WHERE INDUSTRY HAS MASSED ITS FORCES

The greatest industrial producing and consuming territory in the world is embraced in that part of the United States served by the lines of the Pennsylvania Railroad. Statistics compiled by the United States Department of Commerce show that this region contains:

- 50% of the manufacturing establishments in the United States.
- 61% of the wage earners, representing 66% of the wages earned.
- 63% of the cost of materials and supplies used.
- 65% of the value of manufactured products.

Approximately half of the country's population and two-thirds of its wealth are concentrated in this area.

When seeking a plant site, a manufacturer cannot fail to recognize the economic advantages offered by the most intensive producing and marketing area in the United States.

This Railroad offers to manufacturers the services of its Industrial Department, which is prepared to supply trustworthy data regarding industrial and commercial conditions on its 12,000 miles of line.

Inquiries addressed to any of the representatives of the Pennsylvania Railroad's Industrial Department named below will receive prompt and careful attention. Full information as to the advantages of desirable plant sites to meet requirements of any industry is available.
