When any change in the initials or number is made on the outside of the car, care should be taken to make the same change on the inside of the car.

51 Car Markers must notify the Weighmaster promptly when cars are not marked as directed, that he may notify the Car Record Office to have cars traced and properly marked at another point.

C. T. 1098 REPORTS

52 In making report C. T. 1098 include all car loads billed, weighed or reconsigned from your scale. When your scale is located at the junction with a foreign railroad, include all cars received from that road. Show the full route in all cases.

When there are no cars to report, send a blank, dated and signed, and write across the face “No cars to report.”

C. T. 1112 REPORTS

53 Supervisors, at the close of each month, will report on C. T. 1112 the initials and numbers of all maintenance of way equipment on their divisions, and of all other cars in regular use by them. Report the kind and number of each car received or sent away during the month, with date and point from which they were received and to which they were sent. Show under the head of “Remarks” the initials and numbers of cars on hand and not wanted or unfit for service. If there are no cars to report, send a blank, dated and signed, and write across the face “No cars to report.”

54 Report opposite each car number the number of working days, excluding Sundays and Legal Holidays, conducting transportation cars and maintenance of way stone and wood trucks and eight-wheel gravel dumps are used in construction or maintenance of way service or in special C. T. service. If used jointly, show separately the number of working days, excluding Sundays and Legal Holidays, chargeable to each department.

When cars are not used, give the number working days idle.

55 Shop Foremen, at the close of each month, will report on C. T. 1112, the initials and numbers of all maintenance of way equipment in regular use at shops and in shops for repairs, showing the date received in shops and the date turned out of shops, and stating in each case whether the car was in shops for repairs or for regular use. Also, report on C. T. 1112 the initials and numbers of all conducting transportation cars in regular use at shops, showing the dates the cars were received from and the date they were returned to C. T. service; and show the cars on hand at the close of the month not wanted, and which are unfit for service.

When there are no cars to report send a blank, dated and signed, and write across the face "No cars to report."

C. T. 1022 REPORTS

56 Shop Foremen will report daily on C. T. 1022 the initials and numbers of all cars received in shop and on shop sidings and turned out for service from midnight to midnight, including cars loaded with Company material. The cars repaired in trains and on yard tracks by Car Inspectors should not be reported. Give the initials and numbers of all cars torn up or built, including all cars damaged on the road and torn up at shops. When marks on cars are changed give full explanation.

When a damaged car is loaded on another car and sent to home shops, the initials and number of the damaged car should be shown on report and a notation made to that effect.

When there are no cars to report send a blank, dated and signed, and write across the face "No cars to report."

57 All cars from shops should be sent to the nearest scales for re-light-weighting, if repairs likely to change their light-weight have been made.

C. T. 228 REPORTS

58 Make report of every accident to any car which necessitates its being sent to shops, giving point shown in this book at or near which the accident occurred, and of all cars found broken, even if it is not possible to locate the point or cause of accident.

This form is also to be used in cases when drop bottoms come down causing loss of lading.

This report should not include passenger, freight or maintenance of way equipment cars which are repaired by Car Inspectors outside of shops.

When a transfer of the lading or its seizure for Company's use is the result of the accident, report on C. T. 228 all particulars called for on C. T. 321 and 322, in regard to billing, etc.

Card way-bills should be sent to the Car Record Office for all cars containing lading destroyed, lost or otherwise disposed of, which will not reach destination.

C. T. 321 AND 322 REPORTS

59 Report in every case on C. T. 321 when all or any portion of lading in car loads is transferred from one car to another ; and on C. T. 322 when all or any portion of lading in car loads is taken for Company use not reported on C. T. 228.

GENERAL INSTRUCTIONS

60 When the number of a car is changed in transit all the way-bills traveling with the car must be changed to correspond.

61 The authority for making any alteration on a card way-bill must come from the Superintendent, who will be instructed by this office or the General Superintendent, except that the Superintendent may authorize a change in the consignment or destination of a car upon request of the Division Freight Agent. To alter a card way-bill, draw a pen-stroke through the original marks, and write the correction in ink above or below, taking care to leave the original marks so they can be easily read. On the back of the card give the authority for the change, and date and sign the notation. Trainmen must not make any alteration on a card way-bill.

62 A Conductor leaving property at a siding, platform, or station at which there is no Freight Agent, must show over his signature on the card or regular way-bill the hour of delivery, and must deliver this card or regular way-bill to the Agent, or his proper representative at the next station beyond at which there is a Freight Agent.

63 When a car is left at a station other than its proper destination, the Agent should secure from the Conductor the way-bill for such car ; when left at a point at which there is no Agent, the Conductor should leave the way-bill at the next station or telegraph office and report to his Superintendent by wire.

64 When directed to forward an empty car free to a particular point, use a C. T. 212 card—a separate card for each car. This card must not be used for loaded cars, nor for empty cars when a charge is made for the movement.

When the final destination is a point on a connecting road, card the car only to the junction point with the connecting line, and show the final destination in addition for information only. The C. T. 212 card should be delivered to the Agent or Yard-Master of the connecting road with the car.

When a car can be loaded at some intermediate station in the direction of the point to which it is ordered, card it as above to that station, and put after the name of the station the words "To be loaded to" the desired point.

When a car moving on a C. T. 212 card is loaded at an intermediate point, fill out the back of the card and send it to the Car Record Office.

When a car moving on a C. T. 212 card is received, fill out the back of the card and send it to the Car Record Office, Broad Street Station, Philadelphia.

65 When new cars on their own wheels make their first trip from your station or are received at your station from a connecting line on their first trip, they should be reported to this office by letter, giving initials, number and kind of each car, lading (if any) and destination, stating whether cars are way-billed or not. A similar report of all empty foreign cars should be made when they are received from a connecting line traveling under home shop cards. As the per diem is waived on such cars, it is important that this rule be closely observed.

66 For the information of Conductors and Yardmen, the words "Perishable" or "Live Stock" will be stamped or written with ink on the back of the road way-bill in less than car loads, if it accompanies the car, or on the face of the card way-bill for a car load of perishable freight or live stock, or for a solid car for one destination if it contains any perishable freight or live stock. (See Rules 69 and 124, General Instructions for the Government of Freight Agents, dated January 1st, 1901.)

67 A loaded car traveling on a card way-bill, showing estimated weight, should be sent to the first track scales en route to destination to be weighed.

68 When card way-bills do not show the correct weight of lading in cars, Conductors must call the attention of Yard-Masters to the card way-bills for such cars, and Yard-Masters should arrange to have cars weighed on the first available track scales en route to destination. A car must not be sent out of route or beyond its destination to be weighed, except on the authority of the Division Freight Agent. Weighmasters will be required to enter in ink—not in pencil—the correct weight of lading of each loaded car weighed, and in proper place on card way-bill.

69 Cars containing DUTIABLE merchandise in bond must be carded on each side with a RED CARD, reading as follows:

C. T. 612
IMPORTED MERCHANDISE
UNITED STATES CUSTOMS
Five Years' Imprisonment or \$1000 Fine, or Both
Is the PENALTY for the
UNLAWFUL REMOVAL
of the
UNITED STATES CUSTOMS SEALS ON
THIS CAR
United States Customs Officers Only are Authorized
to Break These Seals

.....Car No.....
From.....
To.....

NOTICE.—The Merchandise in this car must
be delivered to the chief officer of the customs
at

70 Whenever it becomes necessary to break a sea' on a car in transit, a record must be made showing the kind of seal, together with all numbers and letters (on face and back), and the car must be immediately resealed and a record kept of the resealing.

71 In case it becomes necessary to remove U. S. customs seals to obtain access to the car en route, permission from the Superintendent must first be obtained, if practicable; but if, in case of accident or fire, such permission cannot be obtained, the seals may be removed by the person in authority at the time. In such cases the contents of the car must be carefully guarded, and if transfer of the freight is made the contents of the car must be carefully checked with the Government manifests, so that affidavit of the transfer may be made if necessary, and the car must be sealed by the agent at our nearest sealing station as soon as practicable. The customs cards should be removed from the damaged car and placed on the car into which transfer of the bonded freight is made. Notation must be made on the Government manifests showing the marking of the seals removed, also the marking of the seals placed on the car. The broken seals must be carefully preserved and be promptly sent to the Superintendent, with the Government manifests and a full report of the case. The Superintendent will then make proper notation on the Government manifests, explaining why it was necessary to remove the seals, and will forward the broken seals with his report to the customs officer at the destination of the car, allowing the Government manifests to accompany the car to destination. He will also make a full report of the case to Superintendent Freight Transportation, Broad Street Station, Philadelphia.

The greatest care must therefore be exercised by Agents, Trainmen and other employes handling cars containing bonded merchandise to not remove the U. S. customs seals unless they are properly authorized to do so, as the penalty provided by law for violating these instructions is a fine of one thousand dollars, or imprisonment not exceeding five years, or both.

Envelope G. 62—A. M. F. R. must be used for enclosing Government manifests for bonded freight, and Conductors and Yard-Masters must see that the Government manifests accompany the car containing bonded freight in every instance, as the law is imperative on this subject, and a car containing bonded freight must not be moved without such manifests, except by permission of the Superintendent. The card way-bill on which the car is moved must be securely fastened to this envelope. (See General Notice No. 233, dated January 27th, 1902, issued by General Superintendent Transportation.)

72 When cotton, compressed in bales, has been on fire, there is always danger of its heating and taking fire again. In order that the delivering agent may take the necessary precaution to prevent damage to other

property, the condition of such lading must be stated by the forwarding agent on the card and regular way-bills. When fire occurs in transit, the notation must be made on the way-bill accompanying the freight by the Yard-Master or Conductor having the car in charge.

73 (a.) Acid, brine or other liquids, in packages, must not be loaded on top of, or near, other freight liable to be damaged by leakage.

(b.) Acid in carboys should be loaded in the centre of the car near the door, and the floor around the carboys should be stripped and the space within the strips covered with sawdust, so that in case of breakage of a carboy the acid will be absorbed or pass out of the car door without injuring other property.

(c.) A car containing picric acid must be carded on both sides and both ends with card, C. T. 706, reading "PICRIC ACID, KEEP FIRE AWAY." A car containing other acids must be carded on both sides and both ends with card, C. T. 443, reading "ACID, HANDLE CAREFULLY."

(d.) A car containing nitrate of soda must be carded on both sides with card C. T. 613, containing instructions in regard to its removal from a burning car, and prohibiting the use of water to extinguish fire. This card also designates the location in the train in which car should be placed to avoid danger from fire.

PHILADELPHIA, June 9th, 1905.

GENERAL NOTICE No. 20

74 As an additional safeguard in handling cars containing shipments of Benzine, Benzola, Camphene, Coal Tar Oil, Crude Oil, Gasoline, Naphtha, Paint Dryer, Refined Oil, Turpentine, Ammunition, Fireworks, and other INFLAMMABLE or COMBUSTIBLE materials in L. C. L. or carload lots, a special card, C. T. 675, has been prepared and will be kept in stock by the Purchasing Agent, subject to requisition, reading:—

"INFLAMMABLE"

"KEEP LIGHTS and FIRES AWAY"

Agents, Yard-Masters, and other employes must see that one of these cards is tacked on each side and each end of every car placed for loading any of the above described commodities, before the loading is commenced, as a notice to all parties of the danger of approaching with a light, and Conductors will refuse to move cars containing any of the above-described commodities unless so carded.

When cars loaded with the above freight are received from connections, it will be the duty of the Yard-Masters at receiving point (or Agent at junction points where there is no Yard-Master) to see that the cars are

carded as prescribed above, immediately on receipt. This card is to be used in addition to the cards now in use.

When cars loaded with the above materials are received or held in yards, particularly at night, Yard-Masters must see that train and yard employes are posted as to the position of such cars in the yard, and take every precaution they may deem expedient to prevent rough handling and accident.

Under no circumstances should a car so carded be cut off and run in under control of hand brakes. Where such cars are placed on, or taken off a spur siding, and it is impossible to keep the engine attached, a rope or pole must be used to move the cars sufficiently ahead to permit the engine coupling on, and placing the cars in a permanent position.

Trainmen having cars containing any of the above materials must, at every point where train stops, make special examination of cars for hot boxes.

Any employe discovering a car loaded with Petroleum, its product, or any inflammable or combustible commodity, in a damaged condition or leaking, must immediately notify the nearest Agent, or Yard-Master, who must have such car placed in a position of safety, and at once telegraph the Superintendent, giving full particulars as to the kind of car and nature of its contents.

All cards must be removed as soon as cars are unloaded.

Employes will understand that these rules are intended for their individual safety, as well as for the safety of others.

SELECTION AND PREPARATION OF CARS CONTAINING EXPLOSIVES

75 Only STEEL UNDERFRAME BOX CARS, EQUIPPED WITH AIR BRAKES IN CONDITION FOR SERVICE, and which have been specially selected and specially inspected, will be used in the transportation of Common Black Powder, Smokeless Powder, High Explosives and Fulminates in lots of 5000 pounds or over, and they must be in first-class condition in every respect, both inside and outside. The following points must be carefully looked after: The car must in no case have loose boards or cracks in the roof, sides or ends, and the doors must shut so closely that no sparks can get in at the joints. When these explosives are loaded in carloads the doors must be stripped, except when the cars are equipped with Wagner doors, which must not be stripped. The journal boxes and trucks must be examined, and so cared for as to reduce to a minimum the probability of hot boxes or other failure, requiring the car to be set off before reaching destination. The car must be carefully swept out before it is loaded, and a careful inspec-

tion made of the inside. Holes in the floor or lining must be repaired and special care taken to see that there are no projecting nails or bolts, or pieces of metal which may work loose and produce holes in packages of explosives during transit. Short pieces of hard wood, two-inch plank, must be spiked to the floor over the king bolts or draft bolts to prevent possibility of their wearing through the floor and into the packages of explosives. Agent or Inspector must examine cars and sign C. T. 477 before permitting the cars to be loaded or despatched.

76 Agents and Car Inspectors at junction points must not receive from connecting lines cars loaded with these explosives which do not meet the requirements of Sections 23 and 27 of General Notice No. 174 A. If necessary, break the seals (except U. S. Government seals) and ascertain whether the lading is properly stowed.

MARKING OF CARS CONTAINING EXPLOSIVES

77 As specified in General Notice No. 174 A, every car containing Common Black Powder, High Explosives, Smokeless Powders or Fulminates, *in any quantity*, must be plainly carded on both sides and both ends with cards C. T. 81, "EXPLOSIVES—HANDLE CAREFULLY—KEEP FIRE AWAY," and must also have on both sides the card C. T. 477, "Certificate of Inspection of Car Containing Explosives," properly signed by the Agent, Inspector or Shipper, so that those having charge of such cars will not ignorantly do anything to incur danger. This carding should be done by the shipper of a carload and by the Agent, including transfer stations, when the explosives are loaded at his station.

(a) The Agent will be held strictly responsible if a car containing these explosives leaves his station or a siding within his jurisdiction without having these cards properly affixed. A Conductor must under no circumstances take a car containing these explosives from a station, including transfer stations, or a siding unless it is properly carded as above and unless the car is in first-class condition and the card way-bill and revenue way-bill for such car is stamped on the back by the Agent showing that "Shipper's Certificate of Contents and of the Method of Packing and Marking Packages of Explosives," G. 281 A. M. F. R., covering the contents has been duly executed and filed.

(b) A car containing Black Powder, High Explosives, Smokeless Powders or Fulminates, in any quantity, must not be received from a connecting line unless properly carded to show contents. It must not be moved from interchange or junction point until carded with C. T. 81 on both sides and both ends. If the car is not accompanied by a Certificate of Inspection, it must be inspected so far as practicable as to condition and contents and C. T. 477 put on by Agent or Inspector. Cards of connecting roads showing contents of car or Certificates of

Inspection must be removed and filed by the Agent. The cards C. T. 81 and C. T. 477 will be furnished to Agents on requisition in the usual way through their Superintendents.

HANDLING CAR CONTAINING EXPLOSIVES

78 The following rules must be observed by yard and train employes in the making up and movement of freight trains and the handling of cars containing explosives carded with C. T. 81:—

(a) Not more than one car carded with C. T. 81 will be handled in a train for through road movement (except by permission of the Superintendent Freight Transportation). Such train must not consist of more than thirty (30) cars, two-thirds ($\frac{2}{3}$) of which must be air-brake cars in service. A car carded with C. T. 81 must be placed as near centre of train as possible, but never closer than ten (10) cars from the engine. It must be placed between two box cars in good condition not loaded with oil or other inflammable material, lumber, or other articles liable to break through end of car from rough handling.

(b) Cars carded with C. T. 81 handled in shifting or distributing trains may be handled more than one car per train, provided train does not consist of more than thirty (30) cars and that all air brakes in condition for service are used. Cars should be handled as near centre of train as possible.

(c) In handling cars carded with C. T. 81 in yards or placing on sidings to unload, they must be coupled to engine protected by a car between. When this is not possible in placing cars on a siding, a rope or pole may be used, *but a flying switch must not be made under any circumstances*. Other cars must not be allowed to strike a car carded with C. T. 81. They should be so placed in yards or on sidings that they will be subject to as little handling as possible and removed from all danger from fire.

(d) At points where trains stop, trainmen must examine cars carded with C. T. 81 and adjacent cars to see if they are in good condition and free from hot boxes or other defects liable to cause damage. If cars are set off short of destination from any cause, Conductor must notify nearest Agent who must see that every precaution is taken to prevent accident. Conductor must also notify Superintendent from first telegraph office.

79 In order to call attention to cars carded with C. T. 81 and the importance of exercising great care in their movement, Agents will make out C. T. 80 and deliver it to Conductor with the card way-bill. Each Conductor, Yard-Master, or Agent handling car will receipt for same in proper place provided on card showing place, date and time received.

Conductors will also show the location of such cars in train by making a notation on the bottom of their car reports, thus: "15th car carded with C. T. 81 and C. T. 477."

The forwarding Agent will also fill out the coupon C. T. 80 A and forward it to Superintendent of Freight Transportation, Philadelphia.

Agent at destination will forward C. T. 80 to Superintendent of Freight Transportation, Philadelphia. If car or contents is received in a damaged condition or contents not properly loaded in accordance with instructions, Agent will attach to C. T. 80 report in detail and forward same as above.

80 C. T. 81 and C. T. 477 must be removed by Agent at destination as soon as car is unloaded.

81 Hay, Straw, Excelsior or other Inflammable Material will not be accepted for movement in cars with end doors or end ventilators, unless the end openings are properly closed and fully protected against fire.

82 The attention of Agents, Conductors, Yard-Masters and all others interested is called to the provisions of the United States law in regard to transportation of cattle, sheep, swine and other animals, prohibiting under heavy penalty their being confined in ordinary stock cars for a longer period than twenty-eight consecutive hours, without unloading for feed, water, and rest for a period of at least five consecutive hours. Agents are required to show on card or regular way-bill the date and hour stock was loaded, also date and hour fed and watered in transit (see Rule 124 t of General Instructions for Government of Freight Agents). When these instructions are not complied with, the Superintendent should be advised by wire. When animals are carried in cars in which they can and do have food, water, space and opportunity to rest, the provisions in regard to their being unloaded shall not apply.

83 Cars equipped with Wagner doors should be sealed at the lever and also at the hasp, except when loaded with perishable freight and there are no other means of ventilation, the doors may be sealed at the hasp so that the door may remain partially open, and in such cases care should be taken to place the lading away from the door beyond reach of the hand.

84 Attention is called to the joint circular, issued April 10th, 1905, in regard to icing refrigerator cars. Care should be taken that the provisions of this circular are strictly observed. Also to P. R. R. General Notice No. 8 (Pennsylvania Lines No. 99), Care of car-load perishable freight in transit loaded in refrigerator cars or cars equipped with ventilators.

85 A car containing articles liable to be damaged by rough handling must be carded on both sides and both ends with card C. T. 329 reading "FRAGILE, HANDLE CAREFULLY."

86 Agents should note carefully the condition of lading when a car is unloaded, and if evidence of a leaky roof

is found, and the car belongs to any of the lines shown under Pool List, page 271, the edge of the roof on each side immediately above the door should be marked with white paint, if not supplied with white paint white chalk may be used, but in addition the words "leaky roof" must be written in a prominent position on each side of the car. Cars so marked, unless required for the movement of freight which would not be damaged by water, should be sent to the nearest shop for repairs and the white marks must be obliterated when such repairs have been made. Cars marked in this way must not be loaded with any commodity which would be damaged by water.

87 To avoid the movement of tank cars from sidings at destination before they have been unloaded, Conductors must sound the tanks before cars are moved from such sidings to determine whether they are empty.

Yard-Masters will see that tank cars moving as empty are sounded before they are moved from yards.

Conductors and Yard-Masters should see that the manhole covers and caps are in proper position before the empty cars are moved.

88 Tankage consisting of offal, bones with flesh adhering and all waste from slaughtered animals, which is likely to impregnate or injure cars or which is prejudicial to public health, will not be accepted in car loads for movement, except in cars specially provided for this purpose. Shipments in less than car-load lots will not be received except when loaded in water-tight barrels.

89 Rolling Mill Rolls or similar articles of sufficient weight to break the doors or side of cars by falling against them, must not be loaded in covered cars unless they are strongly boxed or slatted and securely braced to prevent shifting; when box cars are so loaded the regular and card way-bills must show the nature of the lading. When such articles are offered for shipment in gondola cars, care must be taken to see that the cars have strong end gates and sides and the articles must be securely braced to prevent shifting. Rough and broken rolling mill rolls should be loaded in gondola cars if practicable, but if it becomes necessary to use flat cars, care must be taken to see that the freight is securely blocked.

90 When articles liable to injury by falling are held in place by other freight, the Conductor removing the supporting freight must see that the property remaining in the car is in position for safe carriage to destination.

91 Yard-Masters, Agents, Car Inspectors and Conductors of Freight Trains are required to see that cars are not loaded beyond their capacity in dimensions or weight, and Car Inspectors particularly should watch the dimensions of lading.

92 Agents and Yard-Masters should prohibit the placing of advertising placards on all cars, and see that all old cards, except route and defect cards, are removed from empty cars.

310 to	317 inc.,	Flat.
	241	Snow Plow
401 to	414 inc.,	Hand Car
501 to	518 "	Hand Truck

All of the Refrigerator, Hopper Gondola, Long Gondola, Coke Gondola, Gun Cable and Pocket, Flat, Tank, Lime, Ore Dump, C. T. Cabin and Maintenance of Way Cars in the foregoing equipments, and the P. R. R. Stock Cars are being renumbered as shown in following pages.

(When cars are renumbered in Yards they will retain their present ownership marks until such time as they go through shops and are repainted. When cars are built new or repainted they will be marked "Pennsylvania" on the sides above the number and "P. R. R." on the ends, and the ownership will be known by the car number)
