

**NOTE:**

Regulation must specify whether frogs are for use in single or double track and if for double track must be accompanied by a sketch showing angle and distance between track centers.

The Wing Rails of the crossing must be ground to fit Splices for 100 lbs. P. S. Rail and manufacturer must furnish the necessary number of pairs of **CONTINUOUS SPLICES** to connect Crossing in track.

When Crossing is used in connection with rails of different type, the compromise must be made at least one rail length from the Crossing.

Steel Alloy Crossings shall be either Manard, Manganese or other approved alloy of Steel.
