

BASE INSULATION

WASHER PLATE INSULATION

WASHER PLATE

END POST INSULATION

NOTE:- Requisitions must specify the name (as designated on the plan) of the part required, and the number of the plan upon which the part is shown in detail.

Requisitions for nut locks shall specify only the diameter of the bolts with which they are to be used.

When it is necessary to renew the square head bolts on old type of joints, they shall be replaced by Button Head Bolts, Washer Plates and Washer Plate Insulations as covered by table of references below.

Bolts shall be staggered in all six hole joints.

TABLE OF REFERENCES FOR REPAIR PARTS  
FOR JOINTS FOR RAILS DRILLED  
AS STATED IN THE TITLE OF THIS PLAN

RAIL DRILLING	2 1/32-5-6
JOINT PUNCHING	6-5-5 1/2-5-6
