### SPECIAL INSTRUCTIONS

### GENERAL RULES

### 100C-1A Examinations

Employes are required to have dates of their last Book of Rules, Timetable, Physical and Air Brake examinations listed in the proper place on the Qualified For Service page in their Timetable.

### 100.I-1A. Uniforms.

Designated uniformed employes must wear the standard uniform November 1st to April 30th inclusive.

The uniform designated for summer use only, or standard mohair coats may be worn May 1st to October 31st inclusive. Coats must be buttoned except when trainmen are actually

engaged in lifting transportation.

Passenger trainmen in Suburban Commuter Service may perform their duties without uniform coats and vests during the

period May 15th to September 15th, inclusive.

Trainmen in Suburban Commuter Service who perform their duties without uniform coats and vests, must wear a clean, plain white broadcloth shirt with long or short sleeves, a black four-in-hand tie, and a black belt. Paraphernalia must be carried in such a manner as to assure a neat appearance at all times.

This privilege will not apply to train personnel in through

passenger service.

Passenger trainmen may wear a black clip-on bow tie with square ends, 4 inches long and 134 inches wide, in lieu of standard four-in-hand tie, if desired.

### Employes Permitted to Ride on Engines, etc.

100 O-1A. Referring to Rule O, the following designated employes will be permitted to ride on engines, freight trains and front and rear ends of passenger trains.

Movement Directors.

Asst. Movement Directors. Asst. Supervisors Movement.

Train Dispatchers.

Yardmasters and Assistants, in their districts.

Supervisors C. and S. and Assistants, C. and S. Inspectors, C. and S. Foremen and Assistants, Power Directors and Assistants, E. T. Gang Foremen, Linemen and Maintainers in their districts.

Supervisors of Track, Assistants and Foremen in their

districts.

Air-Brake Instructor.

Rules Examiners.

Supervisor of Structures and Assistants.

Railroad Police Officers in discharge of their duties.

Transportation Supervisors. Persons holding Proper Transportation issued by System

Pass Bureau or General Manager. Other persons must hold proper transportation issued by the

Superintendent. It is desired that not more than three men ride in the cab of

an engine hauling a passenger train.

Under no circumstances are more than four men to be allowed to ride in the cab of an engine hauling a passenger train, two men in addition to the engine crew.

### Personal Injuries.

Injuries to persons or employes must be reported 100R-1A. immediately to the Superintendent by wire and a full report made to the head of the department within twenty-four hours.

### ENGINE WHISTLE SIGNALS

1014-A4. Except in emergency, enginemen will not sound engine whistle between Olentangy and Mile Post 4, West of Grandview.

1014-A5. Referring to Rule 14 (1):

Enginemen will sound Engine Whistle Signal Rule 14 (1) approaching track gangs and other points where men may be at work on or about the track and approaching the first public grade crossing at Scio, Dennison, Uhrichsville and Coshocton, and need not be sounded at other crossings while passing through these towns.

- 1014-A6. Rule 14 (r) will apply to acknowledge Take Siding Indicator when displayed.
- 1014-A7. Between Gary Station and Virginia Street, Gary and between Dickey Place and Sheridan Avenue, 1100 feet west of Whiting Station, City of Whiting, enginemen are relieved from sounding engine whistle signal for public crossings, except if necessary to prevent accidents, and also when view is obscured by weather and other conditions, approaching interlockings, stations, yards, or other points where men may be at work.
- 1014-A8. Except in emergency, enginemen will not sound Engine Whistle Signal Rule 14(1) for the following grade crossings:

Between Galena and Oak St., Toledo.

1014-A9. Except in emergency Rule 14(1) will not apply over grade crossings protected by lights, bells, watchmen, flagmen or gates within the city limits of Indianapolis.

### TRAIN SIGNALS

- 1019-A. Night signals will be displayed on rear of trains while passing through tunnels.
- 1019-A1. Trains of foreign railroads may display train signals as required by the operating rules of their respective railroads when on this Region.
- 1019-A2. Reflector Discs. In the application of Rule 19, authorized reflector discs may be used as markers.
- 1019-A3. In the application of Rule 19, authorized electric flashing-type lamps may be used as markers. Markers will be extinguished by day.

### USE OF SIGNALS

- 1027-A1. At the following locations Clear Block Indication Rule 280, must not be accepted unless marker light is also lighted: BROAD, FOLEY.
- 1035-A1. In the application of Rule 35, the following signals will be used by flagmen:

Day Signals—a red flag, torpedoes and fusees. Night Signals—a white light, torpedoes and fusees.

- 1035-B1. Account fire hazard lighted fusees must not be displayed on bridges or trestles unless necessary to prevent an accident.
- 1035-C1. Minimum number of fusees and torpedoes which must be carried as part of equipment in services indicated:

	Fusees	Torpedoes
Passenger Service	10	10
Freight Service	12	12
Engines	3	6
Engines in Helper Service	6	6
Track Cars	4	8
Crossing Watchmen	3	0
Detector Cars and Burro Cranes	6	12

NOTE—Additional fusees and torpedoes must be carried when necessitated by weather conditions. In event that the supply becomes depleted during a trip, proper advance information must be given in order that the supply may be replenished at convenient points.

1007 11	7731 1	. 6 . 17	1 4 . 1.	1 1		. 1
	The number					
	ing Dennison					
indicator on	front of tower	r at Uhri	ch, except	t that whe	n Figur	e 4
is displayed	, eastward fre	ight trai	ns will en	ter on No	. 101 tra	ıck
at Jewett St	reet. Denniso	n.				

- 1037-A2. The number of the track to be used by eastward trains entering Undercliff Yard will be displayed by indicator on west side of Cliff Block Station.
- 1038-A1. Speed Signs. In the application of Rule 38, lights may be omitted on reflectorized speed signs.

### TORPEDO-PLACING MACHINE

1050-A1. Torpedo-placing machine located 59 feet south of southward home signals at Clagg movable bridge, governing southward movements on main track, when a train or engine explodes a torpedo the train or engine must stop at once and report the occurrence to the operator.

### SUPERIORITY OF TRAINS

1072-A1. Eastward and Southward trains are superior by direction to trains of the same class in the opposite direction, unless otherwise specified.

## Standard Clocks

1075-A3. Standard Clocks at Other Points:

Train dispatcher's office.

Open block stations.

#### GENERAL ORDER ZONES

1075-A4. General order zones of this region are as follows:

#### Zone A

#### BUCKEYE DIVISION

Division Post Southwestern Division 1885 feet east of Thorne to Division Post Central Region 2000 feet west of Mile Post 67 west of Cadiz Jct.

to Division Post Central Region 2000 feet west of Cadiz Jct. Division Post Chicago Division 710 feet east of Anoka to Cincinnati.

C & X Branch

Richmond to Division Post Fort Wayne Division 2640 feet west of Mile Post 69 east of Decatur Ind.

Columbus to New Paris via Bradford.

Zanesville Branch

Akron Secondary Track. Court Street Secondary Track.

Undercliff Branch.

Springfield Secondary Track. Middletown Secondary Track.

Trinway Secondary Track

Zanesville Secondary Track
Morrow Secondary Track
Muncie Yard Running Track.
Clement-Hempstead Industrial Track.

Dayton-Lytle Industrial Track.

Dresden Industrial Track. Howard Industrial Track.

#### Zone B

#### CHICAGO DIVISION

Chicago to Division Post Fort Wayne Division Mile Post 423 east of Valparaiso.

Chicago to Division Post Buckeye Division 850 feet west of Mile Post 83 West of Bradford.

Effner Branch.
South Bend Branch.
I&F Branch-Van to Division Post Southwestern Division.

Beverley Junction-Western Avenue Secondary Track. Calumet River Line Secondary Track.

Englewood Connecting Line Secondary Track.

### FORT WAYNE DIVISION

Division Post Chicago Division at Mile Post 423 east of Valparaiso to Division Post Central Region 1800 feet west of Mile Post 168 east of Lucas.

Toledo Branch.

Grand Rapids Branch.

Logansport Branch.

Muskegon Secondary Track.
Vandale Secondary Track.
Traverse City Secondary Track.
Adams to Division Post Buckeye Division 2640 feet west of Mile Post 69 east of Decatur, Indiana. Tiro Industrial Track.

## Zone D

#### SOUTHWESTERN DIVISION

St. Louis to Division Post Southwestern Division 1885 feet east of Thorne.

Louisville and I&F Branches to Division Post Chicago Division.

Vincennes Secondary Track.

Crawfordsville Secondary Track. Peoria Secondary Track.

Knightsville-Centerpoint Running Track.
Lost Creek-Dewey Jct. Running Track.
Madison-Columbus Secondary Track.
Shelbyville Secondary Track.
War-Camp Secondary Track.

Bushrod-Linton Summit Secondary Track.

Van Jet.-Kraft Running Track. Thorne-Kitley Ave. Secondary Track.

1075-A6. The Conductor or Engineman of B. & O. and N.Y.C.R.R. trains at Zanesville, Fair Oaks and Spangler will report to block operator at New Lexington for general order information or block indication, before entering Zanesville Secondary or Zanesville Yard Running Tracks.

1076-A1. When Block Station or Interlocking is closed and illuminated letter "E" is displayed a member of the crew will promptly advise operator at next open block station to the rear before examining train. After complying with Rule 4076-A a member of the crew will so advise block station in the rear.

#### 1076-A2. Bunker Hill.

When dragging equipment detector on No. 2 track has been actuated, the two amber lights over the telephone in shelter box on east side of concrete instrument house are extinguished, in which case member of crew must notify operator at Anoka or Kent. After complying with last sentence, Rule 4076-A, Train Dispatcher will authorize conductor or engineman to break seal on door of box located above telephone and push button to reset signals. If signals do not clear, be governed by Special Instruction 1663-A.

#### MOVEMENT OF TRACK CARS

1080-A1. In the application of Rule 80, Rule 317 will apply to the movement of track car extras on tracks governed by Manual Block Signal System Rules.

#### MOVEMENT OF TRAINS

1083-A1. Rule S-83: Except on portions of the railroad where Rule 261 is in effect, the information as to the arrival or departure of superior trains will be furnished on form CT 1246 or by message, by the operator at initial stations, junctions or where trains pass from one or two or more tracks to single track or by train orders if furnished to trains before arrival at the points mentioned.

Except: At the following locations a proceed signal displayed will indicate that all trains due which are superior have arrived

or left:

Foster-for eastward trains.

West Greene-for westward trains.

McCarty Street, Indianapolis—for southward trains.

Lebanon—for northward trains.

Boyd-for northward trains.

1083-B. Rule D-83: Except on portions of the railroad where Rules 251 or 261 are in effect, information as to the departure of superior trains will be furnished verbally to train by the operator at initial stations or junctions.

#### Yard Limits

1093-A1. Yard Limits indicated by yard limit boards as follows:

Track	Between	And
Main Line	Xenia	930 feet west of West Greene
Richmond Branch	Newman	1520 feet west of Mile Post 76

Track	Between	And

No. 1 and No. 2	East Almeda	Limedale

NOTE. Rule D-93 applies for movement against the current of traffic where Rule 261 is in effect, in the above territory.

#### Authority to Proceed as an Extra

1097-A1. Referring to the Note to Rules S-97 and D-97 when a train is to run as a Passenger Extra it will be notified by

At Cincinnati Union Terminal and at Columbus, by PRR Movement Director, located in Columbus, phone Cincinnati DU 1-3110 or Columbus CA 4-5806.

At St. Louis Union Station, by Operator, UD Office.

## Non-Interlocked Railroad Crossings at Grade

1098-A1. Movement of trains or engines on tracks of this region over non-interlocked railroad crossings at grade will be governed as follows:

## BUCKEYE DIVISION

	Qin-al-	ata Covei	1	
Location	Movement	etc., Governing ts Over Crossings	Requirements	Note
	Туре	Indication or Position	1	
Newark: B. & O. R. R. (Eastward trains	Target	Vertical	Cross without stopping.	1
on No. 1 track and Westward trains on No. 2 track)	Position light Signal	More favorable than stop	scopping.	
Newark: B. & O. R. R. (Eastward trains on No. 2 track and Westward trains on No. 1 track)	Target	Vertical	Stop before crossing.	
Anderson Belt: Big Four Ry. (Mich. Div.)	Gate and Target	Gate Clear Target Diagonal	Stop. Proceed indication— Gate Clear. Target diagonal. Red lights, diagonal by night. Normal position of target is against movement on P. R. R.	
Kokomo Belt: Nickel Plate R. R.	Target	Target Diagonal	Stop. Proceed indication— Target diagonal. Red lights diagonal by night. Normal position of target is against movement on P.R.R.	
Kokomo: Nickel Plate R. R. (Clover Leaf Dist.)	Gate and Stop Boards	Gate Clear	Stop. Proceed indication— Gate clear. Green light by night.	
Kokomo: Nickel Plate R. R. (L. E. & W. Dist.)	Target and Stop Boards	Target Diagonal	Stop. Proceed indication— Target diagonal. Red lights diagonal by night.	
Zanesville: B. & O. R. R.	Target	Vertical	Stop before crossing.	
Crooksville: N. Y. C. R. R.	Target	Vertical	Stop before crossing.	2
Junction City B. & O. R. R.	Target	Vertical	Cross without stopping.	3
Lancaster: C. & O. R. R.	Target	Vertical	Stop before crossing.	5
Middletown, Ohio: B. & O. R. R.	Stop Boards	Stop	Stop. It must be known that crossing is clear before using.	
Middletown, Ohio: Armoo Steel Corp. Dump Track	Target	Target Vertical	Proceed indication— Target vertical. Red lights vertical by night. Normal posi- tion of target is against movement on Armco Steel Track.	
Hageman:	Stop Boards	Stop	Stop. It must be known that crossing is clear before using.	
Idlewild: N. & W. Ry.	Position Light Signal	Proceed	Cross without stopping.	4
Muncie: Nickel Plate R. R.	Target	Target Horizontal	Stop. Proceed indication— Target horizontal. Red lights horizontal by night. Normal position of target is against movement on P.R.R. Signal will be operated by conductor or engineman.	

NOTE 1. Eastward trains on No. 1 track and Westward trains on No. 2 track must not exceed a speed of 15 miles per hour and be prepared to stop approaching crossing, and upon receiving proper fixed signal and target indication may proceed over crossing without stopping.

NOTE 2. Target at Crooksville controlled by levers on ground equipped with switch lock and will be operated by trainmen.

NOTE 3. At Junction City trains on Pennsylvania Railroad tracks may proceed over B. & O. R. R. Crossing without stopping, at a speed not to exceed 15 miles per hour, when target is in vertical position.

Target controlled by crank equipped with mechanical time release.

NOTE 4. Push Buttons located in boxes in the vicinity of the signals governing movements over N. & W. Ry. Crossing and Dana Avenue, in service. When aspect Rule 292, FIG. AA is displayed, and no train on or approaching the crossing on N. & W. Ry., a member of the crew will operate the push button nearest the signal. After a predetermined time interval, the signal will display a proceed indication. Fixed Signal equipped to display aspects Rule 292, FIG. AA, Rule 290, FIG. AA and Rule 281, FIG. A, governing eastward movements over N. & W. Ry. Crossing and to N. & W. Ry. connection located 2911 feet east of Mile Post 53.

When trains are stopped and fixed signals governing movements over N. & W. Ry. or on N. & W. Ry. connection can not be cleared and no train approaching on the N. & W. Ry. and no other cause for detaining the train be known, the conductor or engineman must know that opposing signals are in stop position on N. & W. Ry., and provide full flag protection against trains on N. & W. Ry., after which train may pass fixed signal in stop position and proceed over crossing. Track cars will be operated in accordance with instructions for trains.

NOTE 5. C. & O. Railway Target Office closed from 11.00 P.M. Saturday to 11.00 P.M. Sunday. When office is closed, normal position of target is for movements on P.R.R.

#### CHICAGO DIVISION

			1	
Location	Movements	tc., Governing Over Crossings	Requirements	Note
		Indication or Position		
Becker: Crossing with C. & O. Ry.	Color Light Signals	Red—Stop Yellow— Proceed	Signal operated by ground lever.	1
Brighton Park: South Wye.	Semaphore	Vertical or green light	Stop. Signal aspect governs after stopping.	
Brighton Park: G. M. & O. R. R.	Semaphore	Vertical or green light	Stop. Signal aspect governs after stopping.	
Chicago, 26th St.: Ill. Northern.	Semaphore	Vertical or green light	Stop. Signal aspect governs after stopping.	
Chicago, 12th St.: B. & O. C. T. C. & N. W.	None		Stop. Proceed on hand signal, yellow flag or yellow light.	
Cummings Track, 106th St.: C. R. I. & P. C. W. P. & S.	None		Stop. It must be known that crossing is clear before using.	
Right of Way No. 1. Track to American Steel Foundry— I. H. Belt	None		Stop. It must be known that crossing is clear before using.	
Right of Way No. 3. E. J. & E.—I. H. B. Jet.	None		Stop. It must be known that crossing is clear before using.	

NOTE 1. In case of failure of the crossing apparatus, conductor or engineman must notify C. & O. Ry. Train Dispatcher by telephone and after obtaining his permission, may operate time release (Pushbutton), located in box adjacent to crossing, (locked with switch padlock), after which signal will display proceed indication.

Instructions for operation of time release posted in telephone box.

# Automatic Highway Crossing Protection on Sidings, Yard or other Tracks

1103-A2. At the following locations automatic highway crossing protection indicates the approach of a train:

#### BUCKEYE DIVISION

Track	Crossing	Location	Note
Siding	Center Street Cadiz Street	Jewett	
No. 6 and Storage Track	College Street	Newcomers- town	2
West Leg of Wye	River and Goodrich Streets	Newcomers- town	
Eastward and Westward Wye	State Street (Lake Div.)	Newcomers- town	4
Licking Eastward and Westward Siding	O'Bannon Avenue	Newark	
Licking Eastward and Westward Siding	Oakwood Avenue	Newark	
Licking Westward Siding	Cedar Street	Newark	1.4
Sidings	Cincinnati Avenue (first highway crossing west of Greene)	Xenia	
Siding	Riffle Street Hiddison Street	Greenville	
Industrial Lead and Yard Track (RI Storage) North Side	West Fifth Street	Richmond	
Eastward Movements Relay Yard Track	Cemetery Road	Hilliard	3
Westward Siding and New Storage Track	Bobmeyer Road	Mosler	2
Archer-Daniel-Midland Milling Co.	Sharon Road	Sharonville	
Putnam Siding	Pershing Road (Copper Mill Road) 4025 ft. west of M. P. 17	Putnam	2
Industrial	U. S. Route 35 (Barr Crossing) Woodbine Ave.	Just south of Clement	
N. & W. Ry. Connection	Dana Avenue	Cincinnati	
Broken Aro Mine Track	State Route 16	Trinway	

- NOTE 2. Eastward and westward movements approach crossing prepared to stop and must not move over crossing until it is known that automatic highway crossing protection is in operation.
- NOTE 3. Westward movements on this track must stop on track circuit which extends 70 feet east of crossing and crew must assure themselves that Crossing Protection is operating before proceeding over crossing.
- NOTE 4. Newcomerstown, State Street (Lake Division). Trains and engines using eastward and westward Wye tracks must know that the automatic highway crossing protection is operating before proceeding over the crossing or provide protection as required by Rule 103.

Push buttons for manually interrupting operation of automatic highway crossing protection located on north end of relay case.

#### DIRECTION OF MOVEMENT

Note 1-South or West

Note 2-North or East

## CONTROL DEVICE LOCATED

Note 3—East and North of Crossing Note 4—East and South of Crossing Note 5—West and North of Crossing Note 6—West and South of Crossing Note 7—On Telephone Pole Note 8—On Relay Case

Note 9—White Box on Station Platform Note 10—On Relay Case at Wash, St. Note 11—In tel. shelter box at Hay St. Note 12—West End Relay Case. Note 13—East End Relay Case

Note 14—Trabue Road—West of Marble Cliff. Push-button to interrupt operation of Automatic Highway Crossing Protection for westward movements on No. 2 track, may also be used to interrupt the operation of the flasher lights and gates immediately after eastward movement on No. 2 track has cleared the switch points east of crossing. When eastward movement on No. 2 track has cleared the switch points after entering No. 2 track from Dunp Track, push-button shall be operated to immediately interrupt the operation of the Automatic Highway Crossing Protection.

Note 15—Grandview Avenue—Columbus, Ohio. Trains and engines stopped in the vicinity of Grandview Avenue must notify the crossing watchman who will interrupt the operation of flasher lights. Crossing watchman must again be notified and flashers operating before movement is resumed over the crossing. Employes must not beckon for vehicles or pedestrians to cross tracks at this crossing while flasher lights are operating. Trains stopped west of Urlin Avenue, first crossing west of Grandview Avenue, must not move eastward over this crossing until crossing watchman has been notified that train is about to proceed. (Telephone Ring, I short, I long, I short.) The crossing watchman will then cause the flasher lights at this point to operate, after which the train may proceed over the crossing. Note 16—Urbans—Main Street. Train or engine must be at least 250 feet east of Main Street when cut out device is operated.

Note 17-Crossing watchman located in tower between 12th and 13th Street, on duty continuously.

Note 18-Block Operator Newman.

- NOTE 1. Westward movements stopping east of sign "CC", located 70 feet east of crossing, must be prepared to stop before passing over crossing unless automatic protection is operating. In event automatic crossing protection is not operating, protection must be provided as prescribed by Rule 103.
- NOTE 2. Eastward movements stopping west of sign "CC", located 70 feet west of crossing, must be prepared to stop before passing over crossing unless automatic protection is operating. In event automatic crossing protection is not operating, protection must be provided as prescribed by Rule 103.
- NOTE 3. Richmond—West Fifth Street. When indication of eastward home signal at Newman is stop, eastward trains on No. 1 track having sufficient cars to block West Fifth Street, will stop west of relay case located south of No. 1 track, 500 feet west of West Fifth Street.
- NOTE 4. Coshocton—Chestnut and Locust Streets. Eastward movements making station stop must stop clear of "CC" sign located 70 feet east of Main Street crossing. Push button located on station platform east side of Walnut Street must be operated before movement proceeds. Movements must then approach Chestnut Street prepared to stop, and must not move over crossing unless it is known protection is operating or crossing is protected as provided in Rule 103.
- NOTE 5. Coshocton—Main Street. Trains or engines making westward movement after operating trailing hand-operated switch, located 1300 feet west of Mile Post 122, west of Wally, must approach Main Street prepared to stop and must not move over crossing unless it is known protection is operating, or crossing is protected as prescribed in Rule 103.
- NOTE 6. Richmond-8th Street. Westward movements stopping east of Sign reading CC 40 feet east of 8th Street crossing must approach crossing prepared to stop unless automatic crossing protection is operating. In event automatic crossing protection is not operating, protection must be provided as prescribed by Rule 103.

Morgan Canning Company	Naomi St.	Edinburg
Bushrod-Linton Summit Secondary	State Rout 59	South of Linton
Shasta Coal Corp.	State Route 67	South of Howard (See Note 3)
Wye Track	Henrietta St.	Effingham

NOTE 1. All movements before obstructing Highway crossing must stop clear of crossing, and member of crew must operate traffic light signal control switch to opposite position causing traffic light signals to indicate RED for Highway traffic. Control switches are located in boxes on telephone poles either side of crossing and protection may be started or released from either control box.

Traffic light signals must indicate RED for Highway traffic at least twenty seconds before proceeding over or blocking the crossing and must remain RED while any part of train, engine or other equipment is obstructing the crossing.

If traffic light signals governing Highway traffic fail to indicate RED, a member of the crew must be stationed on the crossing and provide protection to pedestrian and vehicular traffic.

NOTE 2. Trains and engines must stop at Hackley Avenue crossing at grade and no movement may be made over the crossing until motor-vehicular traffic has been flagged to a stop or crossing is protected by a member of the crew using the following signal appliances during periods indicated:

During daylight hours when flag signals can be plainly seen—Red flag.

During dawn, dusk, night and when flag signals cannot be plainly seen—lighted fusees, which will be left in the roadway on both sides of the crossing while movement is being made over the crossing.

NOTE 3. In addition, at night and when weather conditions obscure vision, trains and engines using Shasta Coal Corp. track south of Howard will place lighted fusee on each side of track before moving over these crossings.

1103-C2. At the following locations, special precaution must be taken with respect to the operation of automatic highway crossing protection, as indicated:

Location	Crossing	Track	Note
Lincoln Park	Garfield Ave.	Penford Secondary Track Yard Connection	1
Tiffin	Market and Perry Sts.	Main ·	2
Tiffin	Market and Perry Sts.	B.&O. Transfer	3
Tiro	Main Street	Industrial	4
Tiro	Route 98	Industrial	4
New Washington	Kibler Street	Industrial	4
New Washington	Willocker Street	Industrial	4
New Washington	Bucyrus Street	Industrial	4
New Washington	First Street	Industrial	4
New Washington	Mansfield Road	Industrial	4

NOTE 1. Crews of trains and engines making southward movement over crossing on Lincoln Yard connection, and then making northward movement over crossing on Penford secondary track, must provide protection as prescribed by Rule 103.

ary track, must provide protection as prescribed by Rule 103. Southward trains and engines on Lincoln Yard connection that will be delayed, must stop north of the yellow stripes on rail and ties 70 feet north of crossing to avoid unnecessary operation of flasher lights. When starting from yard connection, crews should assure themselves that flashers are working before fouling crossing, or provide protection as prescribed by Rule 103.

- NOTE 2. Northward trains approaching home signal in stop position that will block Perry or Market Streets should bring train to a stop at a point 300 feet south of Perry Street, designated by a yellow stripe painted on outside of each rail. Trains stopping at this point must not proceed over crossing, unless gates and flashers are known to be operating, without providing proper protection.
- NOTE 3. Movement must not be made over either crossing until it is known that gates are lowered and flashers are operating. In the event that gates and flashers do not operate, a member of the train crew must operate gates and flashers manually, by opening a switch, located in box, painted aluminum and locked with switch lock, on north end of relay case at Market Street and on south end of relay case at Perry Street and leave switch open until movement is completed, then close switch and lock the box.
- NOTE 4. Trains and engines must stop before passing over these crossings and a member of the crew must protect the crossing in advance of each movement over the crossing, unless it is known that Automatic Highway Crossing Protection is functioning properly.

### ALL DIVISIONS

1103-C3. Before and after making movements over crossings at following locations, a member of the crew must, during times indicated, manually operate crossing protection by means of apparatus located on adjacent instrument case or post, or provide protection as prescribed by Rule 103.

Track	Crossing	Location	Period Manually Operated by Crews
Main	Indiana Ave. Broadway Stull St.	South Bend	Continuously. See Note 1.
Freight House Lead	Madison Ave.	Gary	Continuously.
Right of Way No. 3	Indianapolis	East Chicago	Continuously. See Note 3.
All tracks ex- cept Main and running Track	Crosstown Pkwy. Walnut St. Gibson St. Parson St.	Kala- mazoo	Continuously. See Note 2.

Siding	Cork Street	Kala- mazoo	Continuoualy.
Muncie Yard runing track	McGalliard Road	Muncie	Continuously.
Storage Track	Cement Road	Lime- dale	Continuously.

NOTE 1. Apparatus to manually operate highway crossing signals at Indiana Ave., Broadway, and Stull St. simultaneously located in boxes at Indiana Ave. and Stull Street. Apparatus to manually operate highway crossing protection at Indiana Avenue only located in box on bottom of watch tower Indiana Avenue.

NOTE 2. Apparatus at Parson Street, Kalamazoo, Michigan, operates simultaneously highway crossing signals at Parson Street, Bush Street and Patterson Street and must be operated when movement is to be made across any of these streets on any track other than main or running track. It must also be operated when movement is to be made from side track to main track at Parson Street.

NOTE 3. Control box located at each signal and at 3 locations on industrial tracks west of Indianapolis Boulevard.

### ALL DIVISIONS

1103-C4. Before and after making movements over crossings at following locations, a member of train or engine crew must manually operate flasher lights by means of a hand switch located on adjacent instrument case or post. At crossings as indicated, cars must not be left standing on short track circuits on siding or yard tracks, whose limits are marked by yellow stripes on rails, within the limits of which flashers or gates operate automatically.

Track	Location	Crossing
Yard	Xenia	Columbus Street
Yard	Clement	Smithville Road
Yard	Richmond	6th Street
Sidings	Hartford City	Washington Street
Storage North Side	Gas City	Main Street

Track	Location	Crossing
Industry North Side	Sweetser	Main Street

Kinney Industrial Track	Walker	Walker Road

1103-C6. All movements on Court Street Secondary Track or south Wye track, Hageman must approach U.S. 42 Crossing prepared to stop, and no movement permitted to obstruct any portion of the highway until it is known that highway crossing guards are operating, otherwise a member of the crew must protect the crossing in advance of each movement over the crossing.

### 1103-C9.

### GAS CITY-

Main Street

Trains stopping at Gas City to set off or pick up cars at Strawboard Track, first switch west of passenger station, No. 1 track, must not make movement over highway crossing at Main Street, first crossing east of passenger station, unless signals are in operation and gates are in proper position or the movement is protected in accordance with Rule 103.

### HOBART-

Illinois Street

Linda Street

Apparatus to interrupt the operation of automatic highway crossing signals for movements on Main Tracks over Illinois and Linda Streets, are in charge of Operator, Bart. When shifting movements are to be made to or from sidings, E. J. & E. Connections from No. 2 track, house track, or when a train is stopped on either main track and the crossing is clear and highway crossing signals are operating unnecessarily, trainman must call operator at Bart to interrupt the operation of highway crossing signals for the main track which is to be occupied.

When operator has been notified to interrupt the operation of automatic highway crossing signals no movement must be made over the highway crossings by their train until the automatic operation of the crossing signals has been restored or the movement is protected as provided by Rule 103.

#### GARY--

Virginia Street

When switches of crossover between No. 1 and No. 2 tracks west of Virginia Street, or switch leading from No. 1 track to Industrial Lumber and Supply Company's track or from No. 2 track to Bear Brand track are reversed, and no part of train is on either main track within 800 feet west of crossing, gates will raise automatically. It will not be necessary for crews shifting on No. 1 track in the vicinity of Adams Street to operate gates manually.

21st Avenue

Broadway

Washington Street

Adams Street

Massachusetts Street

Apparatus to interrupt the operation of the automatic highway crossing signals for movements on main tracks are in charge of crossing watchman at Broadway. When shifting movements on main track are made in vicinity of these crossings, or when a train is stopped on main track and the crossing is clear and highway crossing signals are operating unnecessarily, trainmen must call crossing watchman at Broadway to cut out automatic highway crossing signals for the track which is occupied. When crossing watchman at Broadway has been notified to cut out the operation of automatic highway crossing signals, no movement must be made over crossing until protection is provided as prescribed by Rule 103 or the automatic operation of these signals has been restored.

#### Harrison Street

Apparatus to interrupt the operation of the automatic highway crossing signals and gates for movements on main tracks are in charge of crossing watchman at 17th Avenue.

When a train is stopped on main track and the crossing is clear and highway crossing signals and gates are operating unnecessarily, trainmen must call crossing watchman at 17th Avenue to cut out automatic highway crossing protection for the track which is occupied.

When crossing watchman at 17th Avenue has been notified to cut out the operation of automatic highway crossing protection, no movement may be made over the crossing until protection is provided as prescribed by Rule 103 or the automatic operation of the crossing protection has been restored.

Apparatus to manually interrupt the highway crossing protection at Harrison Street is located in a box on instrument case, south side No. 1 track, west of Harrison Street.

#### 15th Avenue

It will not be necessary for crews shifting between Adams and Jackson Streets to operate gates manually.

### 5th Avenue

Highway crossing signals and gates protecting highway traffic on 5th Avenue and Industrial Avenue over The Budd Company Chase Plant Track are manually operated, controlled by crossing watchman at 5th Avenue. Before movements on The Budd Company Chase Plant Track are permitted to occupy the portions of the track between signs marked "CC" located 70 feet east of and 70 feet west of the highway, crossing watchman, 5th Avenue must be informed and it must be known highway crossing signals and gates are operating or the movement is protected as provided by Rule 103. Cars must not be left standing on Budd Company Chase Plant Track between "CC" signs.

### MAHONING-

### Riley Road

Highway crossing signals and gates operate automatically for movements with or against the current of traffic on main tracks, siding, Riley Road North Yard storage track and for westward movements on Riley Yard Lead.

They must be operated manually by a member of the crew before eastward movement over crossing is made on Riley Yard Lead or Right of Way No. 3.

Push buttons for the manual operation of highway crossing signals and gates are located in boxes on posts east and west of highway, south of eastward siding.

### NORTH JUDSON-

Main Street

Sycamore Street

Apparatus to manually operate the highway crossing signals for movements on industrial tracks are located in boxes at Sycamore Street. Operator in interlocking station will control highway crossing signals for through or switching movements on eastward siding.

#### LANSING-

Ridge Road

When switch leading to Meeter's Track is reversed, and no part of a westward train on No. 2 track is within 528 feet of the highway crossing, gates will raise automatically.

#### WEST PULLMAN-

118th Street

Highway crossing signals are manually operated by crossing watchman at 119th Street. When shifting movements are made in vicinity of this crossing, or when a train is stopped and the crossing is clear and highway crossing signals are operating unnecessarily, trainmen must call crossing watchman at 119th Street to interrupt the operation of the highway crossing signals. When crossing watchman has been notified to interrupt the operation of highway crossing signals, movement must not be made over crossing by their train until protection is provided as prescribed by Rule 103 or the operation of the signals has been restored.

### CUMMINGS TRACK-

100th Street

Highway crossing signals and gates are manually controlled. Control switch located on south side of highway crossing. All movements must stop and place signals and gates in operation before crossing highway. After gates are down and train movement has occupied the highway crossing, control switch must be restored to normal position. Highway crossing signals and gates will automatically restore to normal position after train has cleared the highway crossing.

#### CALUMET RIVER LINE—

100th Street

Highway signals and gates must be manually operated for all movements except westward movements on secondary track. Control switches to manually operate highway crossing signals and gates located north of tracks west of highway crossing. Movements south of tracks east and west of highway crossing. Movements must not be made over highway crossing unless signals are in operation and gates in proper position, or the movement is protected in accordance with Rule 103.

### WOLF LAKE-HAMMOND TRACK-

Avenue "O"

All movements must approach highway crossing prepared to stop, and no movement permitted to obstruct any portion of the highway until it is known highway crossing signals are operating, otherwise the movement must be protected in accordance with Rule 103.

### KALAMAZOO-

Cork Street

Before movements on siding at Kalamazoo are permitted to occupy Cork Street Crossing, a member of the crew must open knife switch in box on instrument case, located in southeast corner of crossing, to start operation of highway crossing protection. Switch must be restored to closed position after movements over Cork Street are completed.

1103-C10. At Terre Haute, before making a switching movement over any highway crossing protected by highway crossing signals, it must be known that such signals are operating, and when movements are completed, crossing watchman in charge must be notified.

1103-C11. Trains and engines in Louisville, before crossing intersecting streets, at grade, where crossing watchmen are stationed, must stop unless crossing gates are lowered crossing watchman has stopped street traffic and not proceed until protection is provided as prescribed by Rule 103.

# 1103-C14. U.S. HIGHWAY CROSSING 52, NORTH OF COLFAX

Trains and engines must approach crossing, U.S. Highway 52, under control and observe if highway crossing signals are operating properly before passing over crossing. If signals are not flashing, trainmen will open metal box located on instrument case south of crossing, push button, hold same and observe lights flashing until movement over crossing is completed.

### 1103-C15. MADISON-COLUMBUS SECONDARY TRACK, NORTH VERNON

Control switch located in box marked P.R.R. on west side of track on each side of Walnut Street, North Vernon, for the operation of highway traffic light signals.

Trains and engines must not move across Walnut Street until switch has been operated to cause traffic light signals to flash red. Traffic signals must be observed to be flashing red for at least five seconds before starting movement across crossing. If operating switch fails to cause traffic signals to flash red, member of train or engine crew must protect the crossing in advance of each movement over the crossing. After movement over the crossing has been completed, switch on either side of the crossing shall be operated to restore the traffic signal to normal operation.

Operation of switch on either side of crossing will start lights to flash red and either switch may be operated to restore lights to normal operation.

Any failures in the operation of the lights after following the above instructions should be reported to the Superintendent.

### 1103-C16. CAMP ATTERBURY INDUSTRIAL TRACK

Trains and Engines must approach all crossings protected by automatic highway crossing protection prepared to stop until it is known that crossing protection is operating properly.

1103-C17. Vandale—Westward trains receiving stop signal on No. 2 track at Vandale Interlocking will stop east of CC sign, located 1764 feet west of Mile Post 338.

1103-C18. Maynard—Westward trains on No. 2 track receiving a stop signal at Maynard Interlocking or having cars to set off or pick up at National Brick Co. or Grand Trunk Western Railroad Interchange must not leave engine or cars standing on No. 2 track west of CC sign, 637 feet east of Calumet Ave. Engine or cars must not be left standing on National Brick Co. track west of CC sign, 89 feet east of Calumet Ave.

1103-C19. Valparaiso—To prevent unnecessary operation of highway crossing protection at Greenwich Street, Valparaiso and equipped crossings west of Greenwich Street, westward

trains or engines on No. 2 track must not leave cars standing west of CC sign located 300 feet east of Greenwich Street.

1103-C20. Lima—To prevent unnecessary operation of highway crossing protection at Main St., Lima, eastward trains or engines on No. 1 track must not leave cars standing east of CC sign located 450 feet west of Main St.

To prevent unnecessary operation of highway crossing protection at North West, McDonald and Metcalf Streets, Lima, westward trains or engines on No. 2 track must not leave cars standing west of CC sign located 270 feet west of Main St.

To prevent unnecessary operation of highway crossing protection at Jackson and Pine Streets, Lima, eastward trains or engines on No. 1 track must not leave cars standing east of CC sign located 175 feet west of Jackson St.

When a westward movement occupies No. 2 track east of CC sign, located 50 feet east of Main Street, for a period longer than one (1) minute fifteen (15) seconds, the crossing gates at Main St. will raise automatically and before the movement may again proceed westward on No. 2 track gates at Main St. must be lowered by operating one of the control devices located in box on post north side of No. 2 track, 333 feet east of interchange track, in box on post, north side No. 2 track, 124 feet east of interchange track, or in box on instrument case north side of No. 2 track, east side of Main Street.

- 1103-C21. To prevent unnecessary operation of highway crossing protection at Torrence Avenue, trains or engines moving west on No. 2 track to clear Bernice Interlocking must, when practicable, stop east of CC sign.
- 1103-C22. Sturgis-Wasepi—Northward trains having cars to set off or pick up at Nottawa, Michigan, will stop south of CC sign, 2050 feet north of Mile Post 157 when rear of train is to be left on main track. Sufficient distance must be left to assure engine will be south of CC sign when recoupled to train before continuing northward.
- 1103-C23. Linker—To prevent unnecessary operation of highway crossing protection at Linker's Road, cars must not be left standing on No. 1 Main Track within 1500 feet west of the crossing.

Fields (Note 3)	Crossovers and Yard Tracks	
Sherman Drive Hawthorn Yards (Note 2)	201 lead switch, 202 lead switch, pocket switches, wye switch on outbound wye, crossover switches between westward running track and eastward running track, west switch 225 track, west switch new lead, west switch tracks 300-302-304-306-310, 300 yard lead switch, shop lead switch, and derails on 201 lead, eastward running track, westward running track, and crossover between eastward and westward running track.	

NOTE 1. Switch tenders, will use a green flag by day and a green light by night to govern eastward movements; a yellow flag by day and a yellow light by night to govern westward movements.

NOTE 2. Switch tender will use signals as provided by

Rule 37.

NOTE 3. Operator-Switch tender at Fields will use a green flag by day and a green light by night to govern eastward and northward movements; a yellow flag by day and a yellow light by night to govern westward and southward movements.

NOTE 4. Switch tender in service only when Yard B hump

crew is on duty.

# 1104-C1. Operators in Charge of Main Track Hand-operated Switches when Block Station is Open

Location	Switches	
Neilston	End of two main tracks, crossover No. 97 track to No. 1 track, and de- rail in No. 97 track.	
Dennison Ave.	C. & O. connections and crossovers.	
Cliff	Crossovers between secondary tracks and lead track.	
Oasis	Crossovers between secondary tracks: Leads to yard tracks; Eggleston Ave. L. & N. tracks; and Street connection track.	
Bremen	Switch at Junction P.R.R. and N.Y.C.R.R.	
New Lexington	Switch at Junction P.R.R. and N.Y.C.R.R.	
EC	Crossover between No. 4 and No. 3 tracks. Switch in No. 3 track leading to Englewood Connecting Line Secondary Track. West Switch east wye.	
Eads	Main track switches.	
Dale	Switch at south and west end southwest Wye.	
Pine	Crossover switches between LaSalle St. Yard and Wye tracks.	
Frank	Switches at Block Station.	
H	Switch at North end of siding.	
Hervey City	Switch at junction with I. C. R. R.	

Trains and engines must approach hand-operated switches where operators are stationed prepared to stop clear of any switch or route unless signal to proceed is received from operator.

If necessary to change any route for which proceed indication has been given to an approaching train or engine, switch must not be changed nor proceed indication given for any conflicting movement until train or engine for which proceed indication was first given, has stopped.

Trains and engines approaching switches on main NOTE 1. track will be governed by fixed signal indication.

# 1104-C2. Switch Tenders, other than P. R. R. employes, are stationed at and have charge of Hand-operated Switches as Indicated

Location	Switches
Neilston: B. & O.—North side	No. 17 switch and all switches north and east thereof including No. 19.
Fourth Street Switches: B. & O.—South side	No. L-2 switch and all switches south and west thereof.
Columbus Union Depot— West end	All switches.
Columbus Union Depot— East end	All switches including switches west of No. 2 track combination switch and north of P.R.R. westward track.

NOTE—Switch tenders will use a green flag by day and a green light by night to govern eastward movements; a yellow flag by day and a yellow light by night to govern westward movements.

### Hand-Operated Switches Equipped With Electric Locks

1104-D1. The following switches are equipped with electric lock; permission to unlock must be obtained from operator before switch padlock is removed from keeper.

<u> </u>	1	1

NOTE When these switches are to be used following procedure must be observed, to prevent equipment failure and delay:

- (a) Portion of train must occupy main track or siding within one hundred feet immediately ahead of switch points.
- (b) Contact operator for permission to use switch, then remove switch lock.
- (c) Report back to operator after switch lock is removed. Operator will then release the electric lock.
- (d) Restore switch and switch lock to normal position after used and report same to operator.

1104-D2. The lock, not control	following switches are equipped with electric led by operator:
Location	Switch
Miami Crossing, west of	Westinghouse Co., south side Crossover between No. 1 and No. 2 tracks

### 1151-B2. Station tracks Richmond designated: A-B-C-D-E.

NOTE-Tracks are lettered from south to north.

1151-C1.	Secondary	Tracks of	Assigned	Direction
----------	-----------	-----------	----------	-----------

Track	From	То	Assigned Direction	Controlled by	Notes
No. 101	Uhrich	Dyke	Eastward	Uhrich	1
No. 1	Olentangy	Fourth St.	Eastward	High St.	2, 4, 5
No. 2	Third St.	Olentangy	Westward	High St.	3, 4
No. 3	Newman	Glen	Eastward	Newman	6, 7
No. 4	Glen	Newman	Westward	Glen	7
No. 1	Oasis	Cliff	Eastward	Train Dispatcher	9
No. 2	Rendcomb Jct.	Oasis	Westward	Train Dispatcher	

- NOTE 1. Eastward movements made on signal indication at Uhrich. Permission must be obtained from Uhrich to use this track at any point between Uhrich and Dyke, except as provided in Special Instruction 1037-A1.
- NOTE 2. Eastward movements made on signal indication at Olentangy, Dennison Avenue or High Street. Permission must be obtained from Train Dispatcher, through operator at High Street or Dennison Avenue, to use this track at any point between Olentangy and Fourth Street.
- NOTE 3. Westward movements will be made on hand signal from switchtender at Third Street (UD Company). Switchtender must first secure permission from operator U. S. Tower (B & O RR), who in turn must secure use of track from PRR train dispatcher, through operator High Street.
- NOTE 4. Reverse movements on these tracks may be made when authorized in writing on message blank in following form:

Superintendent Transportation

Operator at Dennison Avenue, High Street or U. S. Tower (B&ORR) will arrange and sign authority for such movements under direction of PRR Train Dispatcher.

- NOTE 5. Movements clearing in Miami Yard must be reported clear to operator at High Street. Movements clearing in Stone Track must be reported clear to operator at Dennison Ave.
- NOTE 6. Eastward movements made on signal indication at Newman. Permission must be obtained from Newman to use this track at any point between Newman and Glen and when movement has been completed it must be reported clear unless the switch involved is operated by the operator.
- NOTE 7. Westward movements made on signal indication at Glen. Permission must be obtained from Glen to use this track at any point between Glen and Newman and when movement has been completed it must be reported clear unless the switch involved is operated by the operator. Westward movements will stop clear of all switches and routes at 19th Street, and not proceed unless route is seen or known to be clear and switches in proper position. Westward trains having sufficient cars to block street crossings if stopped between 19th Street and Newman, will not pass 19th Street without permission from operator at Newman.
  - NOTE 9. Eastward movements from L. & N. Bridge to

Oasis will be made on fixed signal indication in lieu of verbal permission.

Permission must be obtained from Kraft to use this track at any point between Kraft and Van Jct. (Belt Ry.) and when movement has been completed it must be reported clear.

Operator must keep a record for running tracks under their jurisdiction and record thereon all movements, showing engine number, direction, place, and time track is occupied or cleared.

#### FREIGHT TRAIN OPERATION

## Instructions For Preparation and Handling of Freight Trains on Grades, etc.

1155-A1. The following instructions, supplementary to the Brake and Train Air Signal Instructions No. 99-D-1, in the handling of freight trains, will apply:

Trains having 25% or more of the cars in the train loaded with mineral freight or grain will be considered mineral freight

trains.

When in the judgment of the engineman the additional use of retaining valves is required, or their use is desired on grades other than specified, he will instruct the conductor.

At locations where the use of retaining valves is necessary train must be stopped before they are turned up or down.

Retaining valves will be used in descending the following grades as specified:

#### Akron Secondary Track:

#### Baddow Pass to Glenmont and Brink Haven.

Except trains having engines equipped with operative Dynamic Brake and Pressure Maintaining feature.

1155-C1. Referring to Rule 4155-C, hog drenchers located as follows:

Columbus—North side of hump-lead 50 feet east of yard office, Yard A.

- 1155-C3. Trains must not be permitted to block the public grade crossings at Cadiz and Center Streets, Jewett longer than is absolutely necessary.
- 1155-C4. Trains must not be permitted to block the public grade crossings within the city limits of Newark, Ohio, particularly Main Street, any longer than is necessary.
- 1155-C7. Elsinore—Oak Street. The movement of trains and engines through tunnels No. 1 and No. 2 is governed by fixed signals, which operate automatically. When stop signal Rule 292, FIG. B is displayed, trains and engines must not pass unless authorized by Yard Master McCullough and then only under flag protection.
- 1155-C8. When fixed signal No. 1553 governing westward movements on No. 2 track at Licking displays an indication less favorable than approach medium, Rule 282, FIG. A, trains with more than 20 cars and less than 110 cars will stop clear of "CC" sign located 2163 feet west of Mile Post 156. Trains with more than 110 cars will stop clear of Oakwood Avenue crossing.
- 1155-C9. When fixed signal No. 1179 governing westward movements on No. 2 track east of Oasis displays indication less favorable than clear, Rule 281, FIG. A, train will stop to clear east switch of crossover and Conductor or Engineman will report via telephone to operator at Oasis for instructions.

1155-C10. Eastward freight trains will stop west of Main Street, at Zanesville and keep clear of street crossing unless route is clear over B. & O. R. R. Crossing into yard.

1155-C11. Cars must not be left standing on Trinway Eastward Siding east of west end of eastward station platform.

1155-C12. Except where signal indication governs the use of No. 88 or No. 90 tracks, movements will be governed by instructions from Terminal Yard Master.

Trains and engines clearing in No. 88 or No. 90 tracks must report clear to operator at High Street.

#### Doubling Lights

1155-D1. Undercliff Yard, doubling lights—Yellow lights facing east and west, located on pole 900 feet east of Beechmont Ave., on Foot Bridge at Hutton St., on Signal Bridges Rendcomb Jct., all controlled by toggle switch located in box near stairway west of Beechmont Ave.

Yellow lights facing east and west, located on pole east of Carroll Street, south side of track, controlled by toggle switch located in telephone shelter box 670 feet east of Cliff Block Station.

These lights are to assist crews in doubling trains using the following code of signals.

One long flash-Stop.

Two short flashes-Move Forward.

Three short flashes-Move Backward.

Four short flashes—Apply or Release Air Brakes.

1155-D2. Idlewild—Avondale. Color Light Switching Signals (N. & W. Ry.) Color light switching signal located on north side of track 281 feet west of Blair Avenue and Color light switching signal located on south side of track 387 feet east of Blair Avenue, to assist in making interchange movements in service.

Switches controlling these signals located in telephone boxes, 15 feet east and 1180 feet east of Blair Avenue and will be used to display indications as follows:

Off-No Light.

Proceed-Yellow.

Stop-Red.

Back Up-Flashing Red.

NOTE—The lever of the control switches must be left in OFF position and telephone boxes closed, when not in use.

1155-D3. Richmond Yard, doubling lights—yellow lights facing east and west, located on north side of Signal Bridge 1189-1190, controlled by a push button located on the southwest corner of the switch tenders office at 19th Street, in service.

These lights are to assist crews in doubling trains using the following code of signals:

One long flash

Stop

Two short flashes

Move Forward Move Backward

Three short flashes Four short flashes

Apply or Release Air Brakes

#### FREIGHT AND PASSENGER TRAIN OPERATION

#### 1156-D4. Brake and Train Air Signal Instruction.

At Columbus, Ohio for through Passenger Trains, Train brake test will be made in accordance with second paragraph Instruction 11 of the Brake and Train Air Signal Instruction 99-D-1, revised August 1, 1958.

#### PASSENGER TRAIN OPERATION

#### Locking of Toilets

1154-A1. Trainmen of passenger trains will lock all toilet doors before arriving at Logansport. Doors will be unlocked after departing Logansport.

# BACK-UP MOVEMENTS CHICAGO UNION STATION

- 1154-A4. The following instructions will govern employes assigned to the handling of back-up movements of passenger equipment between 12th Street Passenger Yard and Chicago Union Station:
  - 1. Only employes having passed satisfactory examination on:
    - (a) Brake and Train Air Signal Instructions No. 99-D-1,
    - (b) Rules for Conducting Transportation for promotion to conductor,
    - (c) Operating Rules of Chicago Union Station Company,
    - will be permitted to control back-up movement of passenger equipment from 12th Street Passenger Yard to Chicago Union Station by use of back-up hose or back-up valve.
  - 2. The pressure maintaining feature on all diesel locomotives must be cut out at all times, when making back-up movement of passenger equipment between 12th Street Coach Yard and Chicago Union Station.
  - 3. Before leaving 12th Street Passenger Yard, air brake test must be as prescribed in Instruction 11-b of Brake and Train Air Signal Instruction No. 99-D-1.
  - 4. When movement is to be controlled with a back-up hose, the brake pipe hose must be blown out before being coupled to the back-up hose.
  - 5. Before back-up movement is made, the employe who is to handle movement must identify himself to the engineman.
  - Employe in charge of back-up movement must know back-up hose or back-up valve is in operative condition.
  - 7. Communicating signal will be used to start back-up movement. If communicating signal cannot be used, employe in charge of movement must have a proper under standing with engineman as to manner in which movement will be started.
  - 8. Running test must be made with back-up hose or backup valve within 300 feet after movement is started. If running test is not made, engineman must stop movement and ascertain cause.
  - 9. Numbered signs placed on east side of C.B.&Q. Railroad Freight House, designated 20, 18, 16, 14, and signs attached to supports under Harrison Street Viaduct and roof of train shed designated 12, 10 and 8.

    The lead car of a backup movement consisting of a 3-unit diesel shoving cars all of which are 85 feet in length into
    - diesel shoving cars all of which are 85 feet in length into station, will be 200 feet from bumping block at end of track when the cab of the east diesel unit passes sign corresponding to number of cars in movement.
  - 10. If application of brakes has not been initiated by employe in charge of back-up movement when cab of east diesel unit passes sign corresponding to number of cars in movement, engineman must immediately bring movement to stop by use of automatic brake valve.
  - 11. After stop has been made, train must not be backed further until proper signal has been received from employe in charge of back-up movement.

#### FREIGHT TRAIN OPERATION

- 1155-C1. Freight trains using south-west wye Van to make reverse movement into Yard C must separate train to clear Cliff Drive highway crossing located at south end of Wabash River Bridge unless arrangements are made to immediately start reverse movement.
- 1155-C2. Unless otherwise instructed, westward freight trains passing Anoka on No. 2 track must stop at heading in switch at Yard A and call Yardmaster for instructions.
- 1155-C3. To avoid blocking of public street crossings in the city of Dunkirk, trains with more than 90 cars receiving a signal indication less than clear, Rule 281, FIG. A, at automatic signal No. 1304, will communicate with Ridgeville Block & Interlocking Station before passing the trailing switch located 590 feet east of Mile Post 129.

## FT. WAYNE DIVISION FREIGHT TRAIN OPERATION

To avoid blocking street crossings in the City of Kalamazoo, freight trains with over 25 cars not receiving clear signal aspect, Rule 281, FIG. A, at Signal 1842, will stop at Signal 1842, contact "BO" Interlocking and will proceed only when informed that they may proceed through the City of Kalamazoo without stopping.

To avoid blocking street crossings in the city of Kendallville, southward trains not receiving a clear signal aspect on distant signal No. 1215 and northward trains not stop at distant signal aspect on distant signal No. 1192, must stop at distant signal and contact operator at Avilla Block Station who will arrange for PRR Dispatcher to contact N.Y.C. RR Dispatcher to determine when train may proceed without stopping at crossing.

1155-C6. To prevent the unnecessary blocking of street crossings in Mansfield, westward freight trains on No. 3 track

with more than 15 cars will be governed as follows:
An indicator is located on telephone pole north of No. 3 track, 10 feet from ground, 1950 feet east of Mile Post 175.
When the home signal at Mansfield on No. 3 track displays a proceed indication, Indicator will display a lunar white light and trains may proceed. In the absence of light in the Indicator trains will stop and communicate with operator at Mansfield from telephone located on pole below the Indicator.

1155-C7. Westward freight trains having work at Mansfield will be governed by an illuminated sign located on pole on north side of tracks, opposite Lucas Block Station. Letter R displayed, stop at Ross, letter L displayed, stop at Lynch and call Yard Master at Mansfield for instructions.

Operator at Mansfield Block Station will issue instructions

before passing crossover at Lynch.

#### SOUTHWESTERN DIVISION

#### FREIGHT TRAIN OPERATION

Instructions for Preparation and Handling of Freight Trains on Grades, etc.

Columbus-Madison Secondary Track. (Madison Hill.)

Conductors and enginemen who have not handled trains on this grade for a period of one year or more will be required to qualify on the grade before being allowed to run over the terquality on the grade before soing answer to the control of the con representatives.

Only ES-15A type Diesel engine, equipped with operative dynamic brake, pressure maintaining feature, and rail washing device, will be used to handle trains between derail located 4570 feet south of Mile Post 42 and Bridge 44.14 (Main Street, Madison). The engine must be operated at the south end of train, unless otherwise instructed by Superintendent Transportation.

Trains in either direction must not exceed 15 (cars) or 350 gross tons or 51 gross tons per effective brake, exclusive of the engine, unless otherwise instructed by Superintendent Transportation. Movement of light diesel engine is prohibited.

Air brake equipment on the diesel-electric locomotive must be inspected, tested and repaired in accordance with Instrucbe inspected, tested and repaired in accordance with a tions pages 11 to 15, inclusive, Brake and Train Air Signal Instructions No. 99-D-1. The dynamic brake apparatus must be inspected and maintained in good operating condition. The be inspected and maintained in good operating condition. The Enginehouse Foreman must at all times know these Instructions are followed. The engineman must inspect and test the air brake equipment on his locomotive and know that the rail washing equipment is in operating condition, prior to departure from the engine terminal, and again after coupling to train prior Train Air Signal Instructions No. 99-D-1. A further test must be made of the effectiveness of the dynamic brake apparatus, brake pipe pressure maintaining feature and rail washing equipment, prior to descending the grade.

Prior to operating on the grade, the engineman must check and know that the diesel engine has sufficient fuel oil, cooling water, and lubricating oil (with engine at operating temperature, and running at idle speed, lubricating oil must be at least two (2) inches above low mark on dipstick).

The air brake equipment on all cars dispatched for movement between North Madison and Madison must be inspected and be in operative condition in accordance with Brake and Train Air Signal Instructions No. 99-D-1. The engineman and conductor moving trains between North Madison and Madison must know that the air brake equipment on the engine and cars is in serviceable condition to safely handle the train.

The following instructions, supplementary to the Brake and Train Air Signal Instructions No. 99-D-1 on handling freight trains will apply:

After assembling train to be moved North Madison to Madison the brake pipe pressure must be increased to 110 pounds and air brake tested in compliance with the Brake and Train Air Signal Instructions No. 99-D-1. After the air brake has been tested, the conductor must observe the brake pipe pressure on the cabin gauge and if it is 105 pounds or more will give a signal to proceed and if less than 105 pounds will give signal to apply the brakes and train will not be started until the required brake pipe pressure has been obtained. A running test of the air brakes must be made approaching the derail located 1155 feet south of North Madison Station and train stopped. While stopped at this point train air brakes must be released and handles of pressure retaining valves on all loaded cars must be placed in high pressure position, and in low pressure position on all empty cars.

If the brake pipe pressure on the engine drops to 85 pounds from any cause the train must be stopped. If the brake pipe pressure on the cabin drops to 80 pounds from any cause the train must be stopped. Train brakes will not be released after stop until a sufficient number of hand brakes are applied to secure the train. Hand brakes must not be released until it is known the brake system has been charged.

After passing derail and while on grade:

- (a) The dynamic brake must be manipulated to obtain maximum dynamic braking effect, without allowing the load-meter to go above 700 amperes. The train speed will be controlled by supplementing the dynamic brake with the train air brakes.
- (b) While descending grade, the train air brakes and the dynamic brake must be manipulated to avoid speed in excess of eight (8) miles per hour at any point on the grade and a minimum running time of twelve (12) minutes from the derail to Bridge 44.14 must be observed.
- (c) If a condition arises making the use of hand brakes necessary, the engineman will give the prescribed signal for brakes to be applied from the train. Trainmen, when practicable, will apply hand brakes. Hand brakes and conductor's valve are to be applied in accordance with Paragraphs 19 and 19A of the Brake and Train Air Signal Instructions No. 99-D-1.
- (d) If the Diesel engine stops, dynamic brake becomes inoperative, or an electrical failure develops while on the Hill, the movement must be STOPPED and all hand brakes applied. The train must not be started until the Diesel engine is operating properly, the brake system charged, and proper main reservoir pressure established, unless otherwise authorized by Superintendent Transportation.
- 1155-A3. At Junction with Illinois Terminal Railroad South and North Morton:

Hand-operated switches at South Morton and North Morton to be left lined for Pennsylvania Railroad track.

Southward trains on Illinois Terminal Railroad must stop at North Morton and obtain permission to use the track between North Morton and South Morton from the Operator at Vigo.

Northward trains on Illinois Terminal Railroad must stop at South Morton and obtain permission to use the track between South Morton and North Morton from the Operator at Vigo.

Trains and Engines on both the Pennsylvania Railroad and Illinois Terminal Railroad must report clear after using track between South Morton and North Morton to the Operator at Vigo.

Trains and Engines must proceed at restricted speed between South Morton and North Morton.

If means of communications fail movements may be made between South Morton and North Morton under flag protection.

## FREIGHT AND PASSENGER TRAIN OPERATION

#### 1155-A4. Brake and Train Air Signal Instruction.

At Indianapolis for Freight Trains, Train brake test will be made in accordance with second paragraph Instruction 11 of the Brake and Train Air Signal Instruction 99-D-1, revised August 1, 1958.

#### ALL DIVISIONS

#### FREIGHT AND PASSENGER TRAIN OPERATION

1156-A1. At a point other than initial terminal where crews are changed, and consist of the train remains intact, a brake test is not required.

Incoming engineman will verbally notify the outgoing engineman of the condition of the train brakes.

1156-A2. When necessary to apply brakes from a train by the use of the A-2 caboose valve, the following instructions must be adhered to:

Service application: Move the valve handle from re-lease towards application position, being sure to hesitate ten (10) seconds in each notched position before moving on to the next notch. The first movement of the handle locks valve so it cannot be moved back to closed position. After the train has stopped the valve can be unlocked by moving the

handle to the extreme application position.

Emergency application: Move the valve handle quickly from release to the extreme application position and leave it

there until after the train has stopped.

1156-A5. Diesel units, including dead diesel units handled in a train, which are not equipped with coupler stops or alignment control feature must not be operated when coupled to each other except:

When they are the first two units on the front of a train. When they are the last two units on the rear of a train.

When they are in passenger service.
When they are moving light.
All units of Classes AF24, AF24A, AF25, AF27, EF22, EF25, EF25A, GF25, GF25A, AS18AM, AS18M, AS24, APS24MS, FS24M, EFS17M, except 7000-7049, are equipped with coupler stops or alignment control feature. Individual units of certain other classes are also equipped.

1156-A6. When it is evident to the engineman that brakes are being applied from the rear of a train, the automatic brake valve should be placed in first service or minimum reduction position when engine is equipped for pressure maintaining, otherwise, automatic brake valve should be placed in lap position. Power, if being used, should be gradually shut off in such a manner to avoid rough slack action.

When an emergency application of the brakes occurs from the train, instruction 28 of the 99-D-1 Brake and Train Air Signal Instructions must be complied with.

1156-A7. Freight trains leaving fuel or water stations, sidings, etc., will move at such speed as will permit inspection of train as it passes and reduce speed sufficiently to permit members of crew to board rear of train with safety.

The number of units on the front of freight trains 1156-A8. must not exceed 12.

The number of whole units on the line on the front or rear of freight trains must be such that not more than the following number of traction motors are powered:

	No. of Motors
Front end, pulling:	
Trains authorized 60 MPH	32
Other	20
Rear end, pushing:	
Solid loaded mineral freight	24
Other	18
Front end, dynamic braking:	ł
Solid loaded mineral freight	30
Other	24

Where more than the above power is attached to a train, sufficient units must be isolated so as not to exceed the above

Individual motor circuits must not be cut out to reduce the number of powered motors. Enginemen of trains authorized to operate at 60 MPH must use care in applying power at speeds below 20 MPH, with more than 20 motors on line.

1156-A9. When train parting occurs on freight trains and Conductor cannot ascertain the cause and correct same, the cars involved must be set out of train at first available point and billing information given to the Train Dispatcher.

#### 1156-A10. PUSHER ENGINES

When pushing freight trains, pusher engines will ease off passing over crossovers or turnouts when making diverging movements, exercising care to avoid slack action.

The operation of pusher engines behind occupied cabin cars

of assembled freight trains in the State of Ohio is prohibited. In the State of Ohio, employes and others are prohibited from riding on a cabin car when a pusher engine is operated behind a cabin car of an assembled freight train; they may ride on the pusher engine. The train shall be stopped to cut off the pusher engine.

1156-A11. Form MP 217-A card, for reporting Passenger Car defects is located in a receptacle on the inside of electric lockers on all cars except Multiple Unit Electric cars. On Multiple Unit Electric cars the receptacle is located on the inside of the electric switch cabinet in outside vestibule.

Conductor (Enginemen for head car of MU Train) must enter on MP 217-A, description of all defects found, together with other information called for under the heading "Train Crew Entry".

When defects occur enroute, which must be given attention before train reaches final destination, General Superintendent must be notified of repairs required, by message or otherwise, at first opportunity. M. E. Department representative must also be notified promptly upon arrival of train at point where defect is to be given attention.

1156-A12. On Secondary, Industrial and Running Tracks engineman and trainmen will, when weather conditions are such that flangeways of road crossings or switches may be obstructed with snow or ice, assure themselves that road crossings and switches are in safe condition to use. If necessary, trains and engines will be stopped and road crossings inspected by member of engine or train crews before passing over them.

#### HOT JOURNALS-ROLLER BEARINGS

Passenger trainmen must obtain from Crew Dispatcher and carry with them while on duty a 200 DEGREE Tempilstik during the months of April through October, inclusive, and 175 DEGREE Tempilstik during the months of November through March, inclusive.

To determine when the roller bearing journal box is over-heated to the extent that it must not be continued in service, proper Tempilstik must be used by stroking the outside surface of the top of the journal box. If a liquid smear results temperatures is in excess of allowable limit and report must be made to Superintendent for instructions.

#### Zanesville Secondary Track ZANESVILLE TERMINAL R. R.:

1159-A1. Cars with a gross weight of over 210,000 pounds are prohibited.

#### Zanesville Branch

NEW LEXINGTON-JUNCTION CITY:

1159-A2. Trains handling N. Y. C. R. R., cars with a gross weight of 320,000 pounds are restricted to the speed indicated while passing over the following bridges:

Bridge No.	Location	Miles Per Hour
39.30 41.76	West of New Lexington East of Junction City	40 20
	<u> </u>	<u></u>

1160-A2. Class GF-25 diesel units must not exceed a speed of 10 miles per hour on tracks other than Main, Secondary and Running tracks.

1160-A3. Class FS-20 engines prohibited on Eggleston Avenue between Court Street and Pearl Street.

#### 1160-B1. Other Equipment Restrictions

In accordance with General Notice No. 208-G, dated July 1, 1963, cars having a combined weight of car and lading as shown below are subject to the following restrictions as to speed over certain bridges, etc.:

Combined Weight of Car and Lading (Lbs.)	Minimum Coupled Length	Restrictions
150,000 to 170,000 170,000 to 220,000 220,000 to 263,000	40'-0" 42'-0" 48'-0"	Same as Column 2 Engines Same as Column 5 Engines Same as Column L Special Loads

The above restrictions do not apply to Jenny Type hopper or gondola cars. These cars have a gross weight of up to 220,000 pounds and a coupled length of approximately 24 feet. Their effect on long span bridges is severe and they are subject to restrictions under Special Instruction 1160-A1 as follows:

"Two or more loaded coupled cars—Column J Special Loads" A maximum weight of 263,000 pounds, car and lading, can be handled except as restricted below:

Cars of Foreign or Private Ownership with weight of car and lading over 220,000 pounds, equipped with 4 wheel trucks having wheels of less than 36 inch nominal diameter are not to be accepted for movement without authority of General Manager Transportation.

Because of light rail, cars having combined weight of car and lading over 220,000 up to 263,000 pounds, may be moved over the following territory only at restricted speed as shown:

#### ZANESVILLE SECONDARY TRACK:

Mile Post 29.8 to Mile Post 38.2.....15 miles per hour

#### ZANESVILLE BRANCH:

#### MORROW SECONDARY TRACK:

#### SPRINGFIELD SECONDARY TRACK:

170,000–220,000	42'-0"	Same as Column 5
220,000–263.000	48'-0"	Same as Column L

Cars in the above weight classifications, but shorter than the minimum coupled length specified and cars having a combined weight of car and lading in excess of 263,000 pounds are subject to special restrictions.

The above restrictions do not apply to Jenny type hopper or gondola cars. These cars have a gross weight up to 210,000 lbs. and a coupled length of approximately 24 feet. Their effect on long bridge spans is very severe and trains with loaded coupled Jenny type hopper or gondola cars are subject to restrictions in Special Instruction 1160-A1 as follows:

Column J special load restrictions.

Cars having a combined weight of car and lading of over 222,000 up to 263,000 pounds may be moved, 15 miles per hour, over the following tracks:

South Bend Branch—Mile Post 121 to Mile Post 139. Mile Post 142 to Mile Post 153. Crown Point, Letz Co. Middle Track....X-40 type box cars Maynard, National Brick Co. Track, all engines are prohibited from entering building.

Class AF-60, AF-64, BF-60 and BF-64 engines prohibited from operating over eastward and westward humps in 55th Street Yard.

#### SOUTH BEND BRANCH:

South Bend Studebaker Aviation . . . . . . X-40 type box cars Freight House No. 1 track . . .

#### EFFNER BRANCH:

Newton, Newton County Stone Co. tipple......All box cars

#### ENGLEWOOD CONNECTING LINE

Passenger equipment, except B-60 type baggage cars, R-50 and R-60 type refrigerator cars, prohibited on west wye connection to Englewood Connecting Line, 58th Street, (P.F.W.&C.)

All cars 85 feet or more in length are restricted on tracks indicated as follows:

Location	Track	Restriction	
EC West Wye connection from No. 3 Track to Englewood Connecting Line Secondary Track		Prohibited	
59th Street Yard	East Wye connection from Engle- wood Connecting Line Secondary Track to Yard Running Track	Prohibited

## Other Equipment Restrictions.

1160-B1. Cars having a combined weight of car and lading, as shown below, are subject to the following restrictions as to speed over certain bridges, etc.:

Weight of Car (Pounds)	Minimum Coupled Length	Restrictions
150,000-170,000	40'-0"	Same as Column 2
170,000–220,000	42′-0″	Same as Column 5
220,000-263,000	48′-0″	Same as Column L

Cars in the above weight classifications, but shorter than the Minimum coupled length specified, are subject to special restrictions.

The above restrictions do not apply to Jenny type hopper or gondola cars. These cars have a gross weight up to 220,000 lbs. and coupled length of approximately 24 feet. Their effect on long bridge spans is very severe and trains with loaded coupled Jenny type Iron Ore cars are subject to restrictions in Special Instruction 1160-A1 as follows:

Two or more loaded coupled cars—Column J special load

restrictions.

In territory where they are permitted to operate, these derricks, in so far as effect of their weight on bridges is concerned, may be moved under the same restrictions as obtained for special loads listed in Column J Special Instructions 1160-A1. The derrick, however, must be separated from the engine by at least two cars, which may or may not be loaded.

NOTE 1. Not exceeding 15 miles per hour.

NOTE 2. Not exceeding 10 miles per hour.

NOTE 3. Not exceeding 5 miles per hour.

1160-C2. Trains with 100-ton wrecking derricks are prohibited on Dresden and Howard Industrial Tracks unless three cars are placed between derrick and engine.

### BUCKEYE DIVISION

## 1160-A1. Engines and special loads are restricted at locations shown below:

NOTE-Letters and figures indicate;

X-Prohibited.

D-Operation of engines coupled prohibited.

E-Restricted account light rail.

M-Prohibited beyond markers.

O-Prohibited except in detour or emergency service.

T-Prohibited on trestle.

Figures 5, 10, 15, etc., indicate maximum speed at which engines specified may be operated.

The small letter in parenthesis shown in location column indicates reference NOTE shown at end of table.

Engines of classes other than those listed shall not be run over any portion of the region unless authorized by Super-intendent Transportation.

Class of engines and special loads listed under each numbered and lettered column of this page will apply to corresponding columns of all succeeding pages of this Instruction.

NOTE 1. EF-22 class diesel units are restricted through Columbus, Ohio station tracks No. 1, 2 and 3.

NOTE 2. Engines must not use track beyond point designated.

#### CHICAGO DIVISION

## 1160-A1. Engines and special loads are restricted at locations shown below:

NOTE-Letters and figures indicate:

X-Prohibited.

B-Backward movement restricted to speed indicated.

D-Operation of engines coupled prohibited.

R-Restricted account of light rail.

Figures 5, 10, 15, etc., indicate maximum speed at which engines specified may be operated.

The small letter in parenthesis shown in location column indicates reference NOTE shown at end of table.

Engines of classes other than those listed shall not be run over any portion of the region unless authorized by Superintendent Transportation.

Diesel engines having units coupled will be governed by the most restricted unit so coupled.

Class of engines and special loads listed under each numbered and lettered column of this page will apply to corresponding columns of all succeeding pages of this Instruction.

#### FORT WAYNE DIVISION

#### 1160-A1. Engines and special loads are restricted at locations shown below:

NOTE-Letters and figures indicate:

X-Prohibited.

A-Backward movement prohibited.

B—Backward movement restricted to speed indicated.
D—Operation of engines coupled prohibited.
R—Restricted account of light rail.

Figures 5, 10, 15, etc., indicate maximum speed at which engines specified may be operated.

The small letter in parenthesis shown in location column indicates reference NOTE shown at end of table.

Engines of classes other than those listed shall not be run over any portion of the region unless authorized by Superintendent Transportation.

Diesel engines having units coupled will be governed by the

most restricted unit so coupled.

Class of engines and special loads listed under each numbered and lettered column of this page will apply to corresponding columns of all succeeding pages of this Instruction.

## SOUTHWESTERN DIVISION

## 1160-A1. Engines and special loads are restricted at locations shown below:

NOTE-Letters and figures indicate:

X-Prohibited.

A-Backward movement prohibited.

B-Backward movement restricted to speed indicated.

D-Operation of engines coupled prohibited.

E-Operation of engines coupled restricted to speed indicated.

R-Restricted account of light rail.

Figures 5, 10, 15, etc., indicate maximum speed at which engines specified may be operated.

Engines of classes other than those listed shall not be run over any portion of the region unless authorized by Superintendent Transportation.

Diesel engines having less units than the number listed for that class may be operated under the same restrictions.

Class of engines and special loads listed under each numbered and lettered column of this page will apply to corresponding columns of all succeeding pages of this Instruction.

Farm Bureau Cooperative track, Old Freight House loading platform, American Vitrified Co. factory No. 18, Superior Clay Co. No. 1 plant and Universal Sewer Pipe Co.

†Illuminated Red Signs with amber lights visible to approaching trains are provided on this bridge as additional warning.

#### Gnadenhutten:

American Excelsor Corp.—Loading and unloading Dock (off Larson Dock).

#### Mile Post 98 (West of):

Ross Clay Co., plant No. 2

#### Port Washington:

Belden Brick Co. plant

# Coshocton (West of):

Carnation Creamery Co., between tracks at east end of building where car moving device is located.

#### Broken Aro Mine:

Tracks under coal tipple.

Eastward siding and No. 6 and No. 8 tracks in eastward yard. Westward siding and No. 5 and No. 7 tracks in westward yard.

#### Columbus:

No. 1 track 300 feet east of High Street Block and Inter-locking Station, from upright supporting driveway to Union Depot

Spruce Street loading platform Supradur Company.

Grogan Yard-Ohio Warehouse Development, Inc.-Building, drain pipes and unloading steps.

Merchandise Properties, Inc.—Loading and

unloading platform inside of building.

Yard B—Loading and unloading platforms—Stores Dept.—Area No. 5 and No. 6 tracks.

Milford Center:

Ohio Grain Co.—Loading and Unloading platform.

Dayton:

Loading platform, No. 42 to the Schumacher Industries. Dayton Tire & Rubber Co.—Loading and Unloa Unloading platform.

## Dayton-Lytle Industrial Track

Centerville:

Hankins Container Co.-Loading platform.

#### Cincinnati to Anoka

Valley-Oakley:
Witt Cornice Co.

Reading-Crescentville

Sperry & Hutchinson Co.

Crescentville (East of):

Ford Tracks 7 and 8 along Scrap Loading Docks.

Ralston Purina Plant, Evendale
Tracks 4 and 5 (close clearance exists at employees entrance when door is open)

Siding No. 4, to the Hamilton Welding Company Track.

Anderson:

Delco Remy siding-Plant No. 7.

## Akron Secondary Track

Columbus:

American Zinc Oxide Co.

Westerville:

Loading platform to the Celler Lumber Company.

Danville:

Lybarger Industrial Spur

Mt. Vernon:

Wayne Cash Feed Co.

#### Court Street Secondary Track

Blue Ash: Ohio Valley Warehouses, Inc.—Building and unloading platforms.

Cincinnati:

Atlantis Corp.

#### Dresden Industrial Track

Killbuck-Ayres Mineral:

All Bridges

#### Zanesville Yard Running Track

Zanesville:

All Freight Stations platforms have close clearance.

#### Zanesville Secondary Track

#### Zanesville:

N.Y.C. R.R. connection at Market Street, Rockell track All tracks serving freight stations.

### Fair Oaks:

Muskingum Iron and Metal Co.

#### Spangler: Zanesville Terminal R.R.:

Line Material Co. and Barneby Chaney Co., Line Material Company tracks. National Battery track.

#### Roseville:

Ohio State Brick Plant No. 3 Track-Robinson-Ransbottom Pottery. Golden Oak Mine—Runaround track.

# Goston (East of): No. 1 Tunnel

#### Wilbren (West of):

Roxbury No. 2 Mine and Sunnyhill Coal Co.

### Morrow Secondary Track

#### Lancaster:

On Loroco Industries track.

#### Circleville:

Eschelman Mill-all tracks. Purina Ralston Tracks No. 1, 2 and 3. Moulded Plastics Inc.

Washington C. H.: Farm Bureau Elevator. Eschelman Mill track.

#### Toledo Branch

#### Toledo:

On tracks No. 203 and 205. Passing Diesel Sanding facilities.

Side Clearance. Employes are prohibited from riding on sides of cars, engines or other equipment while movements are being made at the following locations:

#### LOCATION

# Court Street Secondary Track

# Idlewild-East Norwood:

Floral and Park Avenue Loading Dock (Chevrolet).

# Cincinnati-Eggleston Ave.: Heekin Can Co.

# Blue Ash:

Ohio Valley Warehouse, Inc.—Building and unloading platforms.

#### Main Line Pittsburgh to St. Louis

#### East Alton:

Arrow Mfg. Co.

### Dayton-Lytle Industrial Track

Kettering:

General Motors Corp.

#### Main Line Pittsburgh to Chicago

Mansfield:

Tappan Co.

#### Toledo Branch

Tiffin:

Grabler Mfg. Co.—All tracks.

1163-A5. Unless adjacent tracks are clear, the following classes of engines must be operated with extreme care between the points indicated below:

Classes Engines	Between	And
AP BP EP EF FF	C. & O. Railway Crossing 1810 ft. south of Mile Post 235. Grand Rapids Branch	2920 ft. north of

1163-A6. Account close clearance of tracks under Wehrman Avenue Bridge, just east of Avondale, train and engine crews are warned not to ride on side of cars or engines and trains and engines must avoid passing each other under the bridge.

Yard crews switching or standing with drafts of cars under the bridge, must protect movements on adjacent track.

#### TRAIN DISPATCHERS

1201-A1. Location of Train Dispatchers-

Train Dispatchers in charge as follows:

#### Columbus

Main Line: Custer to First St., Newark (C. & N. Div.)

Joyce Avenue to London and New Paris London to East Norwood and Thorne Cincinnati to Anoka

#### Branches:

# Secondary Tracks:

Ft. Wayne Undercliff Zanesville C & X

Springfield Middletown Court Street Trinway Akron

Zanesville Morrow Undercliff Fort Wavne Ridgeville

#### Chicago

Main Line: Wanatah to South Branch Bridge.

Bradford to Beverly Junction. Bernice to Colehour Junction.

#### Branches:

South Bend Effner

#### Fort Wayne

Main Line: Lucas to Wanatah.

#### Branches:

#### Secondary Tracks:

Toledo Grand Rapids Logansport

Traverse City Mackinaw City Vandale Muskegon

Olive Penford

#### Indianapolis

Main Line: Thorne to Eads.

#### Branches:

#### Secondary Tracks:

Louisville I. & F.

Vincennes Crawfordsville Peoria

Madison O Track

NOTE-Train orders will be issued by authority and over the signature of the Division Superintendent in charge of the movements.

Train dispatchers at Columbus will be in charge of movements on that part of the Ft. Wayne Division between Adams and Division Post 2640 feet west of Mile Post 69, east of Decatur on the Ft. Wayne Secondary Track.

Train dispatchers at Chicago will be in charge of movements on that part of the Ft. Wayne Division between Wanatah and Division Post Mile Post 423 east of Valparaiso.

Train dispatchers at Indianapolis will be in charge of movements on that part of the Chicago Division between Van and Division Post Chicago Division south of Clymers on the I. & F. Branch.

- 1201-B1. A train must not leave its initial station without reporting for train orders.
- 1201-B2. At Dayton, conductors of all trains using tracks adjacent to station platform must call "DE" Office on telephone and ask for train orders, or instructions. If there are any the conductor must go to "DE" Office immediately to receive them and will personally deliver a copy to the engineman. When there are none, the conductor will personally notify the engineman.

Trains using other than the station platform tracks through Dayton, will proceed on signal indication without reporting for

train orders.

- 1201-B3. At Neilston, conductor or engineman of westward trains dispatched from Yard "B" Classification Yard must report for train orders and notify operator at Neilston when train is ready to depart.
- 1201-B4. At Fields, conductor or engineman of northward trains dispatched from Grogan Yard enroute to Sandusky Branch must report for train orders and notify operator at Fields when train is ready to depart.
- 1201-B5. At Columbus, conductors of P. R. R. westward trains departing Columbus Union Depot will report via telephone located in yellow telephone box at west end of No. 3 station platform to operator at High Street for information as to whether or not train orders, messages, etc., are to be delivered at this point. The conductor will so inform engineman and also acknowledge same to operator at High Street. This arrangement does not in any way relieve the conductor, engineman or operator from full compliance with Rule 221.
- 1201-B6. At Louisville conductors and enginemen are relieved from reporting for train orders. The conductor will arrange to contact operator Clagg, telephone 584-3736 from station masters office for instructions.
- 1201-B7. At St. Louis, enginemen of eastward passenger trains are relieved from reporting for train orders. Conductors will personally deliver a copy of each train order to the enginemen who will compare with the conductor by reading aloud the train order. When there are no train orders or messages, the conductor will personally notify the engineman before the train departs.
- 1201-B8. Between I. C. R. R. Jct. (Kentucky Street) and Clagg, passenger trains will operate as passenger extras and without train orders. Trains having work between these points will clear such trains on information obtained from operator at Clagg.
- 1201-B9. COLUMBUS UNION STATION. Train Ready Indicators located in U. S. Tower, for eastward Passenger Trains, with Push Buttons located east end of No. 1 platform for No. 1 and No. 2 tracks, and east end of No. 3 platform for No. 3 and No. 4 tracks. Conductor will notify Operator-Train Director, U. S. Tower, when his train is ready to depart by use of the Push Button for the track involved.

1201-B10. RIDGEVILLE. Train order delivery staff located on south side of southwest "Wye" track 4411 feet east

of West Ridgeville, in service.

Bracket is provided to display Train-order signal, Rule 294, FIG. B, on this delivery staff. When train orders are to be delivered on this staff, Train-order signal Rule 294, FIG. B will be displayed and trains and engines must not proceed until train orders are obtained.

1201-B11. At Logansport (Van) and Chicago Union Station, enginemen of passenger trains are relieved from reporting for train orders. Conductor will secure and personally deliver a copy of each train order or clearance form CT 1250 to the engineman, who will compare with the conductor by reading the train order aloud. Trains starting from 12th Street yard will receive their train orders at South Branch Bridge.

# SIGNAL RULES

# 1250-A1. Movement of Trains by Block Signal System Rules

X-Indicates Rules in Effect

- COLUMN 1—Movement of Trains in the same direction by Block Signals.

  Rules 251, 253 and 254.
- COLUMN 2—Opposing and following movement of trains by Block Signals.

  Rules 261, 262, 263 and 264.
- COLUMN 3—Movement of trains on Secondary Tracks. Rules 271, 272 and 273.
- COLUMN 4—Manual Block Signal System.

  Rules 305 to 373 inclusive, except Rule 316.
- COLUMN 5—Manual Block Signal System.
  Rules 305 to 373 inclusive, except Rule 317.
- COLUMN 6—Manual Block Signal System.

  Rules 305 to 373 inclusive, except Rule 317, for movements against the current of traffic.
- COLUMN 7—Manual Block Signal System.

  Rules 305 to 373 inclusive, except Rule 316, for movements against the current of traffic.
- COLUMN 8—Automatic Block Signal System.

  Rules 501 to 512, with the current of traffic and on single track.
- COLUMN 9—Automatic Block Signal System.

  Rules 501 to 512, against the current of traffic.
- COLUMN 10—Cab Signals.

  Rules 551 to 570, with the current of traffic and on single track.
- COLUMN 11—Cab Signals.

  Rules 551 to 570, against the current of traffic.

NOTE 1. At locations listed above, when a train engine or track car is stopped by an interlocking home signal and there is no train or engine approaching on the foreign railroad and no other cause for detaining train engine or track car be known, conductor, engineman or driver track car must be governed by the Instructions posted at the crossing. Copies of Instructions governing movements over each crossing will be posted in adjacent Block Stations and Train Dispatcher's office.

At locations listed above, a reverse movement through the interlocking or a forward movement after making a reverse movement through the interlocking must not be made until instructions posted at the crossing have been complied with.

Cars must not be left standing between home signals.

Track cars must stop at interlocking home signal, then pass Stop-signal, proceed to and stop short of the crossing, ascertain that no trains are approaching, provide protection, and then proceed over the crossing.

Box at crossing containing instructions must be left closed and locked at all times.

Trains or engines on No. 2 track desiring to enter NOTE 2. the Wabash interchange track must occupy the track circuit within the interlocking before switch can be operated.

Home Signals of the Automatic Interlocking are also the Home Signals of the Remote Controlled Block Station.

When the controls of the Home Signals are placed in a pro-When the controls of the Home Signals are placed in a proceed position by the Operator at Ridgeville the proper aspect will be displayed on the Home Signal automatically if there is no train approaching on the N.Y.C. R.R. If a train, engine or track car is stopped by the Home Signal and there is no train approaching on the N.Y.C. R.R. Conductor, Engineman or Driver T.C. must contact Operator at Ridgeville to ascertain if the controls are in proceed position. If proceed aspect then is not displayed Conductor, Engineman or Driver T.C. will be governed by instructions posted in box stencilled P.R.R. located at crossing.

If after complying with instructions governing manual operation of the Automatic Interlocking a proceed aspect is not displayed, the conductor, engineman or driver T.C. will contact the operator at Ridgeville for a Form "C" to indicate the

condition of the block only.

After obtaining Form "C" for the condition of the block only, movement over the crossing may then be made governed by instructions posted in box stencilled P.R.R. at the crossing.

NOTE 4. Interlocking signals governing movements over P.R.R.-I.C. R.R. crossing at grade are controlled automatically.

Interlocking signals governing movements on P.R.R. other than crossing at grade controlled by Operator at Smithboro.

### 1663-A2. Logansport Branch Newton

During the hours Newton block and interlocking station is closed, track cars must stop at home signal, then pass home signal in stop position, if derails are in derailing position, lift track car over derails, proceed to and stop short of the crossing, ascertain that no trains are approaching on the Erie Railroad tracks, provide protection, then proceed over crossing.

#### 1663-A3. Grand Rapids Branch Kendallville

Track cars must stop at home signal, then pass stop signal, if derails are in derailing position, lift track car over derails, proceed to and stop short of crossing, ascertain that no trains are approaching on N. Y. C. R. R. track, provide protection,

then proceed over crossing.

At locations listed above, when a train, engine or track car is stopped by the interlocking home signal and there is no train or engine approaching on the foreign railroad and no other cause for detaining train or engine be known, conductor, engineman or driver of track car must be governed by instructions posted at the crossing.

When Block and Interlocking Station is closed, 1663-A5. trains and engines finding a Home Signal at Broad or Foley displaying Aspect Rule 292, FIG. A, must communicate with Operator at Delco or Newman for instructions and must not pass stop signal except as authorized by train order.

1663-A6. Trains and engines must approach home signals governing movements into Clagg Interlocking, at the following points, prepared to stop and be governed by the indication displayed thereon:

K. & I. T. Ry. Jct., Portland Ave.

I. C. R. R. Jet., Main St.

Broadway St.

Eleventh St.

### 1663-A7. Lapaz Junction (B. & O.)

If a train, engine or track car is stopped by the Home Signal and there is no train approaching on the B. & O. R.R., Conductor, Engineman or Track Car Driver must contact B. & O. R.R. Train Dispatcher from telephone located at crossing, and be governed by his instructions.

If means of communications have failed and no cause for not proceeding over the crossing be known, conductor will reach understanding with engineman, provide full protection against trains on the B. & O. R.R., pass Stop-Signal and occupy track section between Home Signal and the B. & O. R.R. Crossing, without fouling the B. & O. R.R. track, for a period of five (5) minutes, after which movements may be made over the crossing, if no B. & O. R.R. movements are on or approaching the crossing. approaching the crossing.

If means of communication have failed, when Track Cars are involved in movement, Track Cars will pass Stop-Signal, proceed to and stop short of the crossing, ascertain that no trains are approaching on the B. & O. R.R. track, and then proceed over the crossing.

# Auburn Junction (B. & O.)

If a train, engine or track car is stopped by the Home Signal and there is no train approaching on the B. & O. R.R., Conductor, Engineman or Track Car Driver must contact B. & O. R.R. Train Dispatcher from telephone located 250 feet North of the crossing, and be governed by his instructions.

If means of communications have failed and no cause for not proceeding over the crossing be known, conductor will reach understanding with engineman, provide full protection against trains on the B. & O. R.R., pass Stop-Signal and occupy track section between Home Signal and the B. & O. R.R. Crossing, without fouling the B. & O. R.R. track, for a period of five (5) minutes, after which movements may be made over the crossing, if no B. & O. R.R. movements are on or approaching the excessing. ing the crossing.

If means of communication have failed, Track Cars will pass Stop-Signal, proceed to and stop short of the crossing, ascertain that no trains are approaching on the B. & O. R.R. track, and then proceed over the crossing.

### USE OF TELEPHONES

Commercial telephones, at the following locations, are for use when company communicating lines fail or in other emergencies. Telephones in stations can be reached from the outside.

Commercial business telephones are installed on Grand Rapids Branch between Mackinaw City and Walton Jct. and on Traverse City secondary track, with exchanges and numbers as indicated below:

Walton Junction, Block Limit Station—Fife Lake 879-3321

Kalkaska, Passenger Station Baggage Room—ALpine 8-2232

Mancelona, Passenger Station
Baggage Room—Justice 7-6411
Elmira, Block Limit Station—Elmira 546-2151
Boyne Falls, shelter box outside Passenger Station—Boyne Falls 549-2851

Formans, Block Limit Station—DIamond 7-2662

Petoskey, Shelter Box outside Freight Station-DIamond 7-3414

Kegomic, Block Limit Station—DIamond 7-3412 Carp Lake, Block Limit Station—Levering 537–3947
Mackinaw City, inside Freight Station—HEmlock 6-7321
Traverse City, outside Freight Station—WIndsor 6-9002
Cadillac, Interlocking—PRospect 5-4212
Fuller Block Station—616-363-2930

Belmont Block Limit Station—Grand Rapids—362-9193 Rockford Agent—Grand Rapids—866-7281

Howard City, Block phone cabinet in Freight House-931-4326

Howard City Agent—931-4326 Morley Agent—Ulysses 6-7762 Stanwood Block Limit Station—823-3790

Big Rapids Tool House, 100 ft. north of B.L.S.—796-9507 Reed City—Telephone box at PRR-C&O crossing—

Tennyson 2-5141 Reed City Agent—Tennyson 2-5141 Cadillac Agent—775-2391

Cadillac Supervisor Track and Assistant Trainmaster— 775-2391

Cadillac Enginehouse—775–5141 North Yard Block Limit Station—Cadillac 775–5211 Missaukee Jct. Telephone shanty—Cadillac 775–5305

Commercial telephones will be used for block operation incident to train operation and other Company business.

Commercial telephone credit card numbers have been issued to designated employes.

When communication with any of the above listed commercial business telephones is desired telephones will be operated in accordance with instructions posted at that location. Employes will furnish operator credit card number upon request.

Telephone shelter boxes shall be closed and locked when telephone is not in use. Prompt report must be made to Super-intendent Transportation when telephone shelter box is found in damaged condition, unlocked, lock missing or defective.

# Logansport Branch

Company communicating lines between Vandale and Log, out of service.

Commercial telephones to be used for train operation and other company business installed at the following locations:

Van Tower, Logansport, Inc.—7215 Newton Tower, North Manchester, Ind.—982-2489 Track foreman's office, Freight House, North Manchester, Ind.—982-2793

N & W Crossing, South Whilley, Ind.—723-4870 Vandale Tower, Columbia City, Ind.—244-5811 Mexico, Ind. Elevator Track Swg.—872-4451

#### Crawfordsville Secondary Track

Company communicating lines between Otter Creek Jct. and Fort, out of service.

Commercial telephones to be used for train operation and other company business installed at the following locations:

Union Block Office, Terre Haute, Ind.—Crawford 4067 Preston Block Office, Terre Haute, Ind.—North 5680 Agent Rockville, Ind.—A.C.-812 569-3284

Block Station, Crawfordsville, Ind.—A.C. 317 Ames 362-3905

Colfax Block Station, Colfax Peoples Cooperative Telephone Company—73

Frank Block Office, Frankfort, Ind.—A.C.-317 659-2161 Dispatcher, Indianapolis, Ind.—A.C.-317 635-9331

## **USE OF TELEPHONES**

### Trainphone

1703-A2. Conductors and enginemen of trains having engine or cabin equipped with trainphone will make communication test of trainphone with first so equipped station after leaving their initial terminal and will promptly notify the operator that engine or cabin is so equipped and in operative condition.

### THE PENNSYLVANIA RAILROAD WESTERN REGION

Chicago, Illinois, April 4, 1966.

#### GENERAL ORDER No. 401

Effective (2.01 A.M., E.S.T.) Sunday, April 24, 1966

### Applies in All Zones

(a) Timetable No. 4 in effect. This timetable is a joint Buckeye-Chicago-Fort Wayne-Southwestern Division timetable. It contains the necessary instructions issued in general orders up to and including General Order No. 311, all of which must be removed from bulletin boards. Each employe must examine each page of Timetable No. 4 to see that his copy is complete, pages properly lined up, and note changes. General Orders will be numbered consecutively regardless of division on which they apply. Employes of all divisions must have all General Orders of

all divisions pasted in their timetable.

(b) BOOK OF RULES RULES FOR CONDUCTING TRANSPORTATION

Rules for Conducting Transportation, effective October 28, 1956, revised in part as follows: Revisions of April 28, 1957—

Revisions of April 28, 1957—
Rule 104—page 34; Rule 331—page 77; Rule 365—page 79; Rule 629—page 90; Form C—page 98; Form K—page 99; and Rule 4076–J (added), page 112.
Revisions of October 27, 1957—
Rule 30—page 23; Rule 400C-1 (added), page 100; Rule 4103–B—page 113; and Rule 4165–A—page 131.

Participa of September 1, 1089

Rule 30—page 23; Rule 400C-1 (added), page 100; Rule 4103-B—page 113; and Rule 4165-A—page 131.
Revisions of September 1, 1958—
Rules G and H—page 8; Rule R—third paragraph, page 10; Rule 103—portion of last paragraph—page 34; Rules 104 and 105—pages 34 and 35; Rule 502—page 80; Rule 400N-21—pages 107 and 108; Rule 4076-F—page 112; and index—page 3, 18th line; Rule 4076-I—page 112; Rule 4154-B—pages 115 and 116; Rule 4165-A—page 131; Rule 283—page 56, Note 2 added; Rule 400N-4—page 105 (added); Rule 4076-J—page 112, in sequence.
Revisions of February 27, 1959—
Rule 26—second and third paragraphs, page 23; Rule 34—page 24; Rule 75—pages 25 and 26; Rule 76—second and fourth paragraphs, page 26; Rule 77—second paragraph, page 26; Rule 99—fourth paragraph, page 32; Rule 106—page 35; Rule 204—third paragraph, page 37; Rule 293-A—page 68; Rule 365—second and fifth paragraphs, page 79; Rule 568—page 87; Rules 701, 702, 703, 704, 705, 706, 707, and 708—pages 92, 93, 94 and 95.
Form K—second paragraph of instructions, page 99.
Rule 4165-A—page 131.
Revisions of May 1, 1960—
Rule M—page 8; Rule 361—page 78; Form K—last paragraph, page 99; Rule 4076-J—page 112; Rule 4155-I—page 122; Rule 4155-J—first and fifth paragraphs, page 123; Rule 4156-G—fourth paragraph, page 126; Rule 4160-C—Page 129.
Revisions of March 1, 1964—

Page 129.

Revisions of March 1, 1964-

Region—page 11, changed, Division—page 11, added. Revisions of May 3, 1964—

Rule 4160-B—pages 128 and 129.
Rule 4160-C—page 129.
Rule 4160-D—page 129 (annulled).
Revisions of August 25, 1964—
Rule 4076-F—page 112.

Revisions of October 18, 1964— Rule 35—page 24; Rule S-93—page 30; Rule 99—page 32; Rule 106—page 35; Rule 152—page 36; Rule 280—page 53; Rule 316—page 74; Rule 317—pages 74 and 75.

Revision of April 25, 1965-page 1.

Employes must paste Rule revisions in sticker form over the corresponding Rule or page of the Book of Rules as indicated thereon.

# (c) RULES FOR CONDUCTING TRANSPORTATION

Authority vested in the Superintendent Transportation by Book of Rules is delegated to the Division Superintendent. Train orders, messages and General Notices will be issued and over the signature of the Division by authority Superintendent.

General Notices will be numbered consecutively on each

Division, prefixed by the number of the timetable. General Orders will be issued by authority and over the signature of the General Superintendent of the Region. In the application of Rules 400N-1, -3, -5, and 400N-7, Duties and Responsibilities of Train and Engine Service

Employes, the position and title of the Assistant Super-intendent, Transportation or his representative, will be considered as replacing those of Trainmaster and Road Foreman of Engines.

Information and instructions previously issued in the form of Trainmaster and Road foreman of Engine Notices will henceforth be issued in the form of Train Service and Engine Service Notices by authority of Assistant Superintendent Transportation—Motive Power.

Last paragraph of Rule 400C-7 changed to read as follows: The use of spectacles with colored glass by employes whose duties require them to distinguish the position or color of signals is prohibited except that when authorized by the Medical Department, approved colored lense glasses may be worn by employes in Train and Engine Service when exposed to direct rays or glare of the sun.

#### (d) BRAKE AND TRAIN AIR SIGNAL INSTRUCTION

Brake and Train Air Signal Instructions, 99-D-1, effective January 1, 1953, revised in part as follows:

Revision of 3-30-54.

Revision of 12-5-54.

19-b Annulled.

Revision of 9-1-55. 5-b.

Revisions of 7-1-58.

14, 14-a.

Revisions of 8-1-58.
7-a, 7-b, 7-c, 9, 9-a, 9-b, 9-f, 11, 11-b, 11-c, 11-d, 11-e, 12, 13, 13a, 14, 14-a, 14-b, 15-a, 18-b, 44, 45, 56-b.
Renumbered 14-c (former 14-b), 14-d (former 14-e), 14-e

(former 14-d).

Revisions of 10-1-58.

9-c, 14-f.

Revision of 2-17-60—Instruction 44.
All reference to Speed Brake Control and 3-inch Piston Travel to be deleted.

Revisions of 8-1-60.

7-c, 12.

Revision of 11–1–63.

7-b.

Revisions of 6-1-64.

7,7-c, 28, 41.

Revision of 8-26-64.

3-m.

### e) ENGINE AND SPECIAL LOAD RESTRICTIONS

Class EF30A diesel engines are subject to the same restrictions as shown in Column 5, Special Instruction 1160-A1, including Note 2, Page 220. In addition they are prohibited at the following locations:

#### **COLUMBUS:**

GROGAN: Middle Wye track YARD C: All tracks

MIAMI YARD: All tracks

#### CINCINNATI:

FULTON YARD: Switch at west end of track 18 and cross-over between inbound and outbound tracks.
FULTON YARD: Switches at west end of tracks 17 and 19.

#### CHICAGO:

Mile Post 313.9, North Joint Tracks

#### WANATAH:

Connection with Monon

#### CADILLAC:

Connection with Ann Arbor

#### **GRAND RAPIDS:**

Lake Michigan Drive connection with N Y C

#### WOLCOTTVILLE:

South connection with Wabash

#### TOLEDO:

Maumee River Bridge, north end No. 1 track Special Instruction 1160-A1, changed.

# Applies in Zone A

# (f) TRINWAY SECONDARY TRACK GILBERT-END OF BLOCK

(Temporary Speed Restriction)
Trains and engines must not exceed a speed of 10 miles per hour at 300 feet east and west of Mile Post 11, west of Gilbert, account track condition.
Special Instruction 1157-F1, changed.

#### (g) MORROW SECONDARY TRACK BREMEN-WR

(Temporary Speed Restriction)
Trains and engines must not exceed a speed of 15 miles per hour between Mile Post 50, west of Bremen and Mile Post 58, east of WR, account track condition.
Special Instruction 1157-F1, changed.

# (h) MORROW SECONDARY TRACK LANCASTER (C & O)-DEL MOUNT

(Temporary Speed Restriction)
Trains and engines must not exceed a speed of 10 miles per hour between Mile Post 61, west of Lancaster and Mile Post 64, east of Del Mount, account track condition.
Special Instruction 1157-F1, changed.

# (i) MORROW SECONDARY TRACK DEL MOUNT-AMANDA

(Temporary Speed Restriction)
Trains and engines must not exceed a speed of 10 miles per hour between 2600 feet west of Mile Post 65, west of Del Mount and 2600 feet west of Mile Post 66, east of Amanda, account track condition.

Special Instruction 1157-F1, changed.

# (j) MORROW SECONDARY TRACK AMANDA- $\mathbf{SV}$

(Temporary Speed Restriction)
Trains and engines must not exceed a speed of 10 miles per hour between Mile Post 72, west of Amanda and Mile Post 73, east of SV, account track condition.
Special Instruction 1157-F1, changed.

# (k) MORROW SECONDARY TRACK SV-CIRCLEVILLE

(Temporary Speed Restriction)
Trains and engines must not exceed a speed of 20 miles per hour between Mile Post 74, east of SV and Mile Post 75, west of SV, account track condition.
Special Instruction 1157-F1, changed.

### (1) MORROW SECONDARY TRACK SV-CIRCLEVILLE

(Temporary Speed Restriction)

Trains and engines must not exceed a speed of 10 miles per hour between Mile Post 79 and Mile Post 80, east of Circleville, account track condition. Special Instruction 1157-F1, changed.

# (m)MORROW SECONDARY TRACK CIRCLEVILLE-WILLIAMSPORT

Temporary Speed Restriction)

(Temporary Speed Restriction)
Trains and engines must not exceed a speed of 10 miles per
Trains and engines must not exceed a speed of Circleville and Mile Post 85, east of Williamsport, account track condition. Special Instruction 1157-F1, changed.

# (n) MORROW SECONDARY TRACK WILLIAMSPORT-ATLANTA

(Temporary Speed Restriction)
Trains and engines must not exceed a speed of 10 miles per hour between Mile Post 93, west of Williamsport and Mile Post 94, east of Atlanta, account track condition. Special Instruction 1157-F1, changed.

# (o) MORROW SECONDARY TRACK WF-NEW HOLLAND

(Temporary Speed Restriction)
Trains and engines must not exceed a speed of 10 miles per hour between Mile Post 96, west of WF, and Mile Most 97, east of New Holland, account track condition. Special Instruction 1157-F1, changed.

# (p) MORROW SECONDARY TRACK NEW HOLLAND- ${f G}$

(Temporary Speed Restriction)
Trains and engines must not exceed a speed of 20 miles per hour between Mile Post 101, west of New Holland, and Mile Post 106, east of G, account track condition.
